the encyclopedia of microcomputers serves as the ideal companion reference to the popular encyclopedia of computer science and technology now in its 10th year of publication this timely reference work details the broad spectrum of microcomputer technology including microcomputer history explains and illustrates the use of microcomputers throughout academe business government and society in general and assesses the future impact of this rapidly changing technology

## **PC User's Troubleshooting Guide**

2018-10-03

high reliability autonomous management systems for spacecraft updates on research on three levels of self management including 1 autonomous health management of spacecraft that covers how spacecraft can monitor their own state and autonomously detect isolate and recover from faults 2 autonomous mission management of spacecraft where the spacecraft can directly receive the mission formulate a reasonable plan according to the current state and working environment of the spacecraft and convert the mission into a specific sequence of instructions 3 spacecraft autonomous data management where the spacecraft processes a large amount of raw data and extracts useful information and autonomously executes or changes flights the autonomous management of spacecraft uses modern control technologies such as artificial intelligence to establish a remote intelligent body on the spacecraft so that the spacecraft can complete its flight tasks by itself its goal is to accurately perceive its own state and external environment without relying on external information injection and control or rely on external control as little as possible divides the autonomous management level of spacecraft into two levels autonomy and execution

covers the implementation of spacecraft autonomous management into three aspects including autonomous health management of the spacecraft mission management and converting the mission into a specific sequence of instructions discusses how these processes can take a large amount of raw data and extract useful information covers the autonomous management model of the spacecraft including compatibility

## **Encyclopedia of Microcomputers**

2005-03-04

over the past several decades applications permeated by advances in digital signal processing have undergone unprecedented growth in capabilities the editors and authors of high performance embedded computing handbook a systems perspective have been significant contributors to this field and the principles and techniques presented in the handbook are reinforced by examples drawn from their work the chapters cover system components found in today's hpec systems by addressing design trade offs implementation options and techniques of the trade then solidifying the concepts with specific hpec system examples this approach provides a more valuable learning tool because readers learn about these subject areas through factual implementation cases drawn from the contributing authors own experiences discussions include key subsystems and components computational characteristics of high performance embedded algorithms and applications front end real time processor technologies such as analog to digital conversion application specific integrated circuits field programmable gate arrays and intellectual property based design programmable hpec systems technology including interconnection fabrics parallel and distributed processing performance metrics and software architecture and automatic code parallelization and optimization examples of complex hpec systems representative of actual prototype developments application examples including radar communications electro optical and sonar applications the handbook is organized around a canonical framework that helps readers navigate through the chapters and it concludes with a discussion of future trends in hpec systems the material is covered at a level suitable for practicing engineers and hpec computational practitioners and is easily adaptable to their own implementation requirements

## **High-Reliability Autonomous Management Systems for Spacecraft**

## **ISTFA 2012**

2011-06-01

there is growing recognition of the need to address the fragility of digital information on which our society heavily depends for smooth operation in all aspects of daily life this has been discussed in many books and articles on digital preservation so why is there a need for yet one more because for the most part those other publications focus on documents images and webpages objects that are normally rendered to be simply displayed by software to a human viewer yet there are clearly many more types of digital objects that may need to be preserved such as databases scientific data and software itself david giaretta director of the alliance for permanent access and his

contributors explain why the tools and techniques used for preserving rendered objects are inadequate for all these other types of digital objects and they provide the concepts techniques and tools that are needed the book is structured in three parts the first part is on theory i e the concepts and techniques that are essential for preserving digitally encoded information the second part then shows practice i e the use and validation of these tools and techniques finally the third part concludes by addressing how to judge whether money is being well spent in terms of effectiveness and cost sharing various examples of digital objects from many sources are used to explain the tools and techniques presented the presentation style mainly aims at practitioners in libraries archives and industry who are either directly responsible for preservation or who need to prepare for audits of their archives researchers in digital preservation and developers of preservation tools and techniques will also find valuable practical information here researchers creating digitally encoded information of all kinds will also need to be aware of these topics so that they can help to ensure that their data is usable and can be valued by others now and in the future to further assist the reader the book is supported by many hours of videos and presentations from the caspar project and by a set of open source software
