the book focuses on application of performance analysis tools not the theory of performance management this text is an effective learning tool for students in analytical technique courses in public administration and policy programs with other texts students may learn about a statistical concept and calculation but still don't understand the managerial context where the statistical tool applies consequently they often fail to understand the managerial importance of statistical tools they learn and worse fail to recognize the correct tool to use when a managerial issue rises this book corrects this problem by providing a managerial context that bridges statistical concepts and the managerial reality the managerial context is performance management in which performance data are presented monitored and analyzed it is in this performance management context that the usefulness and applicability of statistical tools are illuminated for the learner book jacket chen and dahlman assess the effects of knowledge on economic growth by using an array of indicators each of which represents an aspect of knowledge as independent variables in cross section regressions that span 92 countries for the period 1960 to 2000 they show that knowledge is a significant determinant of long term economic growth in particular the authors find that the stock of human capital the level of domestic innovation and technological adaptation and the level of information and communications technologies ict infrastructure all exert statistically significant positive effects on long term economic growth more specifically with regard to the growth effects of the human capital stock they find that an increase of 20 percent in the average years of schooling of a population tends to increase the average annual economic growth by 0.15 percentage point in terms of innovation the authors find that a 20 percent increase in the annual number of uspto patents granted is associated with an increase of 3.8 percentage points in annual economic growth lastly when the ict infrastructure measured by the number of telephones per 1 000 persons is increased by 20 percent they find that annual economic growth tends to increase by 0.11 percentage point this paper a product of the global knowledge and learning division world bank institute is part of a larger effort in the institute to assess the effects of knowledge on economic development world bank web site the nature of theory and research in social psychology aims to provide advanced undergraduate and graduate students with a
