The Resources of the Third World

2014-01-27

the cold war period witnessed competition from political economic ideological diplomatic military and social dimensions between the united states of america usa and the then union of soviet socialist republics ussr in the superpower rivalries india and africa were adversely affected in many ways the situation did not change for the better in the post cold war period which has witnessed the domination of the world by the us and its allies the group of eight g 8 industrialised countries this domination has been characterised by the process of americanization of the worlds otherwise termed globalisation in virtually all spheres of life usa india africa during and after the cold war demonstrates that both the united states and the soviet union used african states india and other third world countries for their own geopolitical considerations that the foreign policy and foreign relations of the us were meant to subject africa and india to the dictates of us imperialism the book assesses the impact of the cold war and the post cold war order on africa india and the entire world and argues that the non aligned movement is still relevant to the third world countries despite the demise of the cold war the book analyses issues from the african point of view as opposed to hitherto western view points but provides a balanced appreciation of the complex forces that shape foreign policies and foreign relations globally it is a valuable contribution to modern

diplomatic history and targets university students researchers foreign affairs ministries and practicing diplomats

Report to Congress of the U.S.-China Economic and Security Review Commission

2011

this book reports on a novel and comprehensive approach to the uptake of ict in schools it focuses on key questions pedagogically sound ways of introducing ict new technical artifacts supporting the approach the evaluation in a large scale validator and future work while many innovations in technology enhanced learning tel have emerged over the last two decades the uptake of these innovations has not always been very successful particularly in schools the transition from proof of concept to integration into learning activities has been recognized as a bottleneck for quite some time this major problem which is affecting many tel stakeholders is the focus of this book which focuses on developing a more effective and efficient approach based on more than 2500 pilots in european classrooms teachers head teachers and policy makers may benefit from reading how novel learning scenarios can be elaborated adapted to a local context and implemented in the classroom how new technologies can support this process for teachers and their national regional communities how teachers and other stakeholders can be educated in such a re engineering process how the approach can be scaled up through moocs ambassador schemes and train the trainer programs how future classroom labs can inspire teachers head teachers and policy makers how teachers and above all learners can become more engaged in learning through the adoption of the itec approach readers with a more technical focus may also be interested in the discussion of recommender systems the flexible provision of resources and services the deployment of the cloud in schools and systems for composing technological support for lesson plans
