The Great Switcheroo (A Roald Dahl Short Story) 2012-09-13

this guideline provides updated global evidence informed recommendations on the intake of free sugars to reduce the risk of ncds in adults and children with a particular focus on the prevention and control of unhealthy weight gain and dental caries the recommendations in this guideline can be used by policy makers and programme managers to assess

current intake levels of free sugars in their countries relative to a benchmark they can also be used to develop measures to decrease intake of free sugars where necessary through a range of public health interventions examples of such interventions and measures that are already being implemented by countries include food and nutrition labelling consumer education regulation of marketing of food and non alcoholic beverages that are high in free sugars and fiscal policies targeting foods and beverages that are high in free sugars this guideline should be used in conjunction with other nutrient guidelines and dietary goals in particular those related to fats and fatty acids including saturated fatty acids and trans fatty acids to guide development of effective public health nutrition policies and programmes to promote a healthy diet
