this book is an abridgement of barr and diamond s reforming pensions principles and policy choices oup 2008 it begins with the introduction to the earlier book includes the concluding chapters to the sections on principles and on policy choices and the concluding policy chapter to the book it summarizes the chile and china chapters into a section of five pages it presents material from some of the boxes of the longer book while the longer book remains as a definitive and detailed analysis of pension reform this new shorter book conveys the message and conclusions to policy makers journalists writing for the general public and students being introduced to social security and other pension policy the topic being condensed and summarized here is described at length in the earlier book it stems from rapidly changing economic conditions and dramatic increases in life expectancy newspaper headlines across the globe anticipate again and again a massive rupture of social security and retirement systems with public fears on the rise officials in many countries under pressure to solve problems quickly are turning their backs on traditional pay as you go systems in favor of privately financed retirement plans barr and diamond demonstrate that in the age of globalization these problems are no longer simply domestic problems because trade borders are becoming increasingly open and digital transactions are hastily erasing national economic boundaries countries are no longer able to act independently in setting pension policies these problems are particularly exacerbated in china a state where massive restructuring of state owned enterprises and comparatively recent dynamic entry into global markets have already taxed a system whose enormous burden is to support the retirement of the world s largest national population the authors address these issues comprehensively in a thorough survey of pension economic principles and application to china

this paper provides a quantitative evaluation of the macroeconomic distributional and fiscal effects of three reform proposals for germany i a reduction in the social security tax in the low wage sector ii a publicly financed expansion of full day child care and full day schooling and iii the further deregulation of the professional services sector the analysis is based on a macroeconomic model with physical capital human capital job search and household heterogeneity all three reforms have positive short run and long run effects on employment wages and output the quantitative effects of the deregulation reform are relatively small due to the smal size of professional services in germany policy reforms i and ii have substantial macroeconomic effects and positive distributional consequences ten years after implementation reforms i and ii taken together increase employment by 1 6 percent potential output by 1 5 percent real hourly pre tax wages in the low wage sector by 3 percent and real hourly pre tax wages of women with children by 2 7 percent the two reforms create fiscal deficits in the short run but they also generate substantial fiscal surpluses in the long run they are fiscally efficient in the sense that the present value of short term fiscal deficits and long term surpluses is positive for any interest discount rate less than 9 percent

the growing disconnect between china s market oriented economy with its emerging civil society and the brittle anacronistic and authoritarian state has given rise to intense discussion and debate about political reform not only by western observers but also among chinese intellectuals while some expect china s political reform to lead to democratization others have proposed to strengthen the institution of single party rule and provide it with a solid legal base this book brings the ongoing debate to life and explores the options for political reform offering the perspectives of both western and chinese scholars it presents the controversial argument for building a consultive rule of law regime as an alternative to liberal democracy it provides several critiques of this thesis and then tests the thesis through empirical studies on the development of the rule of law in china

why and how has china succeeded as a developmental state despite a seemingly rents ridden bureaucracy following conventional wisdom weberian bureaucracies are an institutional precondition for development especially in interventionist states like china however my research finds that china s fast growing economy has not been governed by a purely salaried civil service instead chinese bureaucracies still remain partially prebendal at every level of government each office systematically appropriates authority to generate income for itself my study unravels the paradox of developmentalism without weberianness by illuminating china s unique path of bureaucratic adaptation in the reform era labeled as bureau contracting where contracting takes place within the state bureaucracy in a bureau contracting structure the state at each level contracts the tasks of governance to its own bureaucracies assigning them revenue making privileges and property rights over income earned in exchange for services rendered contrasting previous emphases on the prevalence of illicit corruption in china my study shows how and why bureaucracies in this context are actually authorized by the state to profit from public office specifically i identify two factors that constrain arbitrary and excessively predatory behavior among chinese bureaucracies first mechanisms of rents management and second the mediation of narrow departmental interests by local developmental incentives in short i argue that it is the combination of an incentive compatible fiscal design and increasingly sophisticated instruments of oversight that have sustained an otherwise unorthodox structure of governance in china in a phrase bureau contracting presents a high powered but opportunistic alternative to the weberian ideal type the chinese experience suggests that market compatible bureaucratic institutions need not necessarily conform to and may even diverge significantly from standard western models at least at early stages of development my research draws on interviews with 165 cadres across different regions and governmental sectors as well as statistical analysis of previously unavailable budget data

State, Market, and Bureau-contracting in Reform China 2009

this frank and courageous book explores the persistence of failure in today s urban schools at its heart is the argument that most education policy discussions are disconnected from the daily realities of urban schools especially those in poor and beleaguered neighborhoods charles m payne argues that we have failed to account fully for the weakness of the social infrastructure and the often dysfunctional organizational environments of urban schools and school systems the result is that liberals and conservatives alike have spent a great deal of time pursuing questions of limited practical value in the effort to improve city schools payne carefully delineates these stubborn and intertwined sources of failure in urban school reform efforts of the past two decades yet while his book is unsparing in its exploration of the troubled recent history of urban school reform payne also describes himself as guardedly optimistic he describes how in the last decade we have developed real insights into the roots of school failure and into how some individual schools manage to improve he also examines recent progress in understanding how particular urban districts have established successful reforms on a larger scale drawing on a striking array of sources from the recent history of various urban school systems to the growing sophistication of education research to his own experience as a teacher scholar and participant in reform efforts payne paints a vivid and unmistakably realistic portrait of urban schools and reforms of the past few decades so much reform so little change will be required reading for everyone interested in the plight and the future of urban schools

china has become deeply integrated into the world economy yet gradual marketization has facilitated the country s rise without leading to its wholesale assimilation to global neoliberalism this book uncovers the fierce contest about economic reforms that shaped china s path in the first post mao decade china s reformers were sharply divided they agreed that china had to reform its economic system and move toward more marketization but struggled over how to go about it should china destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators with hindsight the historical record proves the high stakes behind the question china embarked on an economic expansion commonly described as unprecedented in scope and pace whereas russia s economy collapsed under shock therapy based on extensive research including interviews with key chinese and international participants and world bank officials as well as insights gleaned from unpublished documents the book charts the debate that ultimately enabled china to follow a path to gradual reindustrialization beyond shedding light on the crossroads of the 1980s it reveals the intellectual foundations of state market relations in reform era china through a longue durée lens overall the book delivers an original perspective on china s economic model and its continuing contestations from within and from without
