## ***Scientific Writing for Impact Factor Journals***

2013-01-01

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country's competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book's closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

## ***How to Publish a Scientific Paper in a High Impact Factor Journal***

2018-05-02

high impact factor publications are absolutely necessary for advancing an academic science career but unless you are already part of an elite insider's club no one will help you succeed public advice is generic and unhelpful because editorial gatekeepers will not openly admit that the publication system is unfairly biased against you instead the myth of meritocracy promotes the false notion that great science is all you need to publish well welcome to a realistic and practical look at how to publish your scientific paper in a high impact factor journal from designing your research proposal to writing a rebuttal this book discusses strategies for a top publication this is not another regurgitated book about writing scientific manuscripts this book covers the difficult parts that are left out or unspoken by others it fills in the missing gaps this book is not for researchers in well funded laboratories at top institutes who are already well versed in these issues this is a book for scientists everywhere else for the ones who may never have a fair chance but who still deserve the best chance

## ***Scientific Journals: Issues in Library Selection and Management***

2019-12-06

this book first published in 1987 brings together from a variety of sources analysis on the major issues involved in the collection of scientific journals working from the premise that scientists tend to know much more about their subject than about their journals it examines the rationale for journal choices journals and tenure journals and budgeting and the elements of a good journal it shows librarians how to penetrate the internal structure of some imposing technical literatures in a way that can help them make responsible collection management decisions that even their science clientele will respect

## The Metric Tide

2016-01-20

represents the culmination of an 18 month long project that aims to be the definitive review of this important topic accompanied by a scholarly literature review some new analysis and a wealth of evidence and insight the report is a tour de force a once in a generation opportunity to take stock dr steven hill head of policy hefce lse impact of social sciences blog a must read if you are interested in having a deeper understanding of research culture management issues and the range of information we have on this field it should be disseminated and discussed within institutions disciplines and other sites of research collaboration dr meera sabaratnam lecturer in international relations at the school of oriental and african studies university of london lse impact of social sciences blog metrics evoke a mixed reaction from the research community a commitment to using data and evidence to inform decisions makes many of us sympathetic even enthusiastic about the prospect of granular real time analysis of our own activities yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls metrics hold real power they are constitutive of values identities and livelihoods how to exercise that power to positive ends is the focus of this book using extensive evidence gathering analysis and consultation the authors take a thorough look at potential uses and limitations of research metrics and indicators they explore the use of metrics across different disciplines assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems finally they consider the negative or unintended effects of metrics on various aspects of research culture including an updated introduction from james wilson the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management by funders and in the next cycle of the research excellence framework the metric tide is certainly rising unlike king canute we have the agency and opportunity and in this book a serious body of evidence to influence how it washes through higher education and research

## Scientific Journals

2019-12-06

this book first published in 1990 examines the relationships between scientists publishers and journals it focuses on managing acquisitions budgets and helps substantiate journals selection deselection decisions to library users and administrators

## Writing Human Factors Research Papers

2012-10-01

writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it however many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented it is one thing to write a good scientific paper however it is quite another thing to get it published this requires some additional nous in writing this book don harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor by his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't the material in the book is drawn

from many years of finding all these things out for himself usually by trial and error but mostly error the text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers the author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful all major points are illustrated with examples from his own published works the book is written in the form of a manual for constructing a journal manuscript read a chapter write a section however the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments each chapter concludes with a checklist to ensure all the key elements have been addressed

## ***Strategic Science Communication***

2022-09-27

what tactics can effective science communicators use to reach a wide audience and achieve their goals effective science communication the type that can drive behavior change while boosting the likelihood that people will turn to science when faced with challenges is not simply a matter of utilizing social media or employing innovative tactics like nudges even more important for success is building long term strategic paths to achieve well articulated goals smart science communicators also want to create communication opportunities to improve their own thinking and behavior in this guidebook john c besley and anthony dudo encapsulate their practical expertise in 11 evidence based principles of strategic science communication among other things science communicators they argue should strive to seem competent warm honest and willing to listen their work should also convey a desire to make the world a better place highlighting time tested methods for building rapport with an audience through several modes of communication besley and dudo explain how to achieve each strategic objective all scientific communication is goal oriented and besley and dudo discuss the importance of recognizing the right goals then employing strategic and tactical communication in order to achieve them finally they offer specific suggestions for how practitioners can evaluate the effectiveness of their communications and in fact build evaluation into their plans from the beginning strategic science communication is the first book to use social science to help scientists and professional science communicators become more evidence based besley and dudo draw on insightful research into the science of science communication to provide readers with an opportunity to think more deeply about how to make communication choices this guidebook is essential reading for all professionals in the field

## ***Argumentation in Science Education***

2007-12-06

educational researchers are bound to see this as a timely work it brings together the work of leading experts in argumentation in science education it presents research combining theoretical and empirical perspectives relevant for secondary science classrooms since the 1990s argumentation studies have increased at a rapid pace from stray papers to a wealth of research exploring ever more sophisticated issues it is this fact that makes this volume so crucial

## **Research Management**

2017-11-15

research management europe and beyond addresses the myriad responsibilities related to research management and administration the book incorporates narratives from those working in the field to provide insight into the profession the book also offers a unique perspective on the topic by incorporating global perspectives to address the growing interdisciplinary nature of research collaboration the book outlines practical advice for those in the research management and administration profession at all levels of experience it is also a useful tool that research institutions and research groups can use to assist in planning and streamlining their research support offers a deeper understanding of the research management and administrative landscape through single and collective definitions and experiences provides an overview of the research environment and explores the international research arena discusses some of the most complex issues in research management and administration by covering topics such as ethics innovation research impact organizational structures and processes for the project life cycle

## **Animals, Machines, and AI**

2021-11-08

sentient animals machines and robots abound in german literature and culture but there has been surprisingly limited scholarship on non human life forms in german studies this volume extends interdisciplinary research in emotion studies to examine non humans and the affective relationships between humans and non humans in modern german cultural history in recent years fascination with emotions developments in robotics and the burgeoning of animal studies in and beyond the academy have given rise to questions about the nature of humanity using sources from the life sciences literature visual art poetry philosophy and photography this collection interrogates not animal or machine emotions per se but rather uses animals and machines as lenses through which to investigate human emotions and the affective entanglements between humans and non humans the covid 19 pandemic made us more keenly aware of the importance of both animals and new technologies in our daily lives and this volume ultimately sheds light on the centrality of non humans in the human emotional world and the possibilities that relationships with non humans offer for enriching that world

## **Publishing Addiction Science**

2017-05-24

publishing addiction science is a comprehensive guide for addiction scientists facing the complex process of contributing to scholarly journals written by an international group of addiction journal editors and their colleagues it discusses how to write research articles and systematic reviews choose a journal respond to reviewers reports become a reviewer and resolve the often difficult authorship ethical and citation issues that arise in addiction science publishing as a guide for the perplexed publishing addiction science helps novice as well as experienced researchers to deal with these challenges it is suitable for university courses and forms the basis of the training workshops offered by the international society of addiction journal editors isaje co sponsored by isaje and the scientific journal addiction the third edition of publishing addiction science gives special attention to the challenges faced by researchers from developing and non english speaking countries and features new chapters on guidance for clinician scientists and the growth of infrastructure and career opportunities in addiction science

## ***What Editors Want***

2012-12-07

research publications have always been key to building a successful career in science yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed accepted and published by leading scientific journals with what editors want philippa j benson and susan c silver two well respected editors from the science publishing community remedy that situation with a clear straightforward guide that will be of use to all scientists benson and silver instruct readers on how to identify the journals that are most likely to publish a given paper how to write an effective cover letter how to avoid common pitfalls of the submission process and how to effectively navigate the all important peer review process including dealing with revisions and rejection with supplemental advice from more than a dozen experts this book will equip scientists with the knowledge they need to usher their papers through publication

## **Handbook of Action Research**

2006-01-17

with the handbook of action research hailed as a turning point in how action research is framed and understood by scholars this student edition has been structured to provide an easy inroad into the field for researchers and students it includes concise chapter summaries and an informative introduction that draws together the different strands of action research and reveals their diverse applications as well as their interrelations divided into four parts there are important themes of thinking and practice running throughout

## **Essays of an Information Scientist: 1962-1973**

1977

the artificial intelligence ai landscape has evolved significantly from 1950 when alan turing first posed the question of whether machines can think today ai is transforming societies and economies it promises to generate productivity gains improve well being and help address global challenges such as climate change resource scarcity and health crises

## ***Scientific and Technical Journals***

1985

this book first published in 2002 gathers some of america s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract sustain professional or academic affiliations opinion leadership or agenda setting power and ongoing criticality to the study or practice of their field the book presents wholly independent reviewers none are in the employ of any publisher but each is fully credentialed and well published and many are award winners the authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

## Artificial Intelligence in Society

2019-06-11

the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

## Journals of the Century

2019-12-06

progress in molecular biology and translational science volume 159 provides the most topical informative and exciting monographs available on a wide variety of research topics related to prions viruses bacteria and eukaryotes the series includes in depth knowledge on molecular biological aspects of organismal physiology along with insights on how this knowledge may be applied to understand and ameliorate human disease new chapters in this release discuss timely topics such as targeting recently deorphanized gpr83 for the treatment of infection stress and drug addiction arrestin structure function arrestins in the cardiovascular system analysis of biased agonism and more includes comprehensive coverage of molecular biology presents ample use of tables diagrams schemata and color figures to enhance the reader s ability to rapidly grasp the information provided contains contributions from renowned experts in the field

## Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis

2017-12-15

this book is the first to provide an in depth analysis of the peer review process in scholarly publishing author weller offers a systematic review of published studies of editorial peer review in the following broad categories general studies of rejection rates studies of editors studies of authors and studies of reviewers the book concludes with an examination of new models of editorial peer review intended to enhance the scientific communication process as it moves from a print to an electronic environment

## Progress in Molecular Biology and Translational Science

2018-10-16

innovation is increasingly recognized as a vitally important social and economic phenomenon worthy of serious research study firms are concerned about their innovation ability particularly relative to their competitors politicians care about innovation too because of its presumed social and economic impact however to recognize that innovation is desirable is not sufficient what is required is systematic and reliable knowledge about how best to influence innovation and to exploit its effects to the full gaining such knowledge is the aim of the field of innovation studies which is now at least half a century old hence it is an opportune time to ask what has been achieved and what we still need to know more about this is what this book sets out to explore written by a number of central contributors to the field it critically examines the current state of the art and identifies issues that merit greater attention the focus is mainly on how society can derive the greatest benefit from innovation and what needs to be done to achieve this however to learn more about how society can benefit more from innovation one also needs to understand innovation processes in firms and how these interact with broader social institutional and political factors such issues are therefore also central to the discussion here

after a brief account of the recent trends in science indicators research the authors propose a coherent system of scientometric indicators these indicators are based on the publication performance of each country in 8 science fields and reflect the versatility of the impact of the publication activity in the country in question the special aim of the indicator system is to characterize and compare the contribution of research intensive medium sized and small countries to the world s overall scientific research activity indicator values for 32 such countries are reported and evaluated relations to other economic social and science indicators are discussed this book is intended both as a data source and an analytic tool for specialists engaged in science policy science management science indicators research scientometrics and other areas of science as well as a tool for practising research scientists

## How to Write & Publish a Scientific Paper

1994

this book provides a broad and nuanced overview of the achievements and legacy of professor william bill goddard in the field of computational materials and molecular science leading researchers from around the globe discuss goddard s work and its lasting impacts which can be seen in today s cutting edge chemistry materials science and biology techniques each section of the book closes with an outline of the prospects for future developments in the course of a career spanning more than 50 years goddard s seminal work has led to dramatic advances in a diverse range of science and engineering fields presenting scientific essays and reflections by students postdoctoral associates collaborators and colleagues the book describes the contributions of one of the world s greatest materials and molecular scientists in the context of theory experimentation and applications and examines his legacy in each area from conceptualization the first mile to developments and extensions aimed at applications and lastly to de novo design the last mile goddard s passion

for science his insights and his ability to actively engage with his collaborators in bold initiatives is a model for us all as he enters his second half century of scientific research and education this book inspires future generations of students and researchers to employ and extend these powerful techniques and insights to tackle today's critical problems in biology chemistry and materials examples highlighted in the book include new materials for photocatalysts to convert water and CO<sub>2</sub> into fuels novel catalysts for the highly selective and active catalysis of alkanes to valuable organics simulating the chemistry in film growth to develop two dimensional functional films and predicting ligand protein binding and activation to enable the design of targeted drugs with minimal side effects

clinical pharmacy education practice and research offers readers a solid foundation in clinical pharmacy and related sciences through contributions by 83 leading experts in the field from 25 countries this book stresses educational approaches that empower pharmacists with patient care and research competencies the learning objectives and writing style of the book focus on clarifying the concepts comprehensively for a pharmacist from regular patient counseling to pharmacogenomics practice it covers all interesting topics a pharmacist should know this book serves as a basis to standardize and coordinate learning to practice explaining basics and using self learning strategies through online resources or other advanced texts with an educational approach it guides pharmacy students and pharmacists to learn quickly and apply clinical pharmacy education practice and research provides an essential foundation for pharmacy students and pharmacists globally covers the core information needed for pharmacy practice courses includes multiple case studies and practical situations with 70 focused on practical clinical pharmacology knowledge designed for educational settings but also useful as a refresher for advanced students and researchers

## Scientometric Indicators

1985

the art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist it is also an ability that despite its importance is often overlooked by research courses and senior level mentors this straightforward pocket guide to preparing research articles steps into the void as an insider's guide to getting published drawing on nearly 20 years of experience editing a social work research journal Bruce A. Thyer has crafted a candid companion to the journal publishing process unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve Thyer's frank advice on selecting an appropriate journal handling rejections and revisions understanding confusing concepts like impact factors and electronic publishing and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher writer
