Frontiers in New Media Research 2013-05-07 this volume puts together the works of a group of distinguished scholars and active researchers in the field of media and communication studies to reflect upon the past present and future of new media research the chapters examine the implications of new media technologies on everyday life existing social institutions and the society at large at various levels of analysis macro level analyses of changing techno social formation such as discussions of the rise of surveillance society and the fifth estate are combined with studies on concrete and specific new media phenomena such as the rise of pro am collaboration and fan labor online in the process prominent concepts in the field of new media studies such as social capital displacement and convergence are critically examined while new theoretical perspectives are proposed and explicated reflecting the inter disciplinary nature of the field of new media studies and communication research in general the chapters interrogate into the problematic through a range of theoretical and methodological approaches the book should offer students and researchers who are interested in the social impact of new media both critical reviews of the existing literature and inspirations for developing new research questions

Media Ownership 2013 do copyright laws directly cause people to create works they otherwise wouldn't create do those laws directly put substantial amounts of money into authors' pockets does culture depend on copyright are copyright laws a key driver of competitiveness and of the knowledge economy these are the key questions william patry addresses in how to fix copyright we all share the goals of increasing creative works ensuring authors can make a decent living furthering culture and competitiveness and ensuring that knowledge is widely shared but what role does copyright law actually play in making these things come true in the real world simply believing in lofty goals isn't enough if we want our goals to come true we must go beyond believing in them we must ensure they come true through empirical testing and adjustment patry argues that laws must be consistent with prevailing markets and technologies because technologies play a large although not exclusive role in creating consumer demand markets then satisfy that demand patry discusses how copyright laws arose out of eighteenth century markets and technology the most important characteristic of which was artificial scarcity artificial scarcity was created by the existence of a small number gatekeepers by relatively high barriers to entry and by analog limitations on copying markets and technologies change in a symbiotic way patry asserts new technologies create new demand requiring new business models the new markets created by the internet and digital tools are the greatest ever barriers to entry are low costs of production and distribution are low the reach is global and large sums of money can be made off of a multitude of small transactions along with these new technologies and markets comes the democratization of creation digital abundance is replacing analog artificial scarcity the task of policymakers is to remake our copyright laws to fit our times our copyright laws based on the

eighteenth century concept of physical copies gatekeepers and artificial scarcity must be replaced with laws based on access not ownership of physical goods creation by the masses and not by the few and global rather than regional markets patry s view is that of a traditionalist who believes in the goals of copyright but insists that laws must match the times rather than fight against the present and the future

How to Fix Copyright 2012-01-02 the concentration of private power over media has been the subject of intense public debate around the world critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation but others believe with equal fervor that the internet and deregulation have opened the media landscape significantly how concentrated has the american information sector really become what are the facts about american media ownership in this contentious environment eli noam provides a comprehensive and balanced survey of media concentration with a methodical scientific approach he assembles a wealth of data from the last 25 years about mass media such as radio television film music and print publishing as well as the internet telecommunications and media related information technology after examining 100 separate media and network industries in detail noam provides a powerful summary and analysis of concentration trends across industries and major media sectors he also looks at local media power vertical concentration and the changing nature of media ownership through financial institutions and private equity the results reveal a reality much more complex than the one painted by advocates on either side of the debate they show a dynamic system that fluctuates around long term concentration trends driven by changing economics and technology media ownership and concentration in america will be essential reading and a trove of information for scholars and students in media telecommunications it economics and the history of business as well as media industry professionals business researchers and policy makers around the world critics and defenders of media trends alike will find much that confirms and refutes their world view but the next round of their debate will be shaped by the facts presented in this book

Digital Millennium Copyright Act - 2005 Supplement 2005 in the tradition of phil knight s shoe dog comes the incredible untold story of how netflix went from concept to company all revealed by co founder and first ceo marc randolph once upon a time brick and mortar video stores were king late fees were ubiquitous video streaming unheard of and widespread dvd adoption seemed about as imminent as flying cars indeed these were the widely accepted laws of the land in 1997 when marc randolph had an idea it was a simple thought leveraging the internet to rent movies and was just one of many more and far worse proposals like personalized baseball bats and a shampoo delivery service that randolph would pitch to his business partner reed hastings on their commute to work each

morning but hastings was intrigued and the pair with hastings as the primary investor and randolph as the ceo founded a company now with over 150 million subscribers netflix's triumph feels inevitable but the twenty first century's most disruptive start up began with few believers and calamity at every turn from having to pitch his own mother on being an early investor to the motel conference room that served as a first office to server crashes on launch day to the now infamous meeting when netflix brass pitched blockbuster to acquire them marc randolph's transformational journey exemplifies how anyone with grit gut instincts and determination can change the world even with an idea that many think will never work what emerges though isn't just the inside story of one of the world's most iconic companies full of counter intuitive concepts and written in binge worthy prose it answers some of our most fundamental questions about taking that leap of faith in business or in life how do you begin how do you weather disappointment and failure how do you deal with success what even is success from idea generation to team building to knowing when it's time to let go that will never work is not only the ultimate follow your dreams parable but also one of the most dramatic and insightful entrepreneurial stories of our time

Media Ownership and Concentration in America 2009-10-19 digital technology has transformed cinema's production distribution and consumption patterns and pushed contemporary cinema toward increasingly global markets in the case of japanese cinema a once moribund industry has been revitalized as regional genres such as anime and japanese horror now challenge hollywood's preeminence in global cinema in her rigorous investigations of j horror personal documentary anime and ethnic cinema mitsuyo wada marciano deliberates on the role of the transnational in bringing to the mainstream what were formerly marginal b movie genres she argues persuasively that convergence culture which these films represent constitutes japan's response to the variegated flows of global economics and culture with its timely analysis of new modes of production emerging from the struggles of japanese filmmakers and animators to finance and market their work in a post studio era this book holds critical implications for the future of other national cinemas fighting to remain viable in a global marketplace as academics in film and media studies prepare a wholesale shift toward a transnational perspective of film wada marciano cautions against jettisoning the entire national cinema paradigm discussing the technological advances and the new cinematic flows of consumption she demonstrates that while contemporary japanese film on the one hand expresses the transnational as an object of desire i.e. a form of total cosmopolitanism on the other hand that desire is indeed inseparable from japan's national identity drawing on a substantial number of interviews with auteur directors such as kore eda hirokazu kurosawa kiyoshi and kawase naomi and incisive analysis of select film texts this compelling original work challenges the presumption that hollywood is the only authentically global cinema

That Will Never Work 2019-09-17 this book explores the phenomenon of v cinema founded in japan in 1989 as a distribution system for direct to video movies which film companies began making having failed to recoup their investment in big budget films it examines how studios and directors worked quickly to capitalize on niche markets or upcoming and current trends and how as a result this period of history in japanese cinema was an exceptionally diverse and vibrant film scene it highlights how although the v cinema industry declined from around 1995 the explosion in quantity and variety of such movies established and cemented many specific genres of japanese film importantly the book argues that film scholars who have long looked down on video as a substandard medium without scholarly interest have been wrong to do so and that v cinema challenges accepted notions of cultural value providing insight into the formation of cinematic canons and inviting us to rethink what is meant by japanese cinema

Japanese Cinema in the Digital Age 2012-05-31 an argument for retaining the notion of personal property in the products we buy in the digital marketplace if you buy a book at the bookstore you own it you can take it home scribble in the margins put in on the shelf lend it to a friend sell it at a garage sale but is the same thing true for the ebooks or other digital goods you buy retailers and copyright holders argue that you don t own those purchases you merely license them that means your ebook vendor can delete the book from your device without warning or explanation as amazon deleted orwell s 1984 from the kindles of surprised readers several years ago these readers thought they owned their copies of 1984 until it turned out they didn t in the end of ownership aaron perzanowski and jason schultz explore how notions of ownership have shifted in the digital marketplace and make an argument for the benefits of personal property of course ebooks cloud storage streaming and other digital goods offer users convenience and flexibility but perzanowski and schultz warn consumers should be aware of the tradeoffs involving user constraints permanence and privacy the rights of private property are clear but few people manage to read their end user agreements perzanowski and schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits but most important it would affirm our sense of self direction and autonomy if we own our purchases we are free to make whatever lawful use of them we please technology need not constrain our freedom it can also empower us

Japanese Film and the Challenge of Video 2023-05-19 most of the existing european union and international policies are considered in some depth and the authors also discuss a variety of national laws and initiatives technical measures and the soft law and hard law models that have been proposed in the years to come as more and more lawyers are confronted with issues involving copyright enforcement on the internet this book s value as a springboard to the informed future development of this area of legal theory and practice will become more

evident for this reason as well as for its richly detailed treatment of trends and current reality in the field it is sure to be read and put to good use by business people international lawyers government officials and interested academics in all parts of the world

A Framework for Web Science 2006 in a village goes mobile sirpa tenhunen examines how the mobile telephone has contributed to social change in rural india tenhunen's long term ethnographic fieldwork in west bengal began before the village had a phone system in place and continued through the introduction and proliferation of the smartphone she here analyzes how mobile telephones emerged as multidimensional objects which in addition to enabling telephone conversations facilitated status aspirations internet access and entertainment practices she explores how this multifaceted use of mobile phones has affected

agency and power dynamics in economic political and social relationships and how these new social constellations relate to culture and development in eight chapters tenhunen asks such questions as who benefits from mobile telephony and how can people use mobile phones to change their lives or does phone use merely amplify existing social patterns and power relationships can mobile telephony induce development going beyond the case of west bengal tenhunen develops a framework to understand how new media mediates social processes within interrelated social spheres and local hierarchies by relating media saturated forms of interaction to pre existing contexts
