in globalising intellectual property rights matthews looks at various aspects of the trips agreement agenda setting legal interpretation implementation enforcement and revision from the viewpoint of global business interests and developing countries it is argued that the agreement was largely the result of an initiative by multinational companies who sought to protect their own intellectual property through international law and furthermore that it is these multinational companies who are now its main guardians the book concludes that the history of the trips agreement and the role of business is a clear example of governance by non state actors on a global scale this book will be of interest to students and researchers in the fields of international relations intellectual property law international economic law and development studies

this basic guide to intellectual property law from the point of view of international commerce clearly demarcates the ground on which any contract involving intellectual property must be based it describes and analyzes the legally valid guidelines by which any commercial entity may facilitate the sale of a protected product in foreign markets prevent the use of protected property by competitors at home and abroad and forestall the manufacture abroad of identical or misleadingly similar items the author considers both the variety of national requirements and the international intellectual property regime that is now in place under the wto gatt the world intellectual property organization wipo and multilateral treaties in connection with both technology and proprietary information emphasis is on the need to determine on a country by country basis which ideas are subject to intellectual property protection which persons can seek and obtain intellectual property protection which special use permits may apply and which technical requirements must be met basics of international intellectual property law is a fundamental resource for any business person or counsel considering entry into foreign markets the information and guidance it provides is easy to understand and use and will help any cross border business venture to proceed smoothly and successfully published under the transnational publishers imprint

## Globalising Intellectual Property Rights

it is becoming increasingly evident that traditional sovereignty is simply out of date instead what we might call cooperative sovereignty which focuses on communication and interaction is more responsive to the realities of interdependent economies in the twenty first century nowhere is this more salient than in the area of dispute resolution especially as labour intellectual property and the environment can no longer be evaded in trade negotiations this ground breaking book suggests that it is this shift in perspective that has given rise to the proliferation of regional trade agreements rtas and the inevitable overlaps and tensions between their provisions and those of the world trade organization wto the author examines this phenomenon in great detail and offers viable recommendations to restore coherence in the global trading system without upsetting the rights and obligations of wto member states because the wto and rtas must be viewed as layers of one system and must therefore have a relationship that extends to dispute settlement such principles of subsidiarity as autonomy mutual assistance and flexibility are key to a successful institutional relationship between the wto and rtas from this theoretical springboard the author proceeds to analyse the following issues and more the relationship between wto and rtas based on article xxiv of gatt the extent to which wto panels can apply rta law the extent to which the wto panels can hear rta claims opportunity for rta members to secure preliminary rulings and advisory opinions from the wto recognition by wto panels of the results of litigation or arbitration that took place at the rta level opportunity for rta members to appeal rta dispute settlement decisions to the wto and clarification of wto rules designed to enable rta activities or intervene if necessary major cases decided at the wto and rta levels that manifest conflict between rtas and the wto are fully analysed confronting directly the stagnation in negotiating and concluding new trade agreements at the multilateral level and the fragmentation of the international trade law system this important book shows clearly how the institutional relationship between the wto and rtas can be restructured with a view to establishing mutual recognition of the judgments of both in a nutshell the book calls for reconfiguration of wto dispute settlement body to perform functions of world trade court that is capable of hearing disputes arising between wto members rta members and non wto members it will prove invaluable to all involved in the negotiation and implementation of trade agreements at every level

non tariff measures are generally defined as policy measures other than ordinary customs tariffs that can

potentially have an economic effect on international trade in goods changing quantities traded or prices or both since this definition is broad a detailed classification is of critical importance so as to better identify and distinguish among the various forms of non tariff measures the classification of non tariff measures presented here is a taxonomy of all those measures considered relevant in international trade today it builds on an old unctad classification known as the coding system of trade control measures and was developed by several international organizations forming what is called the mast group multi agency support team set up to support the group of eminent persons on non tariff barriers established by the secretary general of unctad in 2006 the mast team discussed and proposed this classification and is composed of fao imf itc oecd unctad unido world bank and wto the classification is seen as evolving and should adapt to the reality of international trade and data collection needs
