The Sacred Isle 1999 the roman world was diverse and complex and so were religious understandings and practices as mirrored in the enormous variety presented by archaeological iconographic and epigraphic evidence conventional approaches principally focus on the political role of civic cults as a means of social cohesion often considered to be instrumentalized by elites but by doing so religious diversity is frequently overlooked marginalizing deviating cult activities that do not fit the classical canon as well as the multitude of funerary practices and other religious activities that were all part of everyday life in the roman empire a person s religious experiences were shaped by many and sometimes seemingly incompatible cult practices whereby the civic and imperial cults might have had the least impact of all our goal therefore is to rethink our methodologies aiming for a more dynamic image of religion that takes into account the varied and often contradictory choices and actions of individual which reflects the discrepant religious experiences in the roman world is it possible to poke into the mind of an individual in roman times whatever his her status and ethnicity and try to understand the individual s diverse experiences in such a complex interconnected empire exploring the choices that were open to an individual this also raises the question whether the concept of individuality is valid for roman times in some periods the impact of individual actions can be more momentous the very first adoption of roman style sculpture cult practices or latin theonyms for indigenous deities can set in motion long term processes that will significantly influence people s perceptions of local deities their characteristics and functions do individual choices and preferences prevail over collective identities in the roman empire compared to pre roman times to examine these questions this volume presents case studies that analyze individual actions in the religious sphere
