Health and Safety Aspects of Automation and Technological Change 1964 powerfully posing questions of ethics ideology authorship and form documentary film has never been more popular than it is today edited

by one of the leading british authorities in the field the documentary film book is an essential guide to current thinking on documentary film in a series of fascinating essays key international experts discuss the theory of documentary outline current understandings of its history from pre flaherty to the post griersonian world of digital i docs survey documentary production from africa to europe and from the americas to asia consider documentaries by marginalised minority communities and assess its contribution to other disciplines and arts brought together here in one volume these scholars offer compelling evidence as to why over the last few decades documentary has come to the centre of screen studies

Cincinnati Lancet and Clinic 1890 federico chabod 1901 1960 was one of italy s best known historians noted for his study of italian history in a european context this is the first english translation of his most important book although he carried out his extensive archival research for this work from 1936 until 1943 the fall of fascism and chabod's active participation in the resistance delayed its completion when it was published in 1951 it was immediately hailed as a masterpiece chabod intended to write a new kind of diplomatic history one in which political history is seen as part of a larger historical whole he does not present a detailed chronological account of italian foreign policy during the period studied but rather the moral and material underpinnings of that policy in fact he crafts a highly developed portrait of an age with the real subjects being the italian state and society the ruling class and political culture this work offers readers a superb picture of post risorgimento italy and an outstanding example of chabod's historiographical method originally published in 1996 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905 Hitler's Last Hostages 2019-09-10 includes summaries of proceedings and addresses of annual meetings of various gas associations l c set includes an index to these proceedings 1884 1902 issued as a supplement to progressive age feb 15 1910

The Quarterly Review (London) 2023-12-30 the history of the victorian age will never be written we know too much about it so wrote lytton strachey in 1922 but he added human beings are too important to be treated as mere symptoms of the past instead of writing a summary of an era he concentrated on four searching biographies of an ecclesiastic an educational authority a woman of action and a man of adventure strachey deemed cardinal henry edward manning 1808 1892 distinguished less for saintliness and learning than for practical

ability he won by art what he would never have won by force as a supporter of educational reform and in settling the london dock strike of 1889 this extraordinary man straddled the two main religions of england first as an archdeacon in the church of england then as an archbishop and cardinal in the roman catholic church of florence nightingale 1820 1910 strachey warns his readers that in the real miss nightingale there was more that was interesting than in the legendary one there was also less that was agreeable she was implacably opposed to the indifferent government and military officials who oversaw the running of hospitals thomas arnold 1795 1842 became the headmaster of rugby school in 1827 at a time when there was a push to modernize the british boarding schools that produced the nation s officers arnold insisted on an education based on the classics and christianity he also started the prefecture system by which senior students help run the school strachey concentrates on the events leading to general charles george gordon s death in khartoum in 1885 commenting it is only fitting that the last moments of one whose whole life was passed in contradiction should be involved in mystery and doubt general gordon born in 1833 had been called out of semiretirement to resolve the egyptian situation
