london continues to fascinate a vast audience across the world and an extensive diverse literature now exists describing and analyzing this metropolis the central question what is london has produced many answers but none of them the author argues uncovers the complex ways in which knowledge is constructed in the diverse attempts to represent places and people on the contrary a gulf has opened up between analysis of contemporary london as a global postcolonial city on the one hand and historical accounts of the imperial capital on the other the author shows how

the gap can be bridged by combining an analysis of the representation over time by various experts of london and certain localities with an investigation of the ways in which residents have represented their communities through struggles over symbolic and material resources

london in the eighteenth century was a new city risen from the ashes of the great fire of 1666 that had destroyed half its homes and great public buildings the century that followed was an era of vigorous expansion and large scale projects of rapidly changing culture and commerce as huge numbers of people arrived in the shining city drawn by its immense wealth and power and its many diversions borrowing a phrase from daniel defoe jerry white calls london this great and monstrous thing the grandeur of its new buildings and the glitter of its high life shadowed by poverty and squalor a great and monstrous thing offers a street level view of the city its public gardens and prisons its banks and brothels its workshops and warehouses and its bustling jostling crowds white introduces us to shopkeepers and prostitutes men and women of fashion and genius street robbers and thief takers as they play out the astonishing drama of life in eighteenth century london what emerges is a picture of a society fractured by geography politics religion history and especially by class for the divide between rich and poor in london was never greater or more destructive in the modern era than in these years despite this gulf jerry white shows us londoners going about their business as bankers or beggars reveling in an enlarging world of public pleasures indulging in crimes both great and small amidst the tightening sinews of power and regulation and the hesitant beginnings of london democracy

this original study draws on the results of latest discoveries to describe london s roman origins it presents a wealth of new information from one of the world s most intensively studied archaeological sites introducing many original ideas concerning london s economic and political history the archaeological discoveries are used to build a narrative account that explains how recent investigations in london challenge our understanding of the ancient world the roman city was probably converted from a fort built on the north side of london bridge at the time of the roman conquest and is the place where the emperor claudius arrived en route to claim his victory in ad 43 it was rebuilt as the commanding site for rome s rule of britain a history of social architectural and economic development is reconstructed from precise tree ring dating and used to show that investment in the urban infrastructure was provoked by the needs of military campaigns and political strategies the story also shows how the city suffered violent destruction in resistance to roman rule and was brought to the verge of collapse by pandemics and political insecurity in the second and third centuries these events had a critical bearing on the reforms of late antiquity from which london emerged as a defended administrative enclave always a creature of the centralized roman administration and largely dependent on colonial immigration the city was subsequently deserted when rome failed to maintain political control this ground breaking study brings new information and arguments drawn from urban archaeology to our study of the way in which rome ruled and how empire failed publisher s description
