Constitutional relocation exhibits a reappraisal of the whole world we live in. Pier Giuseppe Monateri, University of Turin, Italy. Constitutional orders and legal regimes are established and changed through the importing and exporting of ideas and ideologies, norms, institutions, and arguments. The contributions in this book discuss this assumption and address theoretical questions, methodological problems, and political projects connected with the transfer of constitutions and law. Some of the chapters focus on the pathways, risks, and side effects of legal constitutional transfers in specific situations, such as postcolonial societies and occupied territories. Others follow law beyond the official arenas into systems of legal pluralism, while others analyze how experimentalism generates hybrid constitutional orders. This interdisciplinary, multi-jurisdictional study will appeal to researchers, academics, and advanced students in the fields of comparative constitutional law, comparative law, and legal theory.
