Frostbike 2014

the bicycle is fast becoming a ubiquitous form of transportation in cities all over the world making our urban spaces more efficient more livable and healthier but many of those bicycles disappear into basements and garages when the warm months end parked there by owners fearful of the cold snow and ice that winter brings but does it have to be that way canadian writer and journalist tom babin started questioning this dogma after being stuck in winter commuter traffic one dreary and cold december morning and dreaming about the happiness that bicycle commuting had brought him all summer long so he did something about it he pulled on some thermal underwear dragged his bike down from the rafters of his garage and set out on a mission to answer a simple but beguiling question is it possible to happily ride a bike in winter that question took him places he never expected over years of trial and error research and more than his share of snow and ice he discovered an unknown history of biking for snow and ice and a new generation designed to make riding in winter safe and fun he unearthed the world s most bike friendly winter city and some new approaches to winter cycling from places all over

the world he also looked inward to discover how the modern world shapes our attitudes toward winter and perhaps most importantly he discovered the unique kind of bliss that can only come by pedalling through softly falling snow on a quiet winter night

Management of Technology and Innovation in Japan 2006-02-23

what makes this book unique no crystal ball is required to safely predict that in the future even more than in the past mastered innovativeness will be a primary criterion distinguishing successful from unsuccessful companies at the latest since michael porter's study on the competitiveness of nations the same criterion holds even for the evaluation of entire countries and national economies despite the innumerable number of publications and recommendations on innovation competitive innovativeness is still a rare competency the latest publication of unice the european industry ganization representing 20 million large midsize and small companies speaks a clear language europe qualifies to roughly 60 70 of the innovation strength of the us japan the record unemployment in many eu countries does not contradict this message a main reason may be given by the fact that becoming an innovative organization means increased openness towards the new and more tolerance towards risks and failures both challenging the inherently difficult management art of cultural change further lacking innovativeness is often related to legal and fiscal barriers which rather hinder than foster innovative activities yet another reason to explain europe's notorious innovation gap refers to insufficient financial r d resources on the company as well as on the national level as a result for example hi ranking decisions on the level of the european commission are taken to increase r d expenditures in the european union from roughly 2 to 3 of gnp

Complete Bike Maintenance New and Expanded Edition 2011-03-28

Popular Mechanics 2019-09-13

high velocity change is the fundamental challenge facing companies today few companies however are prepared to continuously innovate because they focus on the short term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society practical wisdom is the bases of continuous innovation where companies ceaselessly and repeatedly creating new knowledge disseminating it throughout the organization and converting knowledge to action over time in the wise company legendary management experts ikujiro nonaka and hirotaka takeuchi highlight how various companies have confronted the challenge of rapid change to create new products and new ways of doing business that benefit employees consumers and society the key a relentless self renewal process where companies realize the future they envisions rather than only responding to changes in the environment nonaka and takeuchi argue that while knowledge creating companies focusing on tacit and explicit knowledge can generate innovation they

cannot create it on a continuous and ongoing basis without having wisdom about human interactions and how they influence organizational structures and practices companies that have resilience longevity and sustainability share a number of characteristics nonaka and takeuchi show strategies are based on alignment of organizational and societal benefits leaders grasp the core of any situation or problem quickly and intuitively comprehend the nature and meaning of people things and events but wise leadership is not enough wisdom must infuse the organization through informal as well as formal shared interactions and communications that focus on metaphors and stories that convey the essence and meaning of strategies and actions in short nonaka and takeuchi demonstrate how continuous innovation results from companies ceaselessly and repeatedly creating new knowledge disseminating knowledge throughout the organization and converting that knowledge to action the wise company presents a new model of knowledge creation and practice for the twenty first century
