maoz views the evolution of international relations over the last two centuries as a set of interacting cooperative and conflicting networks of states the networks that emerged are the result of national choice processes about forming or breaking ties with other states states are constantly concerned with their security and survival in an anarchic world their security concerns stem from their external environment and their past conflicts because many of them cannot ensure their security by their own power they need allies to balance

against a hostile international environment the alliance choices made by states define the structure of security cooperation networks and spill over into other cooperative networks including trade and institutions maoz tests his theory by applying social networks analysis sna methods to international relations he offers a novel perspective as a system of interrelated networks that co evolve and interact with one another

each year millions of high school students consider whether to continue their schooling and attend and complete college despite evidence showing that a college degree yields far reaching benefits critics of higher education increasingly argue that college does not pay off and some students namely disadvantaged prospective college goers would be better served by forgoing higher education but debates about the value of college often fail to carefully consider what is required to speak knowledgeably about the benefits what a person s life might look like had they not completed college or their college counterfactual in overcoming the odds sociologist jennie e brand reveals the benefits of completing college by comparing life outcomes of college graduates with their college counterfactuals drawing on two cohorts of nationally representative data from the bureau of labor statistics national longitudinal surveys program brand uses matching and machine learning methods to estimate the effects of college completion across students with varying likelihoods of completing four year degrees to illustrate her findings brand describes outcomes using matched vignettes of college and non college graduates brand shows that four year college completion enables graduates to increase wages and household income while also circumventing unemployment low wage work job instability poverty and social assistance completing college also increases civic engagement most of these benefits are larger for disadvantaged than for more advantaged students rendering arguments that college has limited benefits for unlikely graduates as flawed brand concludes that greater long term earnings and less job instability and unemployment and thus more tax revenue less reliance on public assistance and high levels of volunteering indicate that public investment in higher education for students from disadvantaged backgrounds yields far reaching collective benefits she asserts that it is better for our society when more people complete college overcoming the odds is an innovative and enlightening exploration of how college can transform lives

this book raises thorny questions about the themes of faith hope and love is god really like jesus or was jesus a temporary exception to the way god usually is was there forgiveness before the cross will god one day stop loving what do we do with the fact that the hopes they had for change were not fulfilled what happened to good news for the poor why did some replace it with something else does christian freedom mean we no longer need the law were early responses to rejection always healthy does the bible say all we need to know about sexuality it responds to what the author observes is a widespread hunger and interest for discussions which identify and tackle some of the troubling themes of new testament interpretation in ways that are not defensive but yet are also supportive of faith especially an informed faith it draws together the fruit of over half a century of scholarly research and teaching

the neanderthals populated western europe from nearly 250 000 to 30 000 years ago when they disappeared from the archaeological record in turn populations of anatomically modern humans homo sapiens came to dominate the area seeking to understand the nature of this replacement which has become a hotly debated issue paul mellars brings together an unprecedented amount of information on the behavior of neanderthals his comprehensive overview ranges from the evidence of tool manufacture and related patterns of lithic technology through the issues of subsistence and settlement patterns to the more controversial evidence for social organization cognition and intelligence mellars argues that previous attempts to characterize neanderthal behavior as either modern or ape like are both overstatements we can better comprehend the replacement of neanderthals he maintains by concentrating on the social and demographic structure of neanderthal populations and on their specific adaptations to the harsh ecological conditions of the last glaciation mellars s approach to these issues is grounded firmly in his archaeological evidence he illustrates the implications of these findings by drawing from the methods of comparative socioecology primate studies and pleistocene paleoecology the book provides a detailed review of the climatic and environmental background to neanderthal occupation in europe and of the currently topical issues of the behavioral and biological transition from neanderthal to fully modern populations

ten years in the making under the volcano is the best known work of writer malcolm lowry published first in 1947 it is a brilliant moving and complex novel perhaps the last fictional masterpiece to emerge from the modernist movement as the years went by lowry s obsessive rewriting took him further and further into his book which changed relatively little in the outer semblance of action and main characters but became utterly transformed in texture from the thin and mediocre version of 1940 to the rich tapestry of 1947 the numerous manuscripts allow a look at the processes by which lowry created not only his masterwork but also his own reputation as a modernist genius this study offers an extended examination of individual drafts as the novel slowly developed and in a final chapter an appraisal of the implications of lowry s revisions for the book as published an appraisal that suggests bases for new readings of under the volcano

ancient and medieval labyrinths embody paradox according to penelope reed doob their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without mazes simultaneously assert order and chaos artistry and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process in this handsomely illustrated book doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the middle ages doob first examines several complementary

traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity she then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts this paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as doob's examination of a vast array of materials from the classical period through the middle ages suggests she concludes with linked readings of four labyrinths of words virgil's *aeneid* boethius' *consolation of philosophy* dante's *divine comedy* and chaucer's *house of fame* each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works readers in such fields as classical literature medieval studies renaissance studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book

Hawthorne's Works

1882

the romantic era in england and germany saw a sudden renewal of prophetic modes of writing biblical prophecy and to a lesser extent classical oracle again became viable models for poetry and even for journalistic prose notably this development arose out of the new found freedom of biblical interpretation that began in the mid eighteenth century as the bible was increasingly seen to be a literary and mythical text taking walter benjamin's thinking about history as a point of departure the author shows how the model for romantic prophecy emerges less as a prediction of the future than as a call to change in the present even as it quotes at key turns texts from the past after surveying developments in eighteenth century biblical hermeneutics as well as the numerous instances of prophetic eruption in romantic poetry the book culminates in close readings of works by blake hölderlin and coleridge each of these writers interpreted the bible in strong variously

radical and conservative ways and each reworked prophetic texts in often startling fashion the author s reading of blake focuses on the complex temporal and rhetorical dynamics at work in a prophetic tradition with attention paid to the key mediating figure of milton the chapter on hölderlin investigates the truth claim of poetry and the consequences of hölderlin s insight into the necessarily figural character of poetry the analysis of coleridge correlates his theory of allegory and symbol with his theory and practice of political writing which often relies on mobilizing prophetic authority together the readings force us to reexamine the claims and practices of romantic poets and thinkers and their ideas and ideologies not without engendering some allegorical resonance with issues in our own time
