Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References 1946

the general purpose of this study was to deepen and broaden thinking about the nature and implications of possible multi skilled soldier mss concept implementation specific objectives were 1 to determine applicability of the mss to the stryker brigade combat team sbct as it might be implemented in initial entry training iet and 2 to prototype mss concept implementation for the sbct considering possible

2023-08-15

13/29

plantwide dynamic
simulators in chemical
processing and control
chemical industries

implementation for the future force the report also defines the mss shows how the mss concept might fit conceptually within a larger army training education and professional development model for soldiers of all ranks offers an mss program design for iet and crafts actionable recommendations regarding general mss implementation for iet the study concludes that the mss concept is fully applicable to the sbct as well as the so called current force it also concludes that mss implementation would have a significant salutary effect on unit training readiness postures across the force this study relied heavily on insights and analysis gained from interviews with groups of senior ncos and officers within the 3rd brigade sbct 2nd infantry division ft lewis wa during september 2002
