focusing on early nineteenth century england and on the works and texts of the inventor of paper photography william henry fox talbot singular images failed copies historicizes the conceptualization of photography in that era as part of a major historical change treating photography not merely as a medium or a system of representation but also as an epistemology vered maimon challenges today s prevalent association of the early photograph with the camera obscura instead she points to material formal and conceptual differences between those two types of images by considering the philosophical and aesthetic premises linked with early photography through this analysis she argues that the emphasis in talbot s accounts on the removal of the artist s hand in favor of the pencil of nature did not mark a shift from manual to mechanical and more accurate or objective systems of representation in singular images failed copies maimon shows that the perception of the photographic image in the 1830s and 1840s was in fact symptomatic of a crisis in the epistemological framework that had informed philosophical scientific and aesthetic thought for two centuries

in scenes in a library carol armstrong explores the experimental moment at the inception of the new medium when the word came to haunt the photographic image and the forty or so years roughly from the 1840s to the 1880s during which the photographic image alternately resisted and became assimilated by the printed page

Singular Images, Failed Copies 2015-10-25

photography emerged in 1839 in two forms simultaneously in france louis daguerre produced photographs on silvered sheets of copper while in great britain william henry fox talbot put forward a method of capturing an image on ordinary writing paper treated with chemicals talbot s invention a paper negative from which any number of positive prints could be made became the progenitor of virtually all photography carried out before the digital age talbot named his perfected invention calotype a term based on the greek word for beauty calotypes were characterized by a capacity for subtle tonal distinctions massing of light and shadow and softness of detail in the 1840s amateur photographers in britain responded with enthusiasm to the challenges posed by the new medium their subjects were wide ranging including landscapes and nature studies architecture and portraits glass negative photography which appeared in 1851 was based on the same principles as the paper negative but yielded a sharper picture and quickly gained popularity despite the rise of glass negatives in commercial photography many gentlemen of

leisure and learning continued to use paper negatives into the 1850s and 1860s these amateurs did not seek the widespread distribution and international reputation pursued by their commercial counterparts nearly all of whom favored glass negatives as a result many of these calotype works were produced in a small number of prints for friends and fellow photographers or for a family album this richly illustrated landmark publication tells the first full history of the calotype embedding it in the context of britain s changing fortunes intricate class structure ever growing industrialization and the new spirit under queen victoria of the 118 early photographs presented here in meticulously printed plates many have never before been published or exhibited
