Identifying Birds by Colour 2017-12-07

it has become a universal custom to obtain and preserve the likenesses of one's friends photographs are the most popular form of these likenesses as they give the true exterior outlines and appearance except coloring of the subjects but how much more popular and useful does photography become when it can be used as a means of securing plates from which to print photographs in a regular printing press and what is more astonishing and delightful to produce the real colors of nature as shown in the subject no matter how brilliant or varied we quote from the december number of the ladies home journal an excellent suggestion was recently made by the department of agriculture at washington that the public schools of the country shall have a new holiday to be known as bird day three cities have already adopted the suggestion and it is likely that others will quickly follow of course bird day will differ from its successful predecessor arbor day we can plant trees but not birds it is suggested that bird day take the form of bird exhibitions of bird exercises of bird studies any form of entertainment in fact which will bring children closer to their little brethren of the air and in more intelligent sympathy with their life and ways there is a wonderful story in bird life and but few of our children know it few of our elders do for that matter a whole day of a year can well and profitably be given over to the birds than such study nothing can be more interesting the cultivation of an intimate acquaintanceship with our feathered friends is a source of genuine pleasure we are under greater obligations to the birds than we dream of without them the world would be more barren than we imagine consequently we have some duties which we owe them what these duties are only a few of us know or have ever taken the trouble to find out our children should not be allowed to grow to maturity without this knowledge

the more they know of the birds the better men and women they will be we can hardly encourage such studies too much of all animated nature birds are the most beautiful in coloring most graceful in form and action swiftest in motion and most perfect emblems of freedom they are withal very intelligent and have many remarkable traits so that their habits and characteristics make a delightful study for all lovers of nature in view of the facts we feel that we are doing a useful work for the young and one that will be appreciated by progressive parents in placing within the easy possession of children in the homes these beautiful photographs of birds the text is prepared with the view of giving the children as clear an idea as possible of haunts habits characteristics and such other information as will lead them to love the birds and delight in their study and acquaintance

My Numbers Early Birds Book 2017

this book is based on a story told by mary albert of the bardi people to aboriginal children living in broome western australia the illustrations are adapted from their paintings of the story mary albert said would you like to hear a story from long ago my mother used to tell me lots of stories but this story i loved the best because i loved the birds

Amazing Birds 2020-12

he goldfinch who lives in europe is one of the gaudiest of the little feathered brothers heis a very joseph of birds in his coat of many

colors and folk often wonder how he came to have feathers so much more gorgeous than his kindred but after you have read this tale you will wonder no longer you must know that when the father first made all the birds they were dressed alike in plumage of sober gray but this dull uniform pleased him no more than it did the birds themselves who begged that they might wear each the particular style which was most becoming and by which they could be recognized afar so the father called the birds to him one by one as they stood in line and dipping his brush in the rainbow color box painted each appropriately in the colors which it wears to day except indeed that some had later adventures which altered their original hues as you shall hear in due season but the goldfinch did not come with the other birds that tardy little fellow was busy elsewhere on his own affairs and heeded not the father's command to fall in line and wait his turn for being made beautiful so it happened that not until the painting was finished and all the birds had flown away to admire themselves in the water mirrors of the earth did the goldfinch present himself at the father's feet out of breath o father he panted i am late but i was so busy pray forgive me and permit me to have a pretty coat like the others you are late indeed said the father reproachfully and all the coloring has been done you should have come when i bade you do you not know that it is the prompt bird who fares best my rainbow color box has been generously used and i have but little of each tint left yet i will paint you with the colors that i have and if the result be ill you have only yourself to blame the father smiled gently as he took up the brush which he had laid down and dipped it in the first color which came to hand this he used until there was no more when he began with another shade and so continued until the goldfinch was completely colored from head to foot such a gorgeous coat his forehead and throat were of the most brilliant crimson his cap and sailor collar were black his back was brown and yellow his breast white his wings golden set off with velvet black and his tail was black with white tipped feathers certainly there was no danger of

his being mistaken for any other bird when the goldfinch looked down into a pool and saw the reflection of his gorgeous coat he burst out into a song of joy i like it oh i like it he warbled and his song was very sweet oh i am glad that i was late indeed i am dear father
