here is a rhetorical treatment of karl barth s early theology although scholars have long noted the rhetorical power of barth s work calling it volcanic and explosive this book uses rhetoric to illuminate the peculiar nature of his prose it displays a barth whose prose is radically unstable and inseparable from his theological arguments the author connects barth s early theology to the expressionism of the weimar republic he develops an original theory of figures of speech relying on the philosophies of paul ricoeur and hayden white to delve more deeply into the particular configurations of barth s writings nietzsche s hyperbole and kierkegaard s irony are examined as rhetorical precedents of barth s style the closing chapter surveys barth s later realistic theology and then suggests ways in which his earlier tropes especially the figures of excess and self negation can serve to enable theology to speak today
