this book is as much about painting as it is about the digital world but beyond both it's really about visual intelligence what makes it a joy to read is the lovely match between faure walker's subject and his style of writing apparently artless just making itself up as it goes along but actually always with a witty spring and never slack matthew collings artist critic author and television host as a painter himself james faure walker opens up a provocative dialogue between painting and digital computing that is essential reading for all painters interested in new technologies irving sandler author critic and art historian faure walker has a distinguished background as both a painter and digital artist he is an early adopter of digital technology in this regard so has lived the history of the ever accelerating embrace of the digital on top of this he is a good storyteller and a clear writer who avoids the pitfalls of pretentious art world jargon lane hall digital artist and professor using a wide stream of fresh water as a metaphor faure walker depicts a flow of ideas concepts and solutions that result in digital art all the core elements of an art style in making are here ties with mainstream and traditional art stages of technological progress and reflections on the bright and varied personalities of digital artists with a personal approach faure walker presents vibrant exciting emotionally overpowering art works and describes them with empathy and imagination

this entertaining sensitive and observant book itself flows like a river anna ursyn digital artist and professor something like this book is overdue i am not aware of any comparable work lots of how to do but nothing raising so many interesting and critical questions hans dehlinger digital artist and professor here is the intimate narrative of a passionate yet skeptical explorer who unflinchingly records his artistic discoveries and personal reflections faure walker s decades of experience as a practicing painter art critic and educator shine through on every page the book is an essential resource for anyone interested in digital visual culture anne morgan spalter digital artist author and visual computing researcher this book is about art written from an artist s point of view it also is about computers written from the perspective of a painter who uses them painting the digital river is james faure walker s personal odyssey from the traditional art scene to fresh horizons from hand to digital painting and sometimes back again it is a literate and witty attempt to make sense of the introduction of computer tools into the creation of art to understand the issues and the fuss to appreciate the people involved and the work they produce to know the promise of the new media as well as the risks following his own winding path faure walker tells of learning to paint with the computer of misunderstandings across the art and science divide of software limitations of conversations between the mainstream and digital art worlds of emerging genres of digital painting of the medieval digital of a different role for drawing as a painter and computer enthusiast the author recognizes the marvels of digital paint as well as anyone but he also challenges the assumption that digital somehow means different the questions he raises matter to artists of every background style and disposition and the answers should reward anyone seeking insight into contemporary art

inside an art gallery it is easy to forget that the paintings there are the end products of a process involving not only creative inspiration but also plenty of physical and logistical details it is these cruder more mundane aspects of a painter s daily routine that motivated brooklyn artist joe fig to embark almost ten years ago on a highly unorthodox multilayered exploration of the working life of the professional artist determined to ground his research in the physical world fig began constructing a series of diorama like miniature reproductions of the studios of modern art s most legendary painters such as jackson pollock and willem de kooning a desire for firsthand references led fig to approach contemporary artists for access to their studios armed with a camera and a self made artist s

questionnaire fig began a journey through the workspaces of some of today's most exciting contemporary artists

critique has long been a central concept within art practice and theory since the emergence of conceptual art artists have been expected by critics curators and art school faculty to focus their work on exposing and debunking ideologies of power and domination recently however the effectiveness of cultural critique has come into question the appearance of concepts such as the speculative the reparative and the constructive suggests an emerging postcritical paradigm beyond critique takes stock of the current discourse around this issue with some calling for a renewed criticality and others rejecting the model entirely the book s contributors explore a variety of new and recently reclaimed criteria for contemporary art and its pedagogy some propose turning toward affect and affirmation others seek to reclaim such allegedly discredited concepts as intimacy tenderness and spirituality with contributions from artists critics curators and historians this book provides new ways of thinking about the historical role of critique while also exploring a wide range of alternative methods and aspirations beyond critique will be a crucial tool for students and instructors who are seeking to think and work beyond the critical
