when people settle in one place they often express a desire to clarify their place in the world through the creation of small self contained worlds these small worlds help orient people within the greater world by creating centers and boundaries around and within which the events of life take place one s identity is contingent on the sense of belonging to a place the creation of place and entry is a fundamental human activity enacted by all humans beginning with the archetypal children s game of creating houses for themselves under tables in boxes or out of found materials 2 small worlds take form in many shapes on many scales from individual rooms and buildings to complete communities and cultures each imaginable as a whole though connected through thresholds to larger realities the act of settling in a place was often mythologized as the creation of the world and the creation of a sacred place has principally provided the existential means for people to establish a center and thus define their place in the world 3

## **The Tools of Metaphysics and the Metaphysics of Science 2020**

the central question in this book is why it seems reasonable for the words of our language to divide up the world in ordinary ways rather than other imaginable ways hirsch calls this the division problem his book aims to bring this problem into sharp focus to distinguish it from various related problems and to consider the best prospects for solving it in exploring

various possible responses to the division problem hirsch examines series of division principles which purport to express rational constraints on how our words ought to classify and individuate the ensuing discussion deals with a wide range of metaphysical and epistemological topics including projectibility and similarity alternative analyses of natural properties and things the inscrutability of reference and the relevance of such pragmatic notions as salience and economy the final chapters of the book develop what hirsch contends is the most promising response to the division problem a theory in which constraints on classification and individuation are seen to derive from the necessary structure of fine grained propositions and the necessary dependence of some concepts on others

a new history explains how and why as it prepared to enter world war ii the united states decided to lead the postwar world for most of its history the united states avoided making political and military commitments that would entangle it in european style power politics then suddenly it conceived a new role for itself as the world s armed superpower and never looked back in tomorrow the world stephen wertheim traces america s transformation to the crucible of world war ii especially in the months prior to the attack on pearl harbor as the nazis conquered france the architects of the nation s new foreign policy came to believe that the united states ought to achieve primacy in international affairs forevermore scholars have struggled to explain the decision to pursue global supremacy some deny that american elites made a willing choice casting the united states as a reluctant power that sloughed off isolationism only after all potential competitors lay in ruins others contend that the united states had always coveted global dominance and realized its ambition at the first opportunity both views are wrong as late as 1940 the small coterie of officials and experts who composed the u s foreign policy class either wanted british

preeminence in global affairs to continue or hoped that no power would dominate the war however swept away their assumptions leading them to conclude that the united states should extend its form of law and order across the globe and back it at gunpoint wertheim argues that no one favored isolationism a term introduced by advocates of armed supremacy in order to turn their own cause into the definition of a new internationalism we now live wertheim warns in the world that these men created a sophisticated and impassioned narrative that questions the wisdom of u s supremacy tomorrow the world reveals the intellectual path that brought us to today s global entanglements and endless wars
