The Future State and Free Discussion 1869 drawing the future chicago architecture on the international stage 1900 1925 is an illustrated catalog with companion essays for an exhibition of the same name at the mary and leigh block museum of art at northwestern university drawing the future explores the creative ferment among chicago architects in the early twentieth century coinciding with similar visions around the world the essays focus on the highlights of the exhibition david van zanten profiles walter burley griffin and marion mahony griffin chicago architects who created an influential prize winning plan for canberra the new capital of australia ashley dunn looks at the two exhibits at the musée des arts décoratifs in paris one devoted to the griffins in 1914 and the other to the french architect tony garnier in 1925 demonstrating the impact of world war i on city planning and architecture leslie coburn examines chicago s neighborhood center competition of 1914 15 which sought to redress gaps in daniel burnham s plan of 1909 the ambition and reach of chicago architecture in this epoch would have lasting influence on cities of the future

Back to the Future: Biff to the Future 2017 studying the jewish future explores the power of jewish culture and assesses the perceived threats to the coherence and size of jewish communities in the united states europe and israel in an unconventional and provocative argument calvin goldscheider departs from the limiting vision of the demographic projections that have shaped predictions about the health and future of jewish communities and asserts that the quality of jewish life has become the key to the future of jewish communities through the lens of individual biographies goldscheider shows how context shapes jewish senses of the future and how conceptions of the future are shaped and altered by life experiences goldscheider s distinctive comparative approach includes a critical review of population issues a consideration of biographies as a basis for understanding jewish values and an analysis of biblical texts for studying contemporary values he combines demographic and sociological analyses in historical and comparative perspectives to dispel the notion that quantitative issues are at the heart of the challenge of jewish continuity in the future numbers are clearly the building blocks of community but the interpretations of these demographic issues are often confusing and biased by ideological preconceptions as a basis for studying the core themes of the jewish future hard facts are less hard and less factual than interpreters have made them out to be population projections are limited by the vision of those who prepare them goldscheider concludes that the futures of jewish communities in america europe and israel are much more secure than has been presented in most scholarly and popular publications and discussions about the jewish future should shift to other patterns of distinctiveness this book will appeal to the general jewish reader as well as to social scientists and modern jewish historians it is appropriate for jewish studies courses particularly but not exclusively those focusing on jews in the united states the american jewish community and modern jewish society and in courses on ethnicity multiculturalism cultural diversity and ethnic relations
