officially over in 2009 the great recession is now generally acknowledged to be the most devastating global economic crisis since the great depression as a result of the crisis the united states lost more than 7 5 million jobs and the unemployment rate doubled peaking at more than 10 percent the collapse of the housing market and subsequent equity market fluctuations delivered a one two punch that destroyed trillions of dollars in personal wealth and made many americans far less financially secure still reeling from these early shocks the u s economy will undoubtedly take years to recover less clear however are the social effects of such economic hardship on a u s population accustomed to long periods of prosperity how are americans responding to these hard times the great recession is the first authoritative assessment of how the aftershocks of the recession are affecting individuals and families jobs earnings and poverty political and social attitudes lifestyle and consumption practices and charitable giving focused on individual level effects rather than institutional causes the great recession turns to leading experts to examine whether the economic aftermath caused by the recession is transforming how americans live their lives what they believe in and the institutions they rely on contributors michael hout asaf levanon and erin cumberworth show how job loss during the recession the worst since the 1980s hit less educated workers men immigrants and factory and construction workers the hardest millions of lost industrial jobs are likely never to be recovered and where new jobs are appearing they tend to be either high skill positions or low wage employment offering few opportunities for the middle class edward wolff lindsay owens and esra burak examine the effects of the recession on housing and wealth for the very poor and the very rich they find that while the richest americans experienced the greatest absolute wealth loss their resources enabled them to weather the crisis better than the young families african americans and the middle class who experienced the most disproportionate loss including mortgage delinquencies home foreclosures and personal bankruptcies lane kenworthy and lindsay owens ask whether this recession is producing enduring shifts in public opinion akin to those that followed the great depression surprisingly they find no evidence of recession induced attitude changes toward corporations the government perceptions of social justice or policies aimed at aiding the poor similarly philip morgan erin cumberworth and christopher wimer find no major recession effects on marriage divorce or cohabitation rates they do find a decline in fertility rates as well as increasing numbers of adult children returning home to the family nest evidence that suggests deep pessimism about recovery this protracted slump marked by steep unemployment profound destruction of wealth and sluggish consumer activity will likely continue for years to come and more pronounced effects may surface down the road the contributors note that to date this crisis has not yet generated broad shifts in lifestyle and attitudes but by clarifying how the recession s early impacts have and have not influenced our current economic and social landscape the great recession establishes an important benchmark

the united states holds the dubious distinction of having the most unequal income distribution of any advanced industrialized nation while other developed countries face similar challenges from globalization and technological change none rivals america's singularly poor record for equitably distributing the benefits and burdens of recent economic shifts in categorically unequal douglas massey weaves together history political economy and even neuropsychology to provide a comprehensive explanation of how america's culture and political system perpetuates inequalities between different segments of the population categorically unequal is striking both for its theoretical originality and for the breadth of topics it covers massey argues that social inequalities arise from the universal human tendency to place others into social categories in america ethnic minorities women and the poor have consistently been the targets of stereotyping and as a result they have been exploited and discriminated against throughout the nation's history african americans continue to face discrimination in markets for jobs housing and credit meanwhile the militarization of the u.s. mexican border has discouraged mexican migrants from leaving the united states creating a pool of exploitable workers who lack the legal rights of citizens massey also shows that women's advances in the labor market have been concentrated among the affluent and well educated while low skilled female workers have been relegated to occupations that offer few chances for earnings mobility at the same time as the wages of low income men have fallen more working class women are remaining unmarried and raising children on their own even as minorities and women continue to face these obstacles the progressive legacy of the new deal has come under frontal assault the government has passed anti union legislation made taxes more regressive allowed the real value of the federal minimum wage to decline and drastically cut social welfare spending as a result the income gap between the richest and poorest has dramatically widened since 1980 massey attributes these anti poor policies in part to the increasing segregation of

in an advanced society like the u s where an array of processes work against gender inequality how does this inequality persist integrating research from sociology social cognition and psychology and organizational behavior framed by gender identifies the general processes through which gender as a principle of inequality rewrites itself into new forms of social and economic organization cecilia ridgeway argues that people confront uncertain circumstances with gender beliefs that are more traditional than those circumstances they implicitly draw on the too convenient cultural frame of gender to help organize new ways of doing things thereby re inscribing trailing gender stereotypes into the new activities procedures and forms of organization this dynamic does not make equality unattainable but suggests a constant struggle with uneven results demonstrating how personal interactions translate into larger structures of inequality framed by gender is a powerful and original take on the troubling endurance of gender inequality
