for mechanical engineer

resource allocation and privacy

a federated graph neural network framework for privacy Mar 28 2024 here we present a federated gnn framework named fedpergnn for both effective and privacy preserving personalization through a privacy preserving model update method we can

2108 04417 privacy preserving machine learning methods

Feb 27 2024 in this paper we systematically review and summarize existing privacy preserving approaches and propose a phase guarantee and utility pgu triad based model to understand and guide the evaluation of various ppml solutions by decomposing their privacy preserving functionalities

privacy preserving deep learning arxiv org

Jan 26 2024 we provide a transparent framework for privacy preserving deep learning to every pytorch user enabling the use of fl mpc and dp from an intuitive interface we show the ability of the framework to support various implementations of mpc and dp solutions and report the results

a distributed privacy preserving framework for deep learning

Dec 25 2023 most studies about privacy preserving dl require a trusted data collector and thus are not suitable in an untrusted environment in this paper we propose a distributed privacy preserving framework for dl with edge cloud computing where direct privacy leakage and indirect privacy leakage of training data are both considered

end to end privacy preserving deep learning on multi

nature Nov 24 2023 we present a free open source software framework for privacy preserving fl and end to end encrypted inference on medical imaging data

which we showcase in a clinically relevant real life **a efficient and robust privacy preserving framework for cross** Oct 23 2023 a efficient and robust privacy preserving framework for cross device federated learning original article open access published 23 february 2023 volume 9 pages 4923 4937 2023 cite this article download pdf you have full access to this open access article weidong du min li liqiang wu yiliang han tanping zhou xiaoyuan yang deep learning based privacy preserving framework for Sep 22 2023 proposed privacy preserving framework for generating synthetic trajectories that consists of four steps 1 privacy preserving trajectory collection for the training dataset using geoind 2 geoind aware location encoding 3 training an aae model using the training dataset collected under ϵ geoind and 4 trajectory generation using the privacyml a privacy preserving framework for machine Aug 21 2023 project privacyml a privacy preserving framework for machine learning we are developing a general framework that enforces privacy transparently enabling different kinds of machine learning to be developed that are automatically privacy preserving *a generic framework for privacy preserving deep learning* Jul 20 2023 we detail a new framework for privacy preserving deep learning and discuss its assets the framework puts a premium on ownership and secure processing of data and introduces a valuable representation based on chains of commands and tensors

privacy preserving deep learning framework

based on mdpi Jun 19 2023 privacy preserving deep learning framework based on restricted boltzmann machines and instance reduction algorithms by alya alshammari and khalil el hindi department of computer science college of computer information sciences king saud university riyadh 11543 saudi arabia author to whom correspondence should be addressed

a novel privacy preserving framework for large scale

graph May 18 2023 a novel privacy preserving framework for large scale graph data publishing authors xiaofeng ding cui wang kim kwang raymond choo hai jin authors info claims ieee transactions on knowledge and data engineering volume 33 issue 2 feb 2021 pp 331 343 doi org 10 1109 tkde 2019 2931903

a learning based declarative privacy preserving

framework Apr 17 2023 at runtime the privacy preserving model takes the input parameters of the query as features and predicts the query results the model is trained over the training samples extracted from the private dataset to be protected

secure privacy preserving and federated machine learning in Mar 16 2023 the field of secure and

privacy preserving ai offers techniques to help bridge the gap between personal data protection and data utilization for research and clinical routine

privmail a privacy preserving framework for secure

emails Feb 15 2023 privmail a privacy preserving framework for secure emails gowri r chandran raine

computer science lncs volume 14345 abstract

a privacy preserving framework integrating federated learning Jan 14 2023 a privacy preserving framework is proposed for wind power forecasting federated learning is to extract shared knowledge across the source domain turbines transfer learning is to update the pre trained global model to fit the target turbine the proposed framework is evaluated on actual datasets abstract

model compression and privacy preserving framework for Dec 13 2022 highlights a novel model compression scheme for fl framework is constructed the scheme can improve the efficiency and protect the privacy at the same time the scheme can perform decryption and decompression of the model simultaneously a comprehensive evaluation is conducted on different datasets abstract

piradar a privacy preserving framework for spatial Nov 12 2022 abstract privacy leakage is a serious issue in spatial crowdsourcing in various scenarios in this paper we study privacy protection in spatial crowdsourcing the main challenge is to efficiently assign tasks to nearby workers without needing to know the exact locations of tasks and workers

a personal privacy preserving framework i let you know who Oct 11 2022 figure 1 illustration of the proposed scheme first we build a comprehensive

taxonomy of the personal aspects collect a benchmark dataset and extract a rich set of privacy oriented features from the ugs second we introduce a taxonomy constrained model to detect the potential privacy leakage

a privacy preserving framework with multi modal data for Sep 10 2022 a privacy preserving framework with multi modal data for cross domain

recommendation cross domain recommendation cdr aims to enhance recommendation accuracy in a target domain with sparse data by leveraging rich information in a source domain thereby addressing the data sparsity problem

dynamic task offloading for resource allocation and privacy Aug 09 2022 kubeedge is an open source system extending native containerized application orchestration and device management to hosts at the edge one of the main disadvantages of edge computing is the lack of an effective resource allocation and privacy preserving framework the objective of this study dynamic task offloading is an important concept in resource allocation and privacy preserving framework
