Asia in Western and World History: A Guide for Teaching

2020-03-10

the history of the french in india has received far less scholarly attention than that of other european nations english historiography in particular has often treated it as no more than a preliminary to the extension of british power in addition work hitherto has tended to focus on the trade with europe not the asian trade the country trade carried on within asia the full importance of this trade for the dutch and british is now being recognised this book represents the first sustained study of french activities in asian trade and fills this gap in the historiography catherine manning is concerned to relate the french traders to their social regional and financial roots and to trace their connections with other commercial groups in india both european and asian the french evidence that she assembles including much archival material also makes a significant contribution to the debate about economic decline and renewal in 18th century india her analysis stresses the importance of the indian context and shows that economic and political developments in south india were crucial to the french move from trade to war in the 1740s finally the book examines why the french failed in an enterprise which was to succeed so signally for the british only a few decades later

Spinning Yarns

2013-10-15

investigates the complex social processes involved in the introduction and institutionalization of western science in colonial india

Class Structure and Economic Growth

2015-05-19

examines the development of a socioeconomic region in iraq arabia and the gulf during a 150 year period focusing on regional ties through long distance trade networks

The Crisis from Within: Historians, Theory, and the Humanities

2017-07-05

how did the british come to conquer south asia in the late eighteenth and early nineteenth centuries answers to this question usually start in northern india neglecting the dramatic events that marked britain s contemporaneous subjugation of the island of sri lanka in islanded sujit sivasundaram reconsiders the arrival of british rule in south asia as a dynamic and unfinished process of territorialization and state building revealing that the british colonial project was framed by the island s traditions and maritime placement and built in part on the model they provided using palm leaf manuscripts from sri lanka to read the official colonial archive sivasundaram tells the story of two sets of islanders in combat and collaboration he explores how the british organized the process of islanding they aimed to create a separable unit of colonial governance and trade in keeping with conceptions of ethnology culture and geography but rather than serving as a radical rupture he reveals islanding recycled traditions the british learned from kandy a kingdom in the sri lankan highlands whose customs from strategies of war to views of nature fascinated the british picking up a range of unusual themes from migration orientalism and ethnography to botany medicine and education islanded is an engaging retelling of the advent of british rule

Fortunes à faire

1996-05-16

this substantial work explores the impact of monetization in premodern southeast asia from the third century bce to the rise of maleka in the early fifteenth century the author explores why concepts of money developed unevenly throughout the region he considers trade policies price controls exchange ratios monopolies variant standards of value and the administrative structures required to support such a complex economic innovation

The Science of Empire

1997-01-01

Europe and the Third World provides a schematic historical analysis of the relations between Europe and the extra-European periphery within the twin contexts of global economic inequality and global disparities in political power. The colonial and imperial relationships between Western Europe and the wider world since the late fifteenth century and the course and consequences of decolonization form the substance of the discussion which concludes with a glance at the links between the European Union and the world's poorest states, most of which are former colonies.

The Politics of Regional Trade in Iraq, Arabia, and the Gulf, 1745-1900

2013-08-05

The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development. The focus on consumption changes the whole emphasis and structure of historical enquiry while human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks and while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream. The history of consumption demands a wide range of skills it calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism but it is not simply a melting pot of techniques and skills brought to bear on a past epoch its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services. Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty-six leading subject specialists from Europe and North America. The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services.

Lost Glory: India's Capitalism Story deconstructs India's industrialization story challenging contemporary ideas about her economy based on careful and detailed empirical analyses of India's industrialization for a period of almost seven decades. The book provides deeply nuanced depictions of the history of political economy that have affected India's industrialization over the course of a century. These dimensions of India's economic history have never before been collated and presented. The presentation takes readers on a definitive evidence-based survey of India's industrial landscape. It includes a detailed historical description of the intellectual origins of India's modern industrialization anchored in a privileged view of economic policy making grounded in deep historical and political analyses that account for the variations, continuities, and changes in institutional contingencies. The facts derived on India's long-term economic performance are used to put the record straight. The findings of the book will transform debate and set the agenda for thoughtfully assessing what course the Indian economy needs to follow.

Money, Markets, and Trade in Early Southeast Asia

1999-07-13

The first major study of the relationship between labour and capital in India's economic development in the early twentieth century, the author considers the spread of capitalism and the growth of the cotton textile industry.

Europe and the Third World

2013-06-17

The top 5 Sunday Times bestseller. One of Barack Obama's best books of 2019. The Times History Book of the Year finalist for the Cundill History Prize 2020. Longlisted for the Baillie Gifford Prize for Non-Fiction 2019. A Financial Times Observer Daily Telegraph Wall Street Journal and Times Book of the Year. Dalrymple is a superb historian with a visceral understanding of India. A book of beauty. Gerard DeGroot, The Times in August 1765, the East India Company defeated the young Mughal emperor and forced him to establish a new administration in his richest provinces run by English merchants who collected taxes using a ruthless private army. This new regime saw the East India Company transform itself from an international trading corporation into something much more unusual: an aggressive colonial power in the guise of a multinational business. William Dalrymple tells the remarkable story of the East India Company as it has never been told before, unfolding a timely cautionary tale of the first global corporate power.

Consumption and the World of Goods

2018-07-12

a collection of essays on the history and relationships of the east india company from 1600 to the early 1800s

Lost Glory

1994

provides the first global analysis of the relationship between trade and civilisation from the beginning of civilisation until the modern era

The Origins of Industrial Capitalism in India

2020-11-12

the vijayanagara rajas ruled a substantial part of the southern peninsula of india for over three hundred years beginning in the mid fourteenth century during this epoch the region was transformed from its medieval past toward a modern colonial future concentrating on the later sixteenth and seventeenth century history of vijayanagara this book details the pattern of rule established in this important and long lived hindu kingdom that was followed by other often smaller kingdoms of peninsular india until the onset of colonialism through an analysis of the politics society and economy of vijayanagara the author addresses the central question of the extent to which vijayanagara as a medieval hindu kingdom can be viewed as a prototype of the polities and societies confronted by the british in the late eighteenth century the book thus presents an understanding and appreciation of one of the great medieval kingdoms of india as well as a more general assessment of the nature of the state society and culture on the eve of european colonial rule
