voltage controlled oscillator icl8083 datasheet html intersil corporation icl8083 product details the icl8038 waveform generator is a monolithic integrated circuit capable of producing high accuracy sine square triangular sawtooth and pulse waveforms with a minimum of external components the frequency or repetition rate can be selected externally from 0 001hz to more than 300khz using either resistors or capacitors and frequency introduction the 8038 is a function generator capable of producing sine square triangular sawtooth and pulse waveforms some at the same time since its introduction marketing and appli cation engineers have been manning the phones explaining the care and feeding of the 8038 to customers worldwide description intersil corporation icl8083 152kb 10p
