### **The Political Economy and Media Coverage of the**

**European Economic Crisis** 2014-04-28 the european economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies the media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens this book explains how and why using a critical political economic perspective and focusing on the case of ireland throughout ireland is compared with contemporary and historical examples to contextualise the arguments made the book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the european institutions and the international monetary fund austerity and the possibility of leaving the eurozone for europe's peripheral countries through a systematic analysis of ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

**Media Pluralism and Diversity** 2014-01-23 adopting a truly global theoretical and multidisciplinary perspective media pluralism and diversity intends to advance our understanding of media pluralism across the globe it compares metrics that have been developed in different parts of the world to assess levels of or threats to media pluralism

The National Tertiary Education Union 2016-01-22 with a unique insider's perspective john o'brien explores two decades of political activism by the nteu from its successes in negotiating enterprise bargaining and vital role during the rights to work campaign to its work on behalf of aboriginal and torres straight islanders women lgbti members and casual workers during a time of constant change within the education sector

Capitalism's Crises 2014-05-15 the contributors to this volume draw on a non dogmatic marxist approach to explain the systemic and conjunctural dynamics of crisis inherent in global capitalism their analysis asks what is historically specific to capitalism's crises while avoiding catastrophic or defeatist claims at the same time the volume situates left agency within actual patterns of resistance and class struggle to clarify the potential for transformative change the cycle of resistance strengthened by the world social forum and transnational activism is now punctuated by the experience of the arab spring the agency of anti systemic movements left think tanks the occupy wall street movement labour unions left parties in europe such as syrizia and podemos and peoples budgeting in kerala india on the down side we are witnessing the waning of the workers party in brazil and serious challenges for south africa's once powerful labour movement and still formative social justice activism all these developments are assessed in this volume this is the second volume in the democratic marxism series it elaborates on crucial themes introduced in the first volume marxism in the 21st century crisis critique and

*Transnational Financial Regulation after the Crisis* 2015 the global financial crisis that began in 2007 was the most destructive since the 1930s the rapid spread of the crisis across borders and the complexity of these cross border linkages highlighted the importance for authorities of working together in responding to the crisis this book examines the transnational response that relied heavily on a set of relatively informal transnational regulatory groupings that had been constructed over previous decades during the crisis these arrangements were made stronger and more inclusive but they remain very complex thousands of pages of new rules have been created by various transnational bodies and the implementation of these rules relies heavily on domestic law and regulation and private rules and practices this book analyses this complex response showing that its overly technical and incremental character the persistence of tensions between transnational processes and state centred politics and the ongoing power of private actors have made the regulatory response fall short of what is needed transnational financial regulation after the crisis provides new insights that are relevant for theory and practice not only for transnational financial regulation but for global governance more generally

**We Are Better Than This** we are better than this fundamentally reframes budget debates in the united states author edward d kleinbard explains how the public s preoccupation with tax policy alone has obscured any understanding of government s ability to complement the private sector through investment and insurance programs that enhance the general welfare and prosperity of our society at large he argues that when we choose how government should spend and tax we open a window into our fiscal soul because those choices are the means by which we express the values we cherish and the regard in which we hold our fellow citizens though these values are being diminished by short sighted decisions to starve government strategic government spending can directly make citizens happier healthier and even wealthier expertly combining the latest economic research with his insider knowledge of the budget process into a simple yet compelling narrative

he unmasks the tax mythologies and false arguments that too often dominate contemporary discourse about budget policies large quantities of comparative data are succinctly distilled to situate the united states among its peer countries so that readers can judge for themselves whether contemporary budget choices really reflect our aspirational fiscal soul kleinbard s presentation takes a multi disciplinary approach drawing on economics finance law political science and moral philosophy he uniquely weaves economic research and moral philosophy together by emphasizing our welfare not just our national income and by contrasting the actual beliefs of adam smith a great moral philosopher with the cartoon version of the man presented by proponents of the most extreme forms of private market triumphalism
