Translational research in severe COVID-19 and long-term symptoms post-COVID-19 2023-10-26

myalgic encephalomyelitis me and chronic fatigue syndrome cfs are serious debilitating conditions that affect millions of people in the united states and around the world me cfs can cause significant impairment and disability despite substantial efforts by researchers to better understand me cfs there is no known cause or effective treatment diagnosing the disease remains a challenge and patients often struggle with their illness for years before an identification is made some health care providers have been skeptical about the serious physiological rather than psychological nature of the illness once diagnosed patients often complain of receiving hostility from their health care provider as well as being subjected to treatment strategies that exacerbate their symptoms beyond myalgic encephalomyelitis chronic fatigue syndrome proposes new diagnostic clinical criteria for me cfs and a new term for the illness systemic exertion intolerance disease seid according to this report the term myalgic encephalomyelitis does not accurately describe this illness and the term chronic fatigue syndrome can result in trivialization and stigmatization for patients afflicted with this illness beyond myalgic encephalomyelitis chronic fatigue syndrome stresses that seid is a medical not a psychiatric or psychological illness this report lists the major symptoms of seid and recommends a diagnostic process one of the report s most important conclusions is that a thorough history physical examination and targeted work up are necessary and often sufficient for diagnosis the new criteria will allow a large percentage of undiagnosed patients to receive an accurate diagnosis and appropriate care beyond myalgic encephalomyelitis chronic fatigue syndrome will be a valuable resource to promote the prompt diagnosis of patients with this complex multisystem and often devastating disorder enhance public understanding and provide a firm foundation for future improvements in diagnosis and treatment

Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome 2015-03-16

the management of patients who present with a myocardial i nfarcti on has altered radi ca lly over the past two decades the expansion of knowledge relating to the epidemiology of the condition together with a greater understanding of the causes of the early mortality from it have resulted in major changes in the way these pati ents are treated duri ng the acute phase of the illness the deve l opment of dedi cated coronary care units in hospitals and the recogni ti on of the need for mobile coronary care units in the collu1lunity have made a major impact upon the early mortality from myocardial infarction over the past decade a great deal of attention has been paid to strategies designed to limit the size of a myocardial infarct as an extensi on of thi s approach the 1980 s have seen the evo l uti on of techniques for revascularization of ischemic tissue all these procedures while appearing to hold the promise of reducing the acute mortality from myocardial infarction create the need for a planned approach to the long term management of these patients while there are some modest i ndi cati ons that coronary atheroscl ero si s coul d be arrested or even reversed for all practical purposes it remains a chroni c progressi ve di sease

Long-Term Management of Patients After Myocardial Infarction 2012-12-06

this evidence rich collection takes on the broad diversity of traumatic stress in both its causes and outcomes as well as the wide variety of resources available for recovery its accessible coverage shows varied presentations of post traumatic stress affected by individual family and group contexts including age previous trauma

exposure and presence or lack of social resources as well as long term psychological physical and social consequences contributors focus on a range of traumatic experiences from environmental disasters wildfires hurricane katrina to the holocaust from ambiguous loss to war captivity and the book s final section healing after trauma spotlights resilience forgiveness religion and spirituality using concepts from positive psychology included among the topics the great east japan earthquake tsunami and nuclear disaster posttraumatic stress in the aftermath of mass shootings psychosocial consequences appraisal adaptation and bereavement after trauma loss chaos survival and despair the storm after the storms aging with trauma across the lifetime and experiencing trauma in old age on bereavement and grief a therapeutic approach to healing psychologists social workers researchers studying trauma and resilience and mental health professionals across disciplines will welcome traumatic stress and long term recovery as a profound source of insight into stress and loss coping and healing

Traumatic Stress and Long-Term Recovery

this open access edited volume is a comparative effort to discern the short term educational impact of the covid 19 pandemic on students teachers and systems in brazil chile finland japan mexico norway portugal russia singapore spain south africa the united kingdom and the united states one of the first academic comparative studies of the educational impact of the pandemic the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning especially for disadvantaged students other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education for students as well as for teachers and school staff these included the economic shocks experienced by families in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus and by the constraints on learning resulting from students having to learn at home where the demands of schoolwork had to be negotiated with other family necessities often sharing limited space furthermore the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives created a traumatic context for many that undermined the necessary focus and dedication to schoolwork these individual effects were reinforced by community effects particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive this is an open access book

Pandemic Influenza Preparedness and Response

2009

in the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas

currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity sports related concussions in youth improving the science changing the culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents this report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence sports related concussions in youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms the culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded according to sports related concussions in youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes the findings and recommendations in this report set a direction for research to reach this goal

Sports-Related Concussions in Youth 2014-02-04

this book reconsiders the power of the idea of the future bringing together perspectives from cultural history environmental history political history and the history of science it investigates how the future became a specific field of action in liberal democratic state socialist and post colonial regimes after the second world war it highlights the emergence of new forms of predictive scientific expertise in this period and shows how such forms of expertise interacted with political systems of the cold war world order as the future became the prism for dealing with post industrialisation technoscientific progress changing social values cold war tensions and an emerging third world a forgotten problem of cultural history the future re emerges in this volume as a fundamentally contested field in which forms of control and central forms of resistance met as different actors set out to colonise and control and others to liberate the individual studies of this book show how the west european african romanian and czechoslovak long term was constructed through forms of expertise computer simulations and models and they reveal how such constructions both opened up new realities but also imposed limits on possible futures

The Struggle for the Long-Term in Transnational Science and Politics 2015-04-10

this book is open access under a cc by 4 0 license this textbook endorsed by the european society for blood and marrow transplantation ebmt provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing from basic principles to advanced concepts it takes the reader on a journey through the history of transplant nursing including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience

as well as a comprehensive introduction to research and auditing methods this new volume specifically intended for nurses complements the esh ebmt reference title a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right this title is designed to develop the knowledge of nurses in transplantation it is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area this volume presents information that is essential for the education of nurses new to transplantation while also offering a valuable resource for more experienced nurses who wish to update their knowledge

the essential work in travel medicine now completely updated for 2018 as unprecedented numbers of travelers cross international borders each day the need for up to date practical information about the health challenges posed by travel has never been greater for both international travelers and the health professionals who care for them the cdc yellow book 2018 health information for international travel is the definitive guide to staying safe and healthy anywhere in the world the fully revised and updated 2018 edition codifies the u s government s most current health guidelines and information for international travelers including pretravel vaccine recommendations destination specific health advice and easy to reference maps tables and charts the 2018 yellow book also addresses the needs of specific types of travelers with dedicated sections on precautions for pregnant travelers immunocompromised travelers and travelers with disabilities special considerations for newly arrived adoptees immigrants and refugees practical tips for last minute or resource limited travelers advice for air crews humanitarian workers missionaries and others who provide care and support overseas authored by a team of the world s most esteemed travel medicine experts the yellow book is an essential resource for travelers and the clinicians overseeing their care at home and abroad

CDC Yellow Book 2018: Health Information for International Travel 2017-04-17

the book examines the impact of covid 19 on economic and political processes contending that the global reaction to the pandemic has been the largest failure in scientific policy in a generation unlike earlier crises it has impacted the world s leading economies while also paralyzing international ties provoking diverse and far reaching reactions the authors posit that no effective global response has been launched in response to this global catastrophe rather governments have implemented a variety of policies based on the costs of virus protection against financial closure and isolation in doing so there has been a resurgence in nationalism this book aims to provide comprehensive understanding of how the pandemic has widened political gaps and demarcates what the long term consequences might be in terms of policies and economics in the wake of the pandemic of interest to scholars in political geography development studies international relations public administration and health science this book presents key observations on existing theories of global politics pivoted around the covid 19 pandemic and its ramifications on individuals

groups and ultimately the nation state

The Post-Pandemic World and Global Politics **2022-05-06**

this work includes a foreword by lynne maher head of innovation practice nhs institute for innovation and improvement university of warwick coventry experience based design ebd is a new way of bringing about improvements in healthcare services by being user focussed facilities healthcare professionals carers family and friends are all involved in the patient experience and systems and policies need to adapt to take this into consideration by exploring the underlying concepts methods and practices of ebd this exciting guide offers a unique approach to healthcare customer satisfaction it offers recommendations for the future and many interesting points for discussion it will be of great interest to health and social care management particularly directors of service improvement in hospitals and directors of nursing health and social care policy makers and shapers and quality improvement and organisational development specialists in healthcare patient groups and national organisations too will find the book inspirational experience based design you cannot do without it read this book and it will change the way you think about providing health services for ever lynne maher

Bringing User Experience to Healthcare Improvement **2023-01-06**

among the issues confronting america is long term care for frail older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves improving the quality of long term care takes a comprehensive look at the quality of care and quality of life in long term care including nursing homes home health agencies residential care facilities family members and a variety of others this book describes the current state of long term care identifying problem areas and offering recommendations for federal and state policymakers who uses long term care how have the characteristics of this population changed over time what paths do people follow in long term care the committee provides the latest information on these and other key questions this book explores strengths and limitations of available data and research literature especially for settings other than nursing homes on methods to measure oversee and improve the quality of long term care the committee makes recommendations on setting and enforcing standards of care strengthening the caregiving workforce reimbursement issues and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care

Cardioimmunology: Inflammation and Immunity in Cardiovascular Disease **2020-01-30**

the covid 19 pandemic hit countries development agendas hard the ensuing recession has pushed millions into extreme poverty and has shrunk government resources available for spending on achieving the united nations sustainable development goals sdgs this staff discussion note assesses the current state of play on funding sdgs in five key development areas education health roads electricity and water and sanitation using a newly developed dynamic macroeconomic framework

Improving the Quality of Long-Term Care

2001-02-27

charts are best viewed on a tablet picking up where liar s poker left off literally in the bond dealer s desks of salomon brothers the story of long term capital management is of a group of elite investors who believed they could beat the market and like alchemists create limitless wealth for themselves and their partners

A Post-Pandemic Assessment of the Sustainable Development Goals 2021-04-27

reimagining our global economy so it becomes more sustainable and prosperous for all our global economic system is broken but we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet first we must eliminate rising income inequality within societies where productivity and wage growth has slowed second we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains and finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end the debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open stakeholder capitalism a global economy that works for progress people and planet argues convincingly that if we don t start with recognizing the true shape of our problems our current system will continue to fail us to help us see our challenges more clearly schwab the founder and executive chairman of the world economic forum looks for the real causes of our system s shortcomings and for solutions in best practices from around the world in places as diverse as china denmark ethiopia germany indonesia new zealand and singapore and in doing so schwab finds emerging examples of new ways of doing things that provide grounds for hope including individual agency how countries and policies can make a difference against large external forces a clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes planning for future generations short sighted presentism harms our shared future and that of those yet to be born better measures of economic success move beyond a myopic focus on gdp to more complete human scaled measures of societal flourishing by accurately describing our real situation stakeholder capitalism is able to pinpoint achievable ways to deal with our problems chapter by chapter professor schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

When Genius Failed: The Rise and Fall of Long Term Capital Management 2014-01-30

the covid 19 pandemic struck the global economy after a decade that featured a broad based slowdown in productivity growth global productivity trends drivers and policies presents the first comprehensive analysis of the evolution and drivers of productivity growth examines the effects of covid 19 on productivity and discusses a wide range of policies needed to rekindle productivity growth the book also provides a far reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies and it introduces a new sectoral database of productivity the world bank has created an extraordinary book on productivity covering a large group of countries and using a wide variety of data sources there is an emphasis on emerging and developing economies whereas the prior literature has concentrated on developed economies the book seeks to

understand growth patterns and quantify the role of among other things the reallocation of factors technological change and the impact of natural disasters including the covid 19 pandemic this book is must reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity martin neil baily senior fellow the brookings institution former chair u s president s council of economic advisers this is an important book at a critical time as the book notes global productivity growth had already been slowing prior to the covid 19 pandemic and collapses with the pandemic if we want an effective recovery we have to understand what was driving these long run trends the book presents a novel global approach to examining the levels growth rates and drivers of productivity growth for anyone wanting to understand or influence productivity growth this is an essential read nicholas bloom william d eberle professor of economics stanford university the covid 19 pandemic hit a global economy that was already struggling with an adverse pre existing condition slow productivity growth this extraordinarily valuable and timely book brings considerable new evidence that shows the broad based long standing nature of the slowdown it is comprehensive with an exceptional focus on emerging market and developing economies importantly it shows how severe disasters of which covid 19 is just the latest typically harm productivity there are no silver bullets but the book suggests sensible strategies to improve growth prospects john fernald schroders chaired professor of european competitiveness and reform and professor of economics in sead

Post Office Long-term Leasing 1967

this book addresses current issues surrounding hospital readmissions and the practice of post acute and long term care ltc thoroughly updated the second edition of this practical pocket guide presents new regulations governing these services and lessens the uncertainty involved in caring for patients in a long term care facility the book is divided into four sections that cover types of care which include community care nursing facility care and teamwork clinical medicine with suggested approaches to common conditions and wound care psychosocial aspects of care which include ethical and legal issues and caring for families and special issues with chapters on documentation coding and medication management as community based care is an area of rapid growth where the elderly are increasingly seeking their medical care new chapters have also been added that describe these programs written by expert contributors many of whom have worked within the american medical directors association to create and disseminate a knowledge base for post acute and ltc this is a valuable resource for clinicians and educators seeking to maximize the care and living experience of residents in post acute and long term care settings

Why Startups Fail 2021-03-30

the factor that makes some communities rebound quickly from disasters while others fall apart a fascinating book on an important topic e l hirsch in choice each year natural disasters threaten the strength and stability of communities worldwide yet responses to the challenges of recovery vary greatly and in ways that aren t explained by the magnitude of the catastrophe or the amount of aid provided by national governments or the international community the difference between resilience and disrepair as daniel p aldrich shows lies in the depth of communities social capital building resilience highlights the critical role of social capital in the ability of a community to withstand disaster and rebuild both the infrastructure and the ties that are at the foundation of any community aldrich examines the post disaster responses of four distinct communities tokyo following the 1923 earthquake kobe after the 1995 earthquake tamil nadu after the 2004 indian ocean tsunami and new orleans post katrina and finds that those with robust social networks were better able to coordinate recovery in addition to quickly disseminating information and financial and physical assistance communities with an abundance of social capital were able to minimize the migration of people and valuable resources out of the area with governments increasingly overstretched and natural disasters likely to increase in frequency and intensity a thorough understanding of what contributes to efficient reconstruction is more important than ever building resilience underscores a critical component of an effective response

***Post-Acute and Long-Term Care Medicine* 2023-07-12**

there are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep first the use of scales facilitates a quick and accurate assessment of a complex clinical problem in three or four minutes the time to review ten standard scales a clinician can come to a broad understanding of

the patient in question for example a selection of scales might indicate that an individual is sleepy but not fatigued lacking alertness with no insomnia presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea exhibiting depression and a history of significant alcohol problems this information can be used to direct the consultation to those issues perceived as most relevant and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue second rating scales can provide a clinician with an enhanced vocabulary or language improving his or her understanding of each patient in the case of the sleep specialist a scale can help him to distinguish fatigue from sleepiness in a patient or elucidate the differences between sleepiness and alertness which is not merely the inverse of the former sleep scales are developed by researchers and clinicians who have spent years in their field carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition thus scales provide clinicians with a repertoire of questions allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems third some scales are helpful for tracking a patient's progress a particular patient may not remember how alert he felt on a series of different stimulant medications scale assessments administered periodically over the course of treatment provide an objective record of the intervention allowing the clinician to examine and possibly reassess her approach to the patient finally for individuals conducting a double blind crossover trial or a straightforward clinical practice audit those who are interested in research will find that their own clinics become a source of great discovery scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices they enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid as the emphasis placed on evidence based care grows a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable scales make this kind of standardization possible just as they enable the research efforts that help to formulate those standards the majority of rating scales in sleep and sleep disorders 100 scales for clinical practice is devoted to briefly discussing individual scales when possible an example of the scale is provided so that readers may gain a sense of the instrument's content groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine rating scales in sleep and sleep disorders 100 scales for clinical practice is an invaluable resource for all clinicians and researchers interested in sleep disorders

from the origin of the leak to the amount of oil released into the environment to the spill s duration the 2010 gulf of mexico oil spill poses unique challenges to human

health the risks associated with extensive prolonged use of dispersants with oil fumes and with particulate matter from controlled burns are also uncertain there have been concerns about the extent to which hazards such as physical and chemical exposures and social and economic disruptions will impact the overall health of people who live and work near the area of the oil spill although studies of previous oil spills provide some basis for identifying and mitigating the human health effects of these exposures the existing data are insufficient to fully understand and predict the overall impact of hazards from the deepwater horizon oil spill on the health of workers volunteers residents visitors and special populations assessing the effects of the gulf of mexico oil spill on human health identifies populations at increased risks for adverse health effects and explores effective communication strategies to convey health information to these at risk populations the book also discusses the need for appropriate surveillance systems to monitor the spill s potential short and long term health effects on affected communities and individuals assessing the effects of the gulf of mexico oil spill on human health is a useful resource that can help policy makers public health officials academics community advocates scientists and members of the public collaborate to create a monitoring and surveillance system that results in actionable information and that identifies emerging health risks in specific populations

STOP, THAT and One Hundred Other Sleep Scales 2012-01-06

as the culminating volume in the dcp3 series volume 9 will provide an overview of dcp3 findings and methods a summary of messages and substantive lessons to be taken from dcp3 and a further discussion of cross cutting and synthesizing topics across the first eight volumes the introductory chapters 1 3 in this volume take as their starting point the elements of the essential packages presented in the overview chapters of each volume first the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low income setting in order to propose a highest priority essential package second the chapter on packages of care and delivery platforms for universal health coverage uhc includes health sector interventions primarily clinical and public health services and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria provides cost estimates and describes a pathway to uhc

The Fourth Industrial Revolution 2017-01-03

the very high and selective mortality had a major impact on the population structure of cambodia fertility and marriage rates were very low under the khmer rouge but rebounded immediately after the regime s collapse because of the shortage of eligible males the age and education differences between partners tended to decline the period had a lasting impact on the educational attainment of the population the education system collapsed during the period so individuals especially males who were of schooling age during this interval had a lower educational attainment than the preceding and subsequent birth cohorts abstract

***CDC Yellow Book 2020* 2019-06-11**

what really sets the best managers above the rest it s their power to build a cadre of employees who have great inner work lives consistently positive emotions strong motivation and favorable perceptions of the organization their work and their colleagues the worst managers undermine inner work life often unwittingly as teresa amabile and steven kramer explain in the progress principle seemingly mundane workday events can make or break employees inner work lives but it s forward momentum in meaningful work progress that creates the best inner work lives

through rigorous analysis of nearly 12 000 diary entries provided by 238 employees in 7 companies the authors explain how managers can foster progress and enhance inner work life every day the book shows how to remove obstacles to progress including meaningless tasks and toxic relationships it also explains how to activate two forces that enable progress 1 catalysts events that directly facilitate project work such as clear goals and autonomy and 2 nourishers interpersonal events that uplift workers including encouragement and demonstrations of respect and collegiality brimming with honest examples from the companies studied the progress principle equips aspiring and seasoned leaders alike with the insights they need to maximize their people s performance

The Last Lecture 2008-04-08

for survivors of physical and emotional violence advice from professionals on how to reduce the far reaching effects of post traumatic stress
