## **Significance of Tests and Properties of Concrete and Concrete-Making Materials 1985-02**

concrete properties and manufacture describes the properties of concrete including its manufacture and use in civil engineering construction the book first discusses the properties of plastic or wet and hardened concrete the text also describes different concrete materials including cement portland cement slag and high alumina cements and aggregates the selection also looks at the mix design of concrete mix proportioning based on strength and workability mix design for high alumina cement combination of single sized aggregates and nominal mixes are discussed the text also examines the manufacture of concrete handling and batching of materials mixing and placing compaction of concrete and winter concreting are underscored the book also focuses on the resistance of concrete to deterioration resistance of concrete to freezing sewage sulfate attack chemicals fire erosion and abrasion are discussed the text also offers information on surface treatment of concrete and special concrete the selection is a valuable source of information for readers students and graduate and site engineers

## **Significance of Tests and Properties of Concrete and Concrete-Making Materials 1978**

abrasion is the primary type of wear in almost all fields of industry it is particularly relevant to the longevity of pipelines and pumps and to almost all processing industries and applications where a constant interface exists with abrasive substances such as dust sediments or fluids with mineral particles the performance of systems can be degraded depending on the properties of abrasive particles such as size velocity angle of impact and shape furthermore abrasion significantly affects the appearance of end products which can be especially important in applications where surface finishes are of prime importance the use of materials which are resistant to abrasion can help retain the appearance of finished products cut costs associated with maintenance and wear and prevent system downtime materials which are abrasion resistant are useful for situations where serious damage and mechanical wear can occur and where there is critical demand the aim of this book is to evaluate abrasion resistant materials that are already in use or under development as well as to present information on new techniques in the design and application of such materials this book will be of interest to a wide audience of engineers dealing with wear problems

## **Significance of Tests and Properties of Concrete and Concrete Aggregates 1956**

the present volumes comprise papers which will provide comprehensive information on the topics of traditional building materials advanced building materials architectural design architectural art and its theory building technology and science urban planning and design landscape planning and design construction project management architectural environment and equipment engineering ecological architecture engineering management and engineering education monitoring and control of quality engineering sustainable city and regional development the work s up to date and state of the art coverage of the worldwide state of these fields make it an invaluable resource

## ***Concrete 2016-10-13***

in search of the romans is a lively and informative introduction to ancient rome making extensive use of ancient sources and copiously illustrated with photographs drawings maps and plans now for the first time in colour its opening two chapters guide the reader through the events of roman history from the foundation of the city to the fall of the empire subsequent chapters introduce the most important aspects of the roman world the army and the provinces religion society and entertainment the final two chapters focus on pompeii and herculaneum the two cities destroyed by vesuvius new to this edition are sections on the augustan principate on the roman army on life in the provinces and on engineering innovations while the existing text is revised throughout the narrative includes descriptions of many individuals from the roman world drawn from a variety of social settings activity boxes and further reading lists throughout each chapter aid students understanding of the subject review questions challenge students to read further and reflect on some of the most important social political and cultural issues of ancient rome as well as to compare them with those of their own society the new edition is supported by a website that includes images maps and timelines further reading and related links

## **Cement and Concrete 1974**

this title is based on the workshop on transport properties concrete quality held at the campus of arizona state university on october 10 12 2005 during this meeting scientific aspects of the relevant relationships between materials mechanisms processes and service life were discussed provides a useful resource for understanding the most valuable aspects of cement based materials with topics ranging from the current state of practice to theory simulation and testing and specifications logically

organized and carefully selected articles give insight into the need to better integrate aspects of materials science mechanics modeling and testing in developing tools of understanding the durability in cement based materials

## **Special Cements for Mass Concrete 1936**

this is a compilation of the principal specifications and test methods that are referenced as a part of the two astm standards for ready mixed concrete astm c 94 standard specification for ready mixed concrete and astm c 685 standard specification for concrete made by volumetric batching and conti

## **Handbook for Concrete and Cement 1942**

this book presents the select proceedings of the international conference on advances in construction materials and management acmm 2021 it discusses the recent innovations towards construction management building technology and new materials in practice in civil engineering various topics covered include architecture and urban planning smart materials and structures gis in construction application transportation materials and engineering geotechnical applications in construction energy and sustainability green building technologies and materials and construction management the book will be useful for beginners researchers and professionals working in the area of civil engineering

## **Report 38: Durability of Self-Compacting Concrete – State-of-the-Art Report of RILEM Technical Committee**

### **205-DSC 2007**

the description for this book robert maillart s bridges the art of engineering will be forthcoming

## **Abrasion Resistance of Materials 2012-03-16**

the goal of the special issue brittle materials in mechanical extremes is to spark a discussion of the analogies and the differences between different brittle materials

such as ceramics and concrete the contributions to the issue span from construction materials asphalt and concrete to structural ceramics to ice data reported in the issue were obtained by advanced microstructural techniques microscopy 3d imaging etc and linked to mechanical properties and their changes as a function of aging composition etc the description of the mechanical behavior of brittle materials under operational loads for instance concrete and ceramics under very high temperatures offers an unconventional viewpoint on the behavior of such materials while it is by no means exhaustive this special issue paves the road for the fundamental understanding and further development of materials

## **Advanced Building Materials and Sustainable Architecture 2012-05-14**

provides a review of the repair maintenance and protection of concrete bridges this book summarizes information from conference papers research and technical reports and others it aims to increase the expertise of structural engineers and safeguard the investment it presents solutions to the problems and pitfalls that engineers encounter

## ***Highways 1947***

nsa is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious inis database which began in 1970 nsa existed as a printed product volumes 1 33 initially created by doe s predecessor the u s atomic energy commission aec nsa includes citations to scientific and technical reports from the aec the u s energy research and development administration and its contractors plus other agencies and international organizations universities and industrial and research organizations references to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included abstracts and full text are provided if available

## **Miscellaneous Publication 1931**

pinney covers new ground and new research and treats the entire period in a new way history of wine in america will be welcomed by scholars and by wine enthusiasts dr james lapsley university of california davis a worthy successor to pinney s landmark history of wine in america from the beginnings to prohibition and like that volume

evidencing a wealth of knowledge presented with grace and style in addition to telling fascinating stories both of these books are invaluable references anyone interested in the history of american wine should read them paul lukacs author of american vintage the rise of american wine i am confident the term definitive will apply to this work for innumerable vintages to come wine lovers from new england to california now have one place to turn for the history of their favorite beverage wherever in america its grapes are grown charles l sullivan author of a companion to california wine and zinfandel an essential reference book for anyone wishing to sound authoritative at the dinner table bruce cass editor of the oxford companion to the wines of north america
