Botanical Line Drawing 2017-08-20 immersed in our modern fire service community is paul combs paul is the then what for so many of us just when we are leafing through the pages of fire engineering fire rescue and firefighter nation we see one of those drawings the drawings that have helped every one of us with short attention spans we love drawings to learn understand pay attention and to not drift it seems that just when we may be veering left or right there are one of those priceless little drawings that reminds of what we really need to be focused on it s kinda like a friend reminding you to do something but without saying it in front of everyone else just between you me us and paul it s our little secret he knows what the issues are he knows where we need to be reminded he knows when we need to be scolded and he knows when we need to be jacked up against the wall blasted and smacked he knows he knows because he is one of us paul rides the front seat treats the patients extricates the victims and crawls down the halls doing the same stuff we do each day as you enjoy this book and i promise that you will take mental screen shots of his art drawings cartoons the many helping us make choices reminders the ones that really resonate to you personally the ones that stick the ones that may help you not blow that intersection of choice so that you can continue building on the many positive differences you have already made so sit back start turning these pages and enjoy paul s mix of artistic talent and hands on veteran firefighting experiences those experiences and opinions that make us all smile think and most importantly help guide us to do what we signed up to do making a positive difference to those who need us right now deputy chief billy goldfeder efo loveland symmes fire department ohio

Perspective Drawing for Beginners 2012-03-08 what do walking weaving observing storytelling singing drawing and writing have in common the answer is that they all proceed along lines in this extraordinary book tim ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline the anthropological archaeology of the line ingold s argument leads us through the music of ancient greece and contemporary japan siberian labyrinths and roman roads chinese calligraphy and the printed alphabet weaving a path between antiquity and the present drawing on a multitude of disciplines including archaeology classical studies art history linguistics psychology musicology philosophy and many others and including more than seventy illustrations this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it this routledge classics edition includes a new preface by the author

Crazy Hair Day Big Book 2008-08-12 from distinctive portraits and complex photographic tableaux to youtube sensations the work of prominent african photographer roger ballen is given a fresh perspective in this volume for nearly half a century roger ballen has been shooting black and white film a member of the last generation to work in that medium he started his career taking portraits of rural afrikaaners in their homes and has lately been moving toward more staged sets and embellishing his photographs with expressionistic graffiti type drawings this retrospective book follows the development of line and drawing in ballen s body of work which is often characterized by complex interior arrangements of people animals and furnishings in more recent work the artist has come out from behind the camera lens to engage with line more directly including a luminous series of photographs that began with drawing on glass psychologically edgy and seductively beautiful images result this volume also addresses the use of drawing and line in ballen s newest work in videography this astonishing collection reveals the breadth of ballen s work which moves fluidly between photography and drawing harshness and beauty raw expression and technical prowess

Transmission Line Design Manual 1980 from the best selling artist and youtube art instructor this book features step by step lessons that show you how to draw professional quality portraits landscapes travel sketches and animals using only two ordinary pencils great art doesn t have to be expensive for the cost of a regular graphite writing pencil and an equally ordinary black colored pencil you can create drawings worthy of framing and displaying in this straightforward aspiring artist s guide to rendering a variety of popular subjects with only two pencils artist and art instructor mark crilley presents a direct approachable and achievable method for drawing

just about anything the two pencil method breaks down crilley s techniques across six chapters of five lessons each in each lesson you ll learn how the two pencil method can add depth and shading allowing you to create bold and distinctive drawings that go beyond mere sketchbook doodles the book moves from a primer on drawing basics to step by step examples of still lifes landscapes animals travel sketches and portraits with each chapter crilley s confident and encouraging voice and expert insights demonstrate how to achieve stunning artistic results from the simplest of art materials

Line and Form (1900) 2018-09-20 as in the case of the bases of design to which this is intended to form a companion volume the substance of the following chapters on line and form originally formed a series of lectures delivered to the students of the manchester municipal school of art there is no pretension to an exhaustive treatment of a subject it would be difficult enough to exhaust and it is dealt with in a way intended to bear rather upon the practical work of an art school and to be suggestive and helpful to those face to face with the current problems of drawing and design these have been approached from a personal point of view as the results of conclusions arrived at in the course of a busy working life which has left but few intervals for the elaboration of theories apart from practice and such as they are these papers are now offered to the wider circle of students and workers in the arts of design as from one of themselves they were illustrated largely by means of rough sketching in line before my student audience as well as by photographs and drawings the rough diagrams have been re drawn and the other illustrations reproduced so that both line and tone blocks are used uniformly being sacrificed to fidelity walter crane outline one might say is the alpha and omega of art it is the earliest mode of expression among primitive peoples as it is with the individual child and it has been cultivated for its power of characterization and expression and as an ultimate test of draughtsmanship by the most accomplished artists of all time the old fanciful story of its origin in the work of a lover who traced in charcoal the boundary of the shadow of the head of his sweetheart as cast upon the wall by the sun and thus obtained the first profile portrait is probably more true in substance than in fact but it certainly illustrates the function of outline as the definition of the boundaries of form silhouette as children we probably perceive forms in nature defined as flat shapes of colour relieved upon other colours or flat fields of light on dark as a white horse is defined upon the green grass of a field or a black figure upon a background of snow definition of boundaries to define the boundaries of such forms becomes the main object in early attempts at artistic expression the attention is caught by the edges the shape of the silhouette which remains the paramount means of distinction of form when details and secondary characteristics are lost as the outlines of mountains remain or are even more clearly seen when distance subdues the details of their structure and evening mists throw them into flat planes one behind the other and leave nothing but the delicate lines of their edges to tell their character we feel the beauty and simplicity of such effects in nature we feel that the mind through the eye resting upon these quiet planes and delicate lines receives a sense of repose and poetic suggestion which is lost in the bright noontide with all its wealth of glittering detail sharp cut in light and shade there is no doubt that this typical power of outline and the value of simplicity of mass were perceived by the ancients notably the ancient egyptians and the greeks who both in their own ways in their art show a wonderful power of characterization by means of line and mass and a delicate sense of the ornamental value and quality of line formation of letters regarding line the use of outline from the point of view of its value as a means of definition of form and fact its power is really only limited by the power of draughtsmanship at the command of the artist from the archaic potters primitive figures or the rudimentary attempts of children at human or animal forms up to the most refined outlines of a greek vase painter or say the artist of the dream of poliphilus the difference is one of degree

**Drawing and Illustration** 2008-09-25 string art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities this activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds the downside of this highly tactile activity is that it is quite time consuming and rigid by contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously electronic string art rhythmic mathematics invites readers to use the author s digital resources available on the esa website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections features readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections sections are lessons that were created so that they could be digested in a single sitting these sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting an open ended inherently flexible teaching resource for elementary middle and high school level mathematics the most mathematically challenging sections or portions of a section are designated ma and may not be accessible to elementary and middle school readers will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics includes exercises solutions and many online digital resources these qr codes take you to these digital resources one takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in section 25 5 the other takes you to the esa web page with additional links to a variety of resources

**Gunner's Mates School, Class "A"** 2016-12-01 the completely updated illustrated bestseller on architectural graphics with over 500 000 copies sold architectural graphics presents a wide range of basic graphic tools and techniques designers use to communicate architectural ideas expanding
