*Be the Solution* 2009-03-16 the top 10 sunday times bestseller shortlisted for the ft business book of the year award 2019 easily the most important book to be published this century i find it hard to take any young activist seriously who hasn't at least familiarised themselves with zuboff's central ideas zadie smith the guardian the challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us the heady optimism of the internet's early days is gone technologies that were meant to liberate us have deepened inequality and stoked divisions tech companies gather our information online and sell it to the highest bidder whether government or retailer profits now depend not only on predicting our behaviour but modifying it too how will this fusion of capitalism and the digital shape our values and define

our future shoshana zuboff shows that we are at a crossroads we still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits the age of surveillance capitalism is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight as it explores this new capitalism's impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves

**The Age of Surveillance Capitalism** 2019-01-31 the relationship between race and capitalism is one of the most enduring and controversial historical debates the concept of racial capitalism offers a way out of this impasse racial capitalism is not simply a permutation phase or stage in the larger history of capitalism since the beginning of the atlantic slave trade and the colonization of the americas capitalism in both material and ideological senses has been racial deriving social and economic value from racial classification and stratification although cedric j robinson popularized the term racial capitalism has remained undertheorized for nearly four decades histories of racial capitalism brings together for the first time distinguished and rising scholars to consider the utility of the concept across historical settings these scholars offer dynamic accounts of the relationship between social relations of exploitation and the racial terms through which they were organized justified and contested deploying an eclectic array of methods their works range from indigenous mortgage foreclosures to the legacies of atlantic world maroons from imperial expansion in the continental united states and beyond to the racial politics of municipal debt in the new south from the ethical complexities of latinx banking to the postcolonial dilemmas of extraction in the caribbean throughout the contributors consider and challenge how some claims about the history and nature of capitalism are universalized while others remain marginalized by theorizing and testing the concept of racial capitalism in different historical circumstances this book shows its analytical and political power for today's scholars and activists

**Histories of Racial Capitalism** 2021-02-09 this book explores the new terrain of network capitalism through the transformations of the discourse on technology rather than viewing such discourse as either a true or false reflection of reality fisher evaluates the ideological role that technology discourse plays in the legitimation of a new form of capitalism based on an extensive empirical analysis the book argues that contemporary technology discourse at one and the same time promises more personal empowerment through network technology and legitimates a more privatized flexible and precarious economic constellations such discourse signals a new tradeoff in the political culture of capitalism from a legitimation discourse which emphasizes the capacity of technology and technique to bring about social emancipation through equality stability and security to a legitimation discourse which focuses on the capacity of technology to bring about individual emancipation through individual empowerment authenticity creativity and cooperation contrary to the prevailing assumption that sees network technology as liberating from the rigidity and pitfalls of a stifling fordist capitalism the book offers a theoretical framework which sees contemporary technology discourse as an ideology that legitimates the economic social and political arrangements of the new capitalism

*The Healing Organization* 2019-09-17 early in the twenty first century a quiet revolution occurred for the first time the major developed economies began to invest more in intangible assets like design branding and software than in tangible assets like machinery buildings and computers for all sorts of businesses the ability to deploy assets that one can neither see nor touch is increasingly the main source of long term success but this is not just a familiar story of the so called new economy capitalism without capital shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade including the growth in economic inequality and the stagnation of productivity jonathan haskel and stian westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles capitalism without capital concludes by outlining how managers investors and policymakers can exploit the characteristics of an intangible age to grow their businesses portfolios and economies
