environmental health has established itself as the most succinct and  
comprehensive textbook on the subject this extensively revised and  
rewritten third edition continues this tradition by incorporating new  
developments and by adding timely coverage of topics such as  
environmental economics and terrorism as in previous volumes the  
new edition presents balanced assessments of environmental problems  
examining their local and global implications their short and long  
range impacts and their importance in both developed and less  
developed countries of the world the third edition also addresses  
emerging issues such as environmental justice deforestation the  
protection of endangered species multiple chemical sensitivity and the  
application of the threshold concept in evaluating the effects of toxic  
and radioactive materials whether discussing acid rain ozone depletion  
global warming or more traditional subjects such as the management
