Publication Manual of the American Psychological Association *2019-10*

the publication manual of the american psychological association is the style manual of choice for writers editors students and educators in the social and behavioral sciences nursing education business and related disciplines

International Environmental Law, Policy, and Ethics *2014-08-21*

this second edition of international environmental law policy and ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena this question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends however in his innovative study of international environmental ethics alexander gillespie explodes this myth he shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices this book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 world summit on sustainable development and the 2012 rio 20 united nations conference on sustainable development furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste the cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas the book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the great apes initiative and similar work with whales have failed finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy

MHRA Style Guide *2008*

now in its second edition the mhra style guide is an indispensable tool for authors and editors of scholarly books contributors to academic publications and students preparing theses the style guide succeeds the best selling mhra style book five editions of which were published from 1971 to 1996 though originally designed for use in connection with the publications of the modern humanities research association the style book became a standard book of reference particularly in the humanities and has been adopted by many other authors editors and publishers this new edition of the style guide has been revised and updated by a subcommittee of the mhra it provides comprehensive guidance on the preparation of copy for publication and gives clear and concise advice on such matters as spelling including the spelling of proper names and the transliteration of slavonic names abbreviations punctuation the use of capitals and italics dates and numbers quotations notes and references chapters on indexing the preparation of theses and dissertations and proof correcting are also included
