Moving Beyond Environmental Compliance 1997-11-20

since the u s department of energy as well as other federal and international agencies will stop granting contracts to companies that fail to comply with 14000 standards the search is on for any book that will make 14000 compliance easier tom welch with more than 20 years experience in environmental engineering and project management provides such a book moving beyond environmental compliance a handbook for integrating pollution prevention with iso 14000 is the first text to combine the best aspects of pollution prevention p2 total quality management tqm and iso 14000 into a comprehensive how to guidebook for achieving environmental compliance the ever increasing cost of environmental compliance as it is passed onto consumers cuts into the profit margin and reduces an organization s competitive edge at the very least compliance cuts into operating budgets and directs attention away from the primary business of an organization this handbook demystifies the implementation of effective environmental management systems as described in the iso 14000 and clarifies the application of effective pollution prevention methodologies that can drastically reduce this compliance burden

Protocol for Conducting Environmental Compliance Audits Under the Comprehensive Environmental Response, Compensation, and Liability Act 1998

the challenges of knowing and understanding environmental legislation in ontario have never been more demanding regulations are being revised updated and expanded major shifts are occurring in the philosophy of regulatory agencies the methods they use and the division of responsibilities among the three levels of government from small manufacturing businesses to huge conglomerates today s companies and organizations need to design and implement environmental management practices that will satisfy these shifting requirements and expectations the handbook of environmental compliance in ontario covers the changing nature of environmental compliance in a succinct and direct manner authors john david phyper and brett ibbotson provide you with practical information and insight into ontario s environmental regulatory requirements they cover all aspects including air quality and atmospheric emissions water quality and liquid effluents waste management and transportation site assessment and environmental audits spills and emergency response planning from environmental managers and engineers to lawyers and regulators to students teachers and consultants you ll find up to date information to ensure you are in sync with today s legislation and best practices

The Handbook of Environmental Compliance in Ontario 2003

this book provides a critical understanding of the challenges that exist in protecting the local and global environment through compliance efforts using existing environmental regulations the best compliance measures with the most useful regulations from over 50 countries are surveyed and are combined with science based quantitative analysis of geology hydrogeology and the chemistry of contaminants from anthropogenic sources the results are presented as a model that establishes a means by which protection of the environment can be greatly improved this is accomplished through a deeper understanding of our natural world and how anthropogenic activities and their management affect our planet features the first book that examines the successes of environmental regulation worldwide and highlights the areas that need improvement presents a tested and verified scientific model for enhanced environmental protection with scalability from local parcels to global levels describes and integrates the importance of understanding the geologic and hydrogeologic environment of urban and developed areas explains the importance of understanding the different types of pollution and their behavior in the

environment identifies the need for consistency in banning chemicals that are harmful in not just one country but throughout the world

Environmental Audit Handbook 1983

one of the main reasons for noncompliant firms poor environmental performance is the information gap on mexico s environmental policy pollution control could be improved through systematically fuller communication targeted to noncompliant firms including more environmental education especially of senior managers cover

Environmental Compliance and Sustainability 2019-11-04

why self regulation with the advent of such concepts as design for the environment industrial ecology and the recognized enlightened self interest that voluntary compliance brings it is in any company s best interest to avoid fines liabilities and bad publicity consumer concern and pressure from the marketplace give a competitive advantage to companies that pursue self regulatory initiatives such as iso 14001 bottom line voluntary compliance saves your organization time and money written by a senior environmental manager at a fortune 500 company industry self regulation and voluntary environmental compliance examines environmental regulation through a review of compliance and enforcement theory case studies of four leading programs illustrate the use of self regulation as a compliance tool the author highlights industry best practices identifies the key elements of a successful self regulation program and focuses on the benefits today s political environment has shown that to be successful environmental policy must move to the next level one in which we take advantage of voluntary self regulation initiatives and focus on environmental improvement industry self regulation and voluntary environmental compliance shows you how to create a voluntary self regulation program that will result in your organization becoming a star company

Opportunities for Improving Environmental Compliance in Mexico 1999

in this publication a number of recognized practitioners and scholars undertake to explore the realities and the conceptual underpinnings of environmental compliance mechanisms in a relatively short period of time such mechanisms were introduced in a wide range of new and existing environmental regimes yet little is known about their function in practice and their implications this is puzzling when considering that the new mechanisms considerably depart from traditional patterns of counteraction and dispute settlement instead they build on partnership and cooperation and include a wide range of possible reactions which range from those having coercive power to supportive measures quite a number of those mechanisms and their functioning are explained in the publication in order to lay ground for some cross cutting analysis which covers inter alia reporting inspection and monitoring supportive financial incentives and the interrelationship between compliance mechanisms and the principle of state responsibility and dispute settlement finally the role of non governmental organizations is addressed practitioners and scholars in international environmental affairs and international law more generally will benefit significantly from the inside views and thorough reflection as provided for in this book

Environmental Compliance Manual 2000-08

Environmental Compliance in California 2014

there has been a great deal written about the difficulties faced by small and medium sized enterprises smes compared to larger businesses smes face difficulties complying with environmental legislation particularly because of the amount of complex law this can result in the environment being treated as less of a priority even though smes collectively have a significant environmental impact over the past few years the uk has been focused towards achieving better regulation in particular hampton highlighted the need for more strategic thinking when it comes to developing regulation hampton suggested that regulators should use a risk based model similar to that used by the england and wales environment agency ea this view is shared by local authorities and other environmental regulators however there has been criticism from some commentators who suggest that certain legislation is not successfully enforced the increased use of risk assessment by the ea has reduced the number of inspections resulting in more pressure being put on remaining inspections as well as there being less opportunity to identify non compliance in addition those businesses not included under direct regulatory regimes are unlikely to be audited for compliance against any environmental legislation consequently a significant portion of all businesses go un inspected and uncontrolled because of the number of smes there needs to be an effective system of regulation that controls activities and targets those businesses that pose a risk to the environment without unnecessarily over burdening smes it is clear from the coalition government s planned austerity measures in 2011 that management of the environment will have to be done with less resource than before this thesis draws together findings from research conducted between 2005 2011 previous research on compliance with legislation has often been conducted in isolation with little research comparing compliance across a range of legislation and certainly not using triangulation methods to assess smes overall legal performance this study aimed to investigate the legal performance of uk smes with a range of environmental legislation this study identifies the level of compliance spirit and letter of the law with environmental legislation the impact and effectiveness of environmental legislation and ways of improving the environmental compliance control systems for smes the study incorporated a wide range of environmental legislation including that covering waste management transfer environmental permitting including waste exemptions site waste management plans weee rohs packaging oil storage as well as identifying other potential environmental offences detailed compliance audits were conducted with 44 smes from 5 different sectors from the north west of england interviews with sme management site staff regulators government policy officials and support organisations in total 99 individuals were interviewed key words compliance environment enforcement environmental legislation smes the study indicates low levels of compliance with the letter and spirit of the law knowledge and understanding of environmental legislation was poor no single sme regulator or support organisation appreciated environmental compliance as a whole enforcement activity and surveillance of the smes audited was very low this reflected nation enforcement figures the impact of environmental legislation on smes is overstated the impact increased commensurate with effort to comply and enforcement action there was evidence of direct and indirect environmental harm as a result of non compliance regulation can only be effective if it is complied with measuring the link between the legislation and environmental protection must be accompanied by a clear understanding of compliance levels this study produces an initial assessment methodology for smes compliance performance indicators and recommendations to improve sme compliance controls christopher d h wilson phd thesis university of southampton faculty of engineering and the environment

Theoretical Perspectives on Environmental Compliance 2018-07-16

this guidebook is the result of working with agencies in the water sector over the past several years although water and wastewater utilities are intimately familiar with the requirements to meet their missions whether delivering safe drinking water or treating wastewater and meeting discharge requirements they are often much less familiar with other environmental regulations such as those governing the management of hazardous waste furthermore most agencies do not have a person much less a department dedicated to ensuring environmental compliance therefore the need for a guidebook such as this became apparent and through the support of the american water works association awwa water utility council wuc and the water industry technical action fund witaf it became a reality additionally awwa s legal advisors reviewed the guidebook to ensure it accurately describes and references the regulatory requirements water is a vital resource that no one can live without assisting utilities in complying with environmental regulations to minimize their risk is critical to ensure that resources available for capital improvements and other projects will enable facilities to fulfill their mission
