this book is complementary cost accounting theory and practice all exercises at the end of each chapter are solved in this book readers are advised to refer to both books to develop mastery of the subject

Cost Accounting Problems and Solutions 1988

on account of the growing importance of the subject of cost accounting it has been included as a special subject in all commerce and management courses conducted by different indian universities and professional institutes the present volume cost accounting theory problems has been written to meet in full measure the requirements of the students preparing for these courses the entire books has been divided into five sections section one explains the fundamental concepts which are necessary for the understanding of the subject section two deals with the principles of costing as applicable to certain specific industries section three explains the accounting methods in this section besides others intricate topics of the cost control accounts and integrated accounts have been discussed with complete clarity and simplicity of exposition section four refers to costing as a special tool for managerial control adequate space has been given to this recent function of cost accounting and here topics of budgetary control standard costing marginal costing and break even analysis have been elaborately discussed section five contains revisionary problems

Rathnam's Cost and Management Accounting Problems and Solutions 1962

excerpt from problems in cost accounting the invention of machinery followed by the rise of the factory system has resulted in highly specialized forms of manufacturing so specialized is modern production that workmen carry on particular operations without knowing very much about further work necessary to produce the finished commodity these workmen are organized in departments which require specialists to direct them the relationship of every part to the whole is known fully only in the central office experience has shown that as soon as an establishment grows to such a size that the details of operation in the various departments go beyond the scope of a single individual's supervision some organization must be effected which will provide records to guide the management in the exercise of adequate direction and control in the manufacture of a commodity on the one hand and in the selling of it on the other of course the management is interested in fixing a price for the product so that its sale upon the market will secure the maximum net return great skill must be shown in judging the

market so as to fix a price which will be low enough to induce the greatest number of buyers and at the same time high enough to give the greatest net return to one unacquainted with business acumen in this direction would seem to be the prime asset of the successful manager however the manager is also concerned in keeping down costs in his relation to the market he is interested in maintaining good prices for his commodity but in his relation to the materials and services necessary to produce it he is also interested in keeping down costs it is clear that the first item of cost is the raw material which must be worked up into an article to be sold this material must be purchased as cheaply as possible and it should be utilized with such economy that little or none is wasted therefore the manager of a large concern must have some record of the materials used in producing goods to fill orders and the cost of those materials furthermore he must pay wages to his workmen who render personal services and there must be a system of records to keep him informed concerning the quality and the quantity of services used to produce his commodity about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
