101 Answers from the Universe 2018-09-25 what exactly is the big bang theory what came before it what is a black hole how do we know the universe is expanding these are only five of 50 questions leading North American astronomer Terence Dickinson answers here from the many asked during his lectures and interviews in his bestselling *Down to Earth* style Dickinson unravels the mysteries of the cosmos

The Universe Explained 1993 there have been many books written about the theory of evolution probably your first thought here is that this is just one more book on the subject and you are right however this one has a different twist to it this one asks questions about the subject matter where answers have not been forthcoming taking a layman's approach to addressing the subject matter the author writes as though the reader is bringing nothing to this reading experience except a curiosity this book was not written for those of the scientific community per se there are quite a few questions that the author feels stand in the way of acceptance of the theory and remain unanswered these are brought to the forefront amid informative background knowledge of life and it's beginning and of necessity an opposing view that of course would be intelligent design intriguing topics addressed by others are presented such as the big bang beginning of the universe or the discovery of a particle found to exist that's smaller even than the parts of an atom i.e. smaller than the proton the neutron even the electron dark energy and it's possible catastrophic results on the universe are briefly discussed as well as the information stored in DNA in all living cells which is the design criteria for life so you see the discussions are made purposely broad to offer the reader the necessary background for his better understanding of the subject matter

From the Big Bang to Planet X 2011-02-25 Kreeft uses scripture to provide God's answers to the most common and important questions young people ask about the deeper meaning of life their own identity overcoming failure and temptation the mystery of God's love and much more but these are questions asked not just by teens they are the same questions adults often ask and God's answers as found in the Bible respond to the deepest needs of people of all ages

If Evolution Is The Answer Then What's The Question 2017-06-22 no philosophical idea no matter how small can live alone ideas always gain their force power and life from their surroundings their ecosystem the ecosystem of ideas defended in this book comes from the ancient Greek philosopher Aristotle and his medieval interpreter Thomas Aquinas the ongoing relevance of their philosophical thought to twenty first century issues is opened up in fascinating ways in this book life the universe and everything is the product of thirty years of teaching introductory courses in philosophy assuming no prior background it only requires of readers an enquiring mind and a willingness to think carefully an ideal guide to the big questions we face

Your Questions, God's Answers 2012-03-29 uncertainty is the essence of the human condition and nothing is more uncertain than God yet passions run hot when it comes to God both among believers and non believers God is a question not an answer aims to unsettle readers on both sides of the issue William Irwin argues that because belief occurs along a continuum of doubt and we can never reach full certainty believers and non believers can find common ground in uncertainty beginning with the

questions of what we mean when we talk about god and faith irwin shows that from a philosophical perspective the tendency to doubt is a virtue and from a religious perspective there is no faith without doubt rather than avoid uncertainty as an uncomfortable state of emotional despair we should embrace it as an ennobling part of the human condition we do not have to agree about the existence of god but we do need to practice intellectual humility and learn to see doubt as a gift by engaging in civil discourse we can see those who disagree with us as not only fully human but capable of teaching us something

Life, the Universe, and Everything 2018-12-03 did god create life or did the world spontaneously appear drawing on meticulous research into the scientific and religious realms our universe is a detailed study of the origin of the universe life on earth and the destiny of mankind biophysics professor faiz m khan combines both faith and science to present a balanced overview of a highly controversial topic khan explores the scientific analysis of creation with knowledge based dialogue about the most modern scientific thought on the beginnings of the universe cosmic evolution and biologic evolution and he contrasts these with the creationist view held by the world s major religions concise and compelling our universe provides an unbiased and comprehensive view of some of philosophy s most debated topics and serves as a thoughtful springboard for further discussion khan s discourse also reflects one man s painstaking quest for an answer to a fundamental question at the very core of our existence *God Is a Question, Not an Answer* 2007-07 final questions is a term used by the australian philosopher karl r popper which indicates a field of philosophy in which popper would esteem scientific proof impossible the field is also called metaphysics in this book thea and bruno discuss the problems of god s existence eternal love and spirit life after death good and evil evolution and creation they do it in their modified socratic midwifery method the reader can follow the birth of thought as it emerges in a mixture of logical discipline and spontaneous reaction he can pause and pursue his own promptings he is not confronted with ready made results but involved in a discourse that is open ended and comprehensible

Our Universe 2023-03-22 was matter necessary for a big bang to occur what scientific evidence is there that our universe was really formed by a big bang are the laws of physics responsible for the formation of our universe can mathematics verify the formation of our universe what is the scientific method why is it important why must it be used what is a scientific theory how must a scientific theory be obtained is life on earth here because of panspermia was our universe created by god are science and religion compatible is life on earth made up of stardust

Final Questions - And No Answers? 2021-08-30 how did we get here and why are we here enjoy an enthralling journey into logic religion physics and philosophy for an overarching examination of the contingency of life from a purely objective and logical perspective in the quest for answers to the age old questions about life an afterlife and the universe learn of considerations that make some theories just not work and how the most important consideration has been left out one s personal existence neither the universe created

The Formation of Our Universe 2017-10-17 there are so many unknowns in life and finding answers to some of the bigger questions can be a challenge a humble universe presents short chapters that look to explain some of these questions in an easily digestible and understandable way although brief in nature there is plenty of food for thought that will let you quickly digest the author s point of view whilst reflecting on your own once combined you might be surprised at the new channels of thought it may awaken within your own consciousness that may allow you to look at your worldview in a completely new and refreshing light excerpt just like you know when you re driving a car in the center of the lane and not hitting the lane markers on either side so too does your stomach tell you when you are on the right pathway the right roadmap it feels good but when you are starting to stray from your personal roadmap the energy flowing to the nerve endings in your stomach gets disrupted and the muscles start to tighten alerting you that something isn t right that you re straying off the highway topics explored why did the universe begin what is the purpose of life what happens after we die astrology intuition and synchronicity freewill versus predestination ufos what is the purpose of prayer keeping the sabbath the power of one why is there conflict in health care mental health why are genders starting to fuse visualization and positive thinking what are emojis teaching us karma and raising your vibration the future author nachum has been involved in the healing arts for over twenty five years and has been interested in philosophical thought for much longer he is interested in all things to do with health and believes putting energy into preventing disease is a lot more beneficial than trying to cure one likewise when it comes to matters of the mind he is both keen to share his thoughts as well as hear those of others he understands that whilst there are many mysteries that a person will never understand that won t stop the trying

Nauscentrism: Answers to the Mystery Questions of Life 2021-01-18 this book of questions and answers will help you in those moments when you feel the need to know what the universe wants to send you

A Humble Universe 2022-10-11 from page to page the attentive reader will not escape a stir of one s inner essence regarding the fundamental issues of life he opens the lid to life s essentials inviting thorough considerations to the origin of the universe the potential vested in each human life and the bubble of the evolution theory and so called science this discourse is for those searching for answers and inspiration it will call the frivolous soul to attention and demand duty from its bearers it s a wakeup call to the slothful and a harsh reminder to the proud but it s more than that this book identifies with all who are poised to accomplish their dreams it unleashes a strong sense of purpose that would resurrect lost aspirations and ignite flames of achievement and eternal outcomes the issues raised demand your thorough attention if you will profit from the wisdom shared they are instructive to the thinking mind this book is a treasure field but it must be mined so while you read heed the urge to purposefully pause reflect

and precipitate the cogitations of your mind it will do you eternal good

Answers to Life's Foundational Questions 2022-12-06 presentation this book covers the answers to the questions that arise during the training lessons on becoming metaphysics metaphysics noetics religions history of religions esoteric behavioral sciences our behaviors development secrets esoteric occult enoch wisdom and many other questions asked by those who attended the training were answered by mustafa karnas and this question was named as being metaphysical with answers educational information is included in this book in the following five subjects being metaphysical 1 managing your own life 2 managing the flow of events 3 leading the flow of destiny 4 managing the future 5 managing information mustafa karnas being metaphysical our topic is to manage the flow of destiny how will we manage our destiny how easy it is but hard when you don't know let's examine the question of what is to know knowing is like opening matryoshka dolls you go to the deepest knowing at every trench becomes a function what else is to know knowing is holding holding is determining a space between references that is knowing is measuring the only reason we know is because we can measure what we measure is what we perceive what we perceive means something other than references created by what we know what we know is what we learned by measuring knowing also means understanding by changing the measures with each change of measure or reference the shape of the information also changes so the knowing function continues by updating the previously known with these constantly changing references even if the information is the same with the measurements forming a different judgment on everyone the projection of everyone will be different knowing can only happen with the approval of others so we know what we know only in others we cannot know anything in ourselves the most important of the references that tell us what we know are their projections reflections for example if we hear ringing bells in a rural area even if we do not see it he tells us that there is a sheep goat cow herd in a place we cannot see but can hear in the future with a shepherd and shepherd dogs just a bell and a bell show that we know all these things and if we turn it on we will move away from the sound if we are afraid of the shepherd dog attack but if we need help we approach the sound and so on we know because everything we know exists on a scale if it did not exist on a measure nothing we know would be because we will never see what we see again so every we see will be what we do not know and we would never know although never knowing is a true reality the only reason we know is that human perception violated by the law of uncertainty has created constants for itself within the existing laws of existence that is we are bodies and souls trapped in a continuous repetition of the like in a cyclical hermetic matrix therefore the flow which is in fact uncertainty becomes a reality in a narrow space within us and the measurements we make in that area are always stable so we know or we would never have known the way we know something is influenced by the way the brain processes it the brain processes information compares the two when a new flow of information arrives and orders the motor cortex accordingly so the only reason we know is because the measurements are stored in snaps stability and stability is that the brain arranges a mess in its own way for example you go to visit someone there is a dog at the door the man says don't be afraid they won't bite you don't have this information you have it again you go to a yacht for a guest screams coming from the upper floor at 12 at night you worry you say don't be afraid there is nothing the man is watching a movie these are the information that everybody gets by measuring the motor cortex and snaps what else is measuring does anyone have an idea another concept means to measure measure means destiny we have created you on a scale that is we have created you on a fate our subject is destiny so as long as you stay within the measured your destiny is determined if the measurements change the fate also changes because the main thing is the law that is the law of measure appears as projective realities in the form of an array of possibilities in every measurement but when there is an action to change the measurement a new measurement is made subject to another law of creation therefore the only fate determined is laws that is the rules of the laws of measurement never change but the fate of the person changes with different laws and measurements whose destiny is the fate mentioned and let's come to the subject of death whose term is the term with whom is the agreement made
