this book makes hazardous or electrical area classification simple in plants processing flammable materials every effort is made to avoid the escape of such materials and in addition stringent measures are taken to exclude sources of ignition a complex array of standards surround this topic which has lead to an overly conservative approach being taken this type of approach means that much more expensive electrical apparatus than is necessary is installed to avoid this unnecessary expenditure dr groh clearly explains the relevant standards so that accurate assessment of the risks associated with hazardous areas is possible he also identifies possible ignition sources and methods of designing apparatus which do not cause sparks thereby maintaining safety covers must have information regarding iec cenelec standards in electrical or hazardous area classification provides a clear overview of a complex area
