The Profession of English in the Two-year College

in the middle of the eighteenth century english literature composition and rhetoric were introduced almost simultaneously into colleges throughout the british cultural provinces professorships of rhetoric and belles lettres were established just as print was reaching a growing reading public and efforts were being made to standardize educated taste and usage the provinces saw english studies as a means to upward social mobility through cultural assimilation in the educational centers of england however the introduction of english represented a literacy crisis brought on by provincial institutions that had failed to maintain classical texts and learned languages today as rhetoric and composition have become reestablished in the humanities in american colleges english studies are being broadly transformed by cultural studies community literacies and political controversies once again english departments that are primarily departments of literature see these basic writing courses as a sign of a literacy crisis that is undermining the classics of literature the formation of college english reexamines the civic concerns of rhetoric and the politics that have shaped and continue to shape college english

it is scarcely possible to imagine a truly educated person who cannot read well yet it is not clear how or even if courses in literature actually work how can teachers of english help students in their developmental journey toward becoming skillful readers and educated persons this is the complex question that chambers and gregory address in teaching and learning english literature the authors consider practical matters such as course design and student assessment but do not shirk larger historical and theoretical issues in a lucid and non polemical fashion and occasionally with welcome humor chambers and gregory describe the what why and how of doing literature often demonstrating the techniques they advocate veteran teachers will find the book rejuvenating a stimulus to examining purposes and methods beginning teachers may well find it indispensable professor william monroe university of houston the transatlantic cooperation of ellie chambers and marshall gregory has produced an outstanding book that ought to be
