this book explores at a time when several powers have become serious players on the continent

aspects of african agency past and present by african writers on foreign policy representative of geography language and state size in the past african foreign policy has largely been considered within the context of reactions to the international or global external factor this groundbreaking book however looks at how foreign policy has been crafted and used in response not just to external but also mainly domestic imperatives or theoretical signifiers as such it narrates individual and changing foreign policy orientations over time and as far back as independence with mainly african based scholars who present their own constructs of what is a useful theoretical narrative regarding foreign policy on the continent how theory is adapted to local circumstance or substituted for continentally based ontologies the book therefore contends that the african experience carries valuable import for expanding general understandings of foreign policy in general this book will be of key interest to scholars and students of foreign policy analysis foreign policy studies african international relations politics studies diplomacy and more broadly to international relations

How the French Think

2015-06-25

sudhir hazareesingh s how the french think is a warm yet incisive exploration of the french intellectual tradition and its exceptional place in a nation s identity and lifestyle why are the french an exceptional nation why do they think they are so exceptional an important reason is that in france intellectual activity is regarded not just as the preserve of the thinking elite but for almost everyone french thought can sometimes be austere and often opaque yet it is undeniably bold and innovative

and driven by a relentless quest for the regeneration of humanity sudhir hazareesingh traces its tumultuous history in an enormously enjoyable and highly original manner showing how the french ways of thought and life connect this will be one of the most revealing books written about them or any other european country for years sudhir hazareesingh was born in mauritius he is a fellow of the british academy and has been a fellow and tutor in politics at balliol college oxford since 1990 among his books are the legend of napoleon granta 2004 and le mythe gaullien gallimard 2010 he won the prix du memorial d ajaccio and the prix de la fondation napoleon for the first of these and a prix d histoire du senat for the second

this 2019 article iv consultation discusses that the french government revamped vocational training and professional development to foster labor market participation especially for low skilled workers following key labor tax and labor code reforms enacted in its first year in office in prioritizing the recommended reforms the report highlights that the importance of carefully assessing the trade offs and the proper sequencing of structural reforms and fiscal consolidation the government s structural reform agenda is being put in place and growth is expected to gradually return to its potential level over the medium run however risks have risen related to a disorderly brexit trade tensions and a softening of activity in the euro area but also to a slowdown in the domestic reform momentum building on the ongoing government reform agenda policies should aim at addressing france s

structural challenges high public debt and spending rising private sector indebtedness high unemployment inequality of opportunity and sluggish productivity

Parliamentary Representation in France

2017-07-05

despite real improvements since the beginning of the last decade legislative studies are still underdeveloped in france compared to other modern democracies this weakness is linked to the characteristics of the political system itself the constitution of 1958 has created a semi presidential regime the centrality of which has been constantly reinforced since the french parliament is thus supposed to be extremely feeble this lack of interest for legislative studies is also to be found in the specificities of french political sociology which pays little attention to institutions as a result very few papers and books deal with french chambers and mps yet they are fascinating cases of study for scholars interested in parliamentary representation professionalization of political life and french politics the french parliament and mps are deeply paradoxical mps are very attached to the concept of national sovereignty but remain involved at local level and in surgery work the french national assembly is supposed to be weak but is quite active and influential citizens are more aware of the role of mps than it seems and their views and values are closer than predicted this book gathers seven papers from the legipar research project 2008 2012 the project was designed by the contributors to rejuvenate french legislative studies by collecting systematic data on mps socio biographical profiles and activities conducting face to face interviews gathering exhaustive data on national assembly

activity and organising focus groups to analyse citizens perceptions of their mps this book was originally published as a special issue of the journal of legislative studies

until the mid 20th century france saw itself as a great power with universalist aspirations and global ambitions but the second world war and decolonisation irrevocably changed france s place in the world despite attempts to restore the country s grandeur in the 1960s the french have been forced to reconcile themselves to their modest place at the heart of a changing europe what impact has this had on political life how have the french reimagined the revolutionary republican and reactionary

ideologies that have been so crucial to their history how has the arrival of hundreds of thousands of postcolonial migrants transformed politics these are just some of the questions at the heart of france since the 1970s with contributions from leading specialists on topics as varied as the legacy of empire and neo liberalism it explores how the french have dealt with the pervasive sense of uncertainty that has become a defining feature of contemporary european politics

this book explores the imf s role within the politics of austerity by providing a path breaking comprehensive analysis of how the imf approach to fiscal policy has evolved since 2008 and how the imf worked to alter advanced economy policy responses to the global financial crisis gfc and the eurozone crisis it updates and refines our understanding of how the imf seeks to wield ideational power by analysing the fund s post crash their ability to influence what constitutes legitimate knowledge and their ability fix meanings attached to economic policies within the social process of

constructing economic orthodoxy this book is interested in the politics of economic ideas focused on the assumptive foundations of different approaches to economic policy and how the interpretive framework through which authoritative voices evaluate economic policy is an important site of power in world politics after establishing the internal conditions of possibility for new fiscal policy thinking to emerge and prevail detailed case studies of imf interactions with the uk and french governments during the great recession drill down into how fund seeks to shape the policy possibilities of advanced economy policy makers and account for the scope and limits of fund influence the fund s reputation as a technocratic scientific source of economic policy wisdom is important to for its intellectual authority yet as this book demonstrates the fund makes normatively driven interventions in ideologically charged economic policy debates the analysis reveals the malleability of conventional wisdoms about economic policy and the processes of their social construction

english summary the cover up of child sexual abuse by the catholic church has been occurring under the pontificate of six popes since 1922 for 1500 years the catholic church accepted that clergy who sexually abused children deserved to be stripped of their status as priests and then imprisoned a series of papal and council decrees from the twelfth century required such priests to be dismissed

from the priesthood and then handed over to the civil authorities for further punishment that all changed in 1922 when pope pius xi issued his decree *crimen sollicitationis* that created a de facto privilege of clergy by imposing the secret of the holy office on all information obtained through the church's canonical investigations if the state did not know about these crimes then there would be no state trials and the matter could be treated as a purely canonical crime to be dealt with in secret in the church courts pope pius xii continued the decree pope john xxiii reissued it in 1962 pope paul vi in 1974 extended the reach of pontifical secrecy to the allegation itself pope john paul ii confirmed the application of pontifical secrecy in 2001 and in 2010 benedict xvi even extended it to allegations about priests sexually abusing intellectually disabled adults in 2010 pope benedict gave a dispensation to pontifical secrecy to allow reporting to the police where the local civil law required it that is just enough to keep bishops out of jail most countries in the world do not have any such reporting laws for the vast majority of complaints about the sexual abuse of children pontifical secrecy the cornerstone of the cover up continues the effect on the lives of children by the imposition of the church's top secret classification on clergy sex abuse allegations may not have been so bad if canon law had a decent disciplinary system to dismiss these priests the 1983 code of canon law imposed a five year limitation period which virtually ensured there would be no canonical trials it required bishops to try to reform these priests before putting them on trial when they were on trial the priest could plead the vatican catch 22 defence he should not be dismissed because he couldn't control himself the church claims that all of this has changed very little has changed it has fiddled around the edges of pontifical secrecy and the disciplinary canons the church has been moonwalking

why europe intervenes in africa analyses the underlying causes of all european decisions for and against military interventions in conflicts in african states since the late 1980s it focuses on the main european actors who have deployed troops in africa france the united kingdom and the european union when conflict occurs in africa the response of european actors is generally inaction this can be explained in several ways the absence of strategic and economic interests the unwillingness of european leaders to become involved in conflicts in former colonies of other european states and sometimes the eurocentric assumption that conflict in africa is a normal event which does not require intervention when european actors do decide to intervene it is primarily for motives of security and prestige and not primarily for economic or humanitarian reasons the weight of past relations with africa can also be a driver for european military intervention but the impact of that past is changing

this book offers a theory of european intervention based mainly on realist and post colonial approaches it refutes the assumptions of liberals and constructivists who posit that states and organisations intervene primarily in order to respect the principle of the responsibility to protect

the growing influence of russia on the western far right has been much discussed in the media recently this book is the first detailed inquiry into what has been a neglected but critically important trend the growing links between russian actors and western far right activists publicists ideologues and politicians the author uses a range of sources including interviews video footage leaked communications official statements and press coverage in order to discuss both historical and contemporary russia in terms of its relationship with the western far right initial contacts between russian political actors and western far right activists were established in the early 1990s but these contacts were low profile as moscow has become more anti western these contacts have become more intense and have operated at a higher level the book shows that the russian establishment was first interested in using the western far right to legitimise moscow s politics and actions both

domestically and internationally but more recently moscow has begun to support particular far right political forces to gain leverage on european politics and undermine the liberal democratic consensus in the west contributing to ongoing scholarly debates about russia s role in the world its strategies aimed at securing legitimization of putin s regime both internationally and domestically modern information warfare and propaganda far right politics and activism in the west this book draws on theories and methods from history political science area studies and media studies and will be of interest to students scholars activists and practitioners in these areas

this book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the paris agreement focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation while most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries us and australia in particular this book also considers specific countries in asia africa and latin america with little or no climate change litigation it explores the reasons for the lack of litigation and discusses

what measures should or could be taken to change this situation and push forward climate action unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation it appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation

ensuring an adequate long term energy supply is a paramount concern in europe eu member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources these capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider european regulatory debate european electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only

distorts its national market but may have unforeseeable consequences for neighbouring electricity markets if these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the european internal electricity market at risk this book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals it will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition
