a brilliant account of the politics of shit it will leave you speechless written in paris after the heady days of student revolt in may 1968 and before the devastation of the aids epidemic history of shit is emblematic of a wild and adventurous strain of 1970s theoretical writing that attempted to marry theory politics sexuality pleasure experimentation and humor radically redefining dialectical thought and post marxist politics it takes an important and irreverent position alongside the works of such postmodern thinkers as foucault deleuze guattari and lyotard laporte s eccentric style and ironic sensibility combine in an inquiry that is provocative humorous and intellectually exhilarating debunking all humanist mythology about the grandeur of civilization history of shit suggests instead that the management of human waste is crucial to our identities as modern individuals including the organization of the city the rise of the nation state the development of capitalism and the mandate for clean and proper language far from rising above the muck laporte argues we are thoroughly mired in it particularly when we appear our most

clean and hygienic laporte s style of writing is itself an attack on our desire for clean language  
littered with lengthy quotations and obscure allusions and adamantly refusing to follow a linear argument  
history of shit breaks the rules and challenges the conventions of proper academic discourse

in a brief history of history acclaimed historian jeremy black seeks to reinvigorate and redefine our ideas about history the stories we tell about the past are a crucial aspect of all cultures however while

the traditional storytelling process what we think of as history in the proper sense is useful it is also misleading not least because it leads to the repetition of bias and misinformation black suggests that the conventional idea of history and historians is constructed too narrowly as it fails to engage with the broad nature of lived experience by focusing on a singular idea or story within the history being explored we fail to understand the interconnectivity of the everyday experience a brief history of history challenges accepted norms of the historical perspective and offers a view of human history that will surprise many and perhaps infuriate some but above all it is a history of historians written for this moment in time a time when the traditional eurocentric approach to history now appears wholly inappropriate

this book takes a dramatically original approach to the history of humanity using objects which previous civilisations have left behind them often accidentally as prisms through which we can explore past worlds and the lives of the men and women who lived in them the book s range is enormous it begins with one of the earliest surviving objects made by human hands a chopping tool from the olduvai gorge in africa and

ends with an object from the 21st century which represents the world we live in today neil macgregor's aim is not simply to describe these remarkable things but to show us their significance how a stone pillar tells us about a great indian emperor preaching tolerance to his people how spanish pieces of eight tell us about the beginning of a global currency or how an early victorian tea set tells us about the impact of empire each chapter immerses the reader in a past civilisation accompanied by an exceptionally well informed guide seen through this lens history is a kaleidoscope shifting interconnected constantly surprising and shaping our world today in ways that most of us have never imagined an intellectual and visual feast it is one of the most engrossing and unusual history books published in years
