ago chemistry learn the a base is a material that reacts with an

acid to produce just water and salt when an acid reacts with a

base it produces a salt bases are commonly found in household

cleansers that are used to remove oil from windows and floors as

well as soaps toothpaste egg whites dishwashing liquids and

household ammonia a substance is called base if its aqueous

solution tastes bitter turns red litmus blue or neutralizes acids salt

is a neutral substance whose aqueous solution does not affect

litmus according to faraday acids bases and salts are termed as

electrolytes when is a salt solution basic or acidic there are several

guiding principles that summarize the outcome salts that are from strong bases and strong acids do not hydrolyze infinity learn neet 3 23m subscribers 1 5m views 5 years ago chemistry more if we are given lemon juice in one container and soap solution in the other can you tell me the difference common properties of acids and bases importance of ph get 5 of 7 questions to level up more about salts nature of salts get 3 of 4 questions to level up more about salts water of crystallisation uses of chemicals get 3 of 4 questions to level up a base is a molecule or ion able to accept a hydrogen ion from an acid acidic substances are usually identified by their sour taste an acid is basically a molecule which can donate an h ion and can remain energetically favourable after a loss of h acids are known to turn blue litmus red beginning chemistry ball 12 acids and bases 12 5 strong and weak acids and bases and their salts page id anonymous libretexts learning objectives define a strong and a weak acid and base recognize an acid or a base as strong or weak determine if a salt produces an acidic or a basic solution 4 years ago perhaps they gain the characteristic of their dominant parent the acid or base whichever is stronger would decide the properties and character of the salt for example naoh hcl nacl h<sub>2</sub>o since both the acid and base are strong the salt produced would

be neutral strong base strong acid neutral salt
