## Against Elections

2018-04-17

a small book with great weight and urgency to it this is both a history of democracy and a clarion call for change without drastic adjustment this system cannot last much longer writes van reybrouck regarded today as one of europe's most astute thinkers if you look at the decline in voter turnout and party membership and at the way politicians are held in contempt if you look at how difficult it is to form governments how little they can do and how harshly they are punished for it if you look at how quickly populism technocracy and anti parliamentarianism are rising if you look at how more and more citizens are longing for participation and how quickly that desire can tip over into frustration then you realize we are up to our necks not so very long ago the great battles of democracy were fought for the right to vote now van reybrouck writes it's all about the right to speak but in essence it's the same battle the battle for political emancipation and for democratic participation we must decolonize democracy we must democratize democracy as history van reybrouck makes the compelling argument that modern democracy was designed as much to preserve the rights of the powerful and keep the masses in line as to give the populace a voice as change agent against elections makes the argument that there are forms of government what he terms sortitive or deliberative democracy that are beginning to be practiced around the world and can be the remedy we seek in iceland for example deliberative democracy was used to write the new constitution a group of people were chosen by lot educated in the subject at hand and then were able to decide what was best arguably far better than politicians would have a fascinating and workable idea has led to a timely book to remind us that our system of government is a flexible instrument one that the people have the power to change

## Democracy for Realists

2017-08-29

why our belief in government by the people is unrealistic and what we can do about it democracy for realists assails the romantic folk theory at the heart of contemporary thinking about democratic politics and government and offers a provocative alternative view grounded in the actual human nature of democratic citizens christopher achen and larry bartels deploy a wealth of social scientific evidence including ingenious original analyses of topics ranging from abortion politics and budget deficits to the great depression and shark attacks to show that the familiar ideal of thoughtful citizens steering the ship of state from the voting booth is fundamentally misguided they demonstrate that voters even those who are well informed and politically engaged mostly choose parties and candidates on the basis of social identities and partisan loyalties not political issues they also show that voters adjust their policy views and even their perceptions of basic matters of fact to match those loyalties when parties are roughly evenly matched elections often turn on irrelevant or misleading considerations such as economic spurts or downturns beyond the incumbents control the outcomes are essentially random thus voters do not control the course of public policy even indirectly achen and bartels argue that democratic theory needs to be founded on identity groups and political parties not on the preferences of individual voters now with new analysis of the 2016 elections democracy for realists provides a powerful challenge to conventional thinking pointing the way toward a fundamentally different understanding of the realities and potential of democratic government

## *Our Broken Elections*

2021-11-02

behind the deeply contentious 2020 election stands a real story of a broken election process election fraud that alters election outcomes and dilutes legitimate votes occurs all too often as is the bungling of election bureaucrats our election process is full of vulnerabilities that can be and are taken advantage of raising questions about and damaging public confidence in the legitimacy of the outcome of elections this book explores the reality of the fraud and bureaucratic errors and mistakes that should concern all americans and offers recommendations and solutions to fix those problems
