this country profile for tanzania provides an overview on the socioeconomic and political context within which redd policies and processes emerge it explores the tanzanian redd policy processes and strategies at the national level identifying barriers limits and opportunities in national redd arenas to inform future redd design by providing research based options for achieving efficient effective and equitable redd i e the 3es of redd both direct and indirect drivers of deforestation and forest degradation are at work including forest conversion to small scale agriculture timber extraction driven by demand from national and international markets fuelwood and charcoal and population growth the prospects for redd rest on improving a number of

issues tenure arrangements forest governance reliability of long term funding benefit sharing mechanisms and technical human and financial capacity we recommend the continuation of support towards decentralized sustainable forest management and utilization of the participatory forest management model as an entry point for redd initiatives participatory land use planning practices coupled with improved spatial planning and strengthening mechanisms against illegal activities entrenched in driving forest degradation are needed in addition for redd to succeed it will need to challenge and overcome the powerful actors invested in and driving the business as usual model
