Twenty Years of Education Transformation in Gauteng 1994 to 2014

2015-05-05

twenty years of education transformation in gauteng 1994 to 2014 an independent review presents a collection of 15 important essays on different aspects of education in gauteng since the advent of democracy in 1994 these essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects each essay is written by one or more specialist in the relevant focus area the book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader it sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially there has been no attempt to fit the book s chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the gauteng department of education s present and past we leave the reader to decide to what extent the gde has fulfilled its educational mandate over the last 20 years

Improving Research-Based Knowledge of College Promise Programs

2020-03-20

also known as free tuition and free college programs college promise programs are an emerging approach for increasing higher education attainment of people in particular places to maximize the effectiveness of their efforts and investments program leaders and policymakers need research based evidence to inform program design implementation and evaluation with the goal of addressing this knowledge need this volume presents a collection of research studies that examine several categories and variations of college promise programs these theoretically grounded empirical investigations use varied data sources and analytic techniques to examine the effects of college promise programs that have different design features and operate in different places individually and collectively the results of these studies have implications for the design and implementation of promise programs if these programs are to create meaningful improvements in attainment for people from underserved groups the authors efforts also provide a useful foundation for the next generation of college promise research

NAGC Pre-K–Grade 12 Gifted Education Programming Standards

2022-01-31

the pre k grade 12 gifted education programming standards should be part of every school district s repertoire of standards to ensure that the learning needs of advanced students are being met the new edition of this popular book helps schools understand the updates to the standards which have a renewed emphasis on equity and inclusion the six standards focus on student outcomes in learning and development assessment curriculum planning and instruction learning environments programming and professional learning updated from professional development used in the 2010 version this book details these standards and provides suggestions for implementing each one it also includes sample assessments of student products and performances which will assist schools in developing program and service evaluation benchmarks this book is a must have for school leaders and gifted education professionals who want to offer the most effective services for gifted and advanced students it is a service publication of the national association for gifted children washington dc this designation indicates that this book has been jointly developed with nagc and that this book passes the highest standards of

significant national measures of the condition and progress of education for which accurate data are available to help inform policymakers and the public about the progress of education in the united states congress has mandated that the national center for education statistics nces produce an annual report the condition of education this year s report presents 42 indicators of important developments and trends in u s education these indicators focus on population characteristics participation in education elementary and secondary education and postsecondary education condition shows in 2012 about 90 percent of young adults ages 25 to 29 had a high school diploma or its equivalent and 33 percent had a bachelor s degree or higher as in previous years annual median earnings in 2011 were higher for those with higher levels of education for example 25 to 34 year olds with a college degree earned over twice as much as high school dropouts the condition of education 2013 includes the latest data available on these and more key indicators as new data are released the indicators will be updated and made available along with these indicators nces produces a wide range of reports and data to help inform policymakers and the american public about trends and conditions in u s education as this year s in 2011 almost two thirds of 3 to 5 year olds were enrolled in preschool and nearly 60 percent of these children were in full day programs at the elementary and secondary level there were about 50 million public school students in 2011 a number that is expected to grow to 53 million in the next decade of these students nearly 2 million attended

charter schools postsecondary enrollment in 2011 was at 21 million students including 18 million undergraduate and 3 million graduate students nces s newest data on elementary and secondary schools show that about one in five public schools was considered high poverty in 2011 meaning that 75 percent or more of their enrolled students qualified for free or reduced price lunch up from about one in eight in 2000 in school year 2009 10 some 3.1 million public high school students or 78.2 percent graduated on time with a regular diploma and in 2011 about 68 percent of recent high school completers were enrolled in college the following fall meanwhile the status dropout rate or the percentage of 16 to 24 year olds who are not enrolled in school and do not have a high school diploma or its equivalent declined from 12 percent in 1990 to 7 percent in 2011 at 4 year colleges in 2011 nearly 90 percent of full time students at public and private nonprofit institutions were under the age of 25 however only about 29 percent of full time students at private for profit colleges were while 39 percent were between the ages of 25 to 34 and another 32 percent were 35 and older about 56 percent of male students and 61 percent of female students who began their bachelor s degree in the fall of 2005 and did not transfer had completed their degree by 2011 in that year there were 1.7 million bachelor s degrees and over 700 000 master s degrees awarded

this book offers a meso level description of demographics science education and science teacher education representing all 13 canadian jurisdictions the book provides local insights that serve as the basis for exploring the canadian system as a whole and function as a common starting point from which

to identify causal relationships that may be associated with Canada's successes the book highlights commonalities, consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement however there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education this book fills that gap by presenting a thorough description of science education at the provincial/territorial level as well as a more holistic description of pressing issues for Canadian science education

Colour Matters

2021

this book informs an international audience of teachers, scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world the book represents an important contribution to learning progressions

research and practice the different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography the book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices as an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards the book analyzes the general conditions of learning progressions within the context of a globalized world important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography the contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries the book appeals to k 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world

The Condition of Education 2013

2013-11-18

this book presents a research focus on diversity and inclusivity in mathematics education the challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result if we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education the book is written by a group of experienced collaborating researchers who share this focus it is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity several chapters report new research in this direction the authors are part of or have visited with the mathematics education staff of the faculty of education at monash university in melbourne australia the chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive

approaches the studies presented are set in different contexts including australia china the united states and singapore

Projections of Educational Statistics to ...

scene including amphetamines and the synthetic cannabinoid receptors in spice and k2

Learning Progressions in Geography Education

2016-07-30

offering contributions from international leaders in the field this volume builds on empirically informed meta analyses to foreground relationship based aspects of parental involvement in children s education and learning chapters explore how factors including parent child communication cultural and parental expectations as well as communication with a child s teacher and school can impact educational outcomes by focusing on relationships between parents teachers and students chapter authors offer a nuanced picture of parental involvement in children s education and learning considering variation across countries educational and non educational contexts and challenges posed by parental absence and home schooling the book offers key insights into how parents schools communities and educators can best support future generations using multiple forms of research from the relational perspective this volume will be of interest to students scholars and researchers with an interest in educational psychology as well as child development

Diversity in Mathematics Education

2014-09-20

research for educational change presents ways in which educational research can fulfil its commitments to educational practice focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident the question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice in the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a south african mathematics classroom in the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices this book will be key

reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice it will also appeal to teacher educators practitioners and undergraduate students interested in educational research

Critical Perspectives on International Education

2013-02-11

Successful School Leadership

2016-02-25

this volume is intended for researchers curriculum developers policy makers and classroom teachers who want comprehensive information on what students at grades 4 8 and 12 the grades assessed by naep can and cannot do in mathematics after two introductory chapters on the design of naep the volume

contains a chapter on the challenges in analyzing naep data at the item level followed by five chapters that report 2005 through 2013 student performance on specific assessment items these chapters are organized by content area and then by topic e g understanding of place value knowledge of transformations ability to use metric and u s systems of measurement and thus provide baseline data on the proportion of students who are able to complete the mathematics tasks currently used in the upper elementary middle and high school mathematics curriculum additional chapters focus on student reasoning u s performance on international assessments and using construct analysis rather than percent correct on clusters of items to understand student knowledge on specific mathematics topics several themes emerge from the volume one is that while the rate of improvement in mathematics learning in grades 4 and 8 has slowed in recent years it has slowed more on some topics than others another is that relatively minor changes in wording can have significant effects on student performance and thus it is difficult to be specific about what students can do without knowing exactly what questions they were asked a third theme is that changes in performance over time can sometimes but not always be understood in terms of what students are taught for example there were substantial gains on several grade 4 items requiring understanding of fractions and that is probably because the amount of instruction on fractions in grades 3 and 4 has been increasing in contrast while relatively few twelfth grade students have ever been good at factoring

trinomials performance on this skill seems to be decreasing this suggests that while more students are completing advanced mathematics courses in high school these courses are not helping in the area of factoring trinomials finally there are limitations to using naep as a measure of student performance on the common core state standards to the extent that naep can be used however the naep data show a substantial gap between expectations and performance

Novel Psychoactive Substances

2021-09-06

this book presents combinations as a set of high yield instructional strategies for advancing academic literacy for multilingual learners and all students it discusses the strategies themselves as well as how they work to advance content and language learning simultaneously across the grades and content areas the book is particularly beneficial for all teachers working with linguistically and culturally diverse learners to accelerate their language and content learning utilizing these strategies will not only greatly improve students writing but also supports their critical thinking content area reading and language comprehension skills this book argues for utilizing combinations with strategic inquiry presenting evidence of how each

amplifies the impact of the other and how together they address many of the challenges to learning new and counter cultural methods and to establishing school and district cultures in support of multilingual learners success this book is a great resource for classroom teachers literacy coaches and school and district administrators who want to support multilingual learners and all students to thrive

Relational Aspects of Parental Involvement to Support Educational Outcomes

this book is a must read for serious christians hoping to obey the great

commission to make disciples in africa vernon strikes an admirable balance between academic depth and practical application helping us to appreciate the interface between the gospel of jesus christ and the traditional african worldview i heartily recommend this book to all thinking christian leaders in africa pastors teachers and missionaries kevin g smith dlitt phd vernon light wrote this book with an apostolic passion in the way the apostles presented and proclaimed the gospel to world religions and cultures it is an exciting study of african traditional religion and its relation to christianity it shows that for christianity to thrive and be relevant biblically and transformationally in africa firstly christian scholars and theologians are needed who understand and address africa's traditional heritage and western modern postmodern and pluralistic ideologies and secondly the gospel must be contextually relevantly meaningfully and practically taught through an effective discipleship program the book based on extensive research and massive use of resources is a valuable tool for students pastors scholars and theologians interested in the state of christianity and religious change in africa professor yusufu turaki phd much more than being a useful resource this is a book with a mission like jeremiah of old jer 20 9 vernon is a man with a passion and message from god to the society to which god has called him like jeremiah vernon is totally convinced of the absolute truth of his message in the midst of a myriad of conflicting opinions and that his message will change society from disaster to hope would that it is heard professor

david t williams dth the rev vernon e light bsc bdhons mth is a member of the academic staff at the south african theological seminary
