**The Historians' Paradox** 2018-06-07 how do we know what happened in the past we cannot go back and no amount of historical data can enable us to understand with absolute certainty what life was like then it is easy to demolish the very idea of historical knowing but it is impossible to demolish the importance of historical knowing in an age of cable television pundits and anonymous bloggers dueling over history the value of owning history increases at the same time as our confidence in history as a way of knowing crumbles historical knowledge thus presents a paradox the more it is required the less reliable it has become to reconcile this paradox that history is impossible but necessary peter charles hoffer proposes a practical workable philosophy of history for our times one that is robust and realistic and that speaks to anyone who reads writes and teaches history the philosophy of history that hoffer supports in the historians paradox is driven by a continual and careful search for the authentic but without confining the real to a finite or closed set of facts hoffer urges us to think and live with a keen awareness that history is everywhere to accept the impossibility of measuring its reliability but to never approach it unquestioningly covering a sweeping range of philosophies from ancient history to game theory methodological approaches to writing history and the advantages and disadvantages of different strategies of argument hoffer constructs a

philosophy of history that is reasonable free of fallacy and supported by appropriate evidence that is itself tenable the historians paradox brings together accounts of actual historical events anecdotes about historians insights from philosophers of history and the personal experience of a long time scholar and teacher throughout hoffer liberally spices the mixture with humor to create a philosophy of history for our times publisher

**The History of America** 2023-10-26 despite predictions of the death of the past and the end of history the past refuses to go away in fact the start of the twenty first century has seen an upsurge of interest in popular representations of history on the large and small screen and of impassioned political conflicts over rival understandings of the past historical responsibility and apology have become contentious topics of domestic politics and of international diplomatic relations and memory a profitable commodity for sale to mass markets against this background how do historians deal with the problems of the search for historical truth the past within us approaches these issues by examining the problems of representing history in the popular media drawing on examples from east asian and american as well as european history it poses the question what happens when accounts of history are transferred from one medium to another how far does the medium shape the message how can historians deploy contemporary media in ways which evoke and develop the historical imagination from the romances of walter scott to steven spielberg blockbusters from online irish nationalism to japanese revisionist comic books the past within us explores some of the more dramatic modern popular representations and reflects on the key challenges and possibilities for the communication of history in a multimedia age

*The Past Within Us* 2023-08-22 through its millennium long existence gaza has often been bitterly disputed while simultaneously and paradoxically enduring prolonged neglect jean pierre filiu s book is the first comprehensive history of gaza in any language squeezed between the negev and sinai deserts on the one hand and the mediterranean sea on the other gaza was contested by the pharaohs the persians the greeks the romans the byzantines the arabs the fatimids the mamluks the crusaders and the ottomans napoleon had to secure it in 1799 to launch his failed campaign on palestine in 1917 the british empire fought for months to conquer gaza before establishing its mandate on palestine in 1948 200 000 palestinians sought refuge in gaza a marginal area neither israel nor egypt wanted palestinian nationalism grew there and gaza has since found itself at the heart of palestinian history it is in gaza that the fedayeen movement arose from the ruins of arab nationalism it is in gaza that the 1967 israeli occupation was repeatedly challenged until the outbreak of the 1987 intifada and it is in gaza in 2007 that the dream of palestinian statehood appeared to have been shattered by the split between fatah and hamas the endurance of gaza and the palestinians make the publication of this history both timely and significant

*Gaza* 1874 in a brief history of history acclaimed historian jeremy black seeks to reinvigorate and redefine our ideas about history the stories we tell about the past are a crucial aspect of all cultures however while the traditional storytelling process what we think of as history in the proper sense is useful it is also misleading not least because it leads to the repetition of bias and misinformation black suggests that the conventional idea of history

and historians is constructed too narrowly as it fails to engage with the broad nature of lived experience by focusing on a singular idea or story within the history being explored we fail to understand the interconnectivity of the everyday experience a brief history of history challenges accepted norms of the historical perspective and offers a view of human history that will surprise many and perhaps infuriate some but above all it is a history of historians written for this moment in time a time when the traditional eurocentric approach to history now appears wholly inappropriate

**A Brief History of History** 2007-03-01 borsch has not answered all the questions of course who can but his view of the man tradition makes more sense to me than for example perrin s rather cavalier dismissal of the evidence and it not only enlightens but also enlivens the discussion as against the extreme skeptics borsch is also convincing to me in arguing the case for a large measure of authenticity in the son of man tradition in the gospels if the proof of the pudding is in the eating the book constantly calls me back to its pages for insight regarding the problem both in its historical dimension and in its bearing upon the meaning of jesus of nazareth for faith today theology the author is well aware of the difficulties involved in entering a field wherein so much investigation has been done and of this with the positive and negative conclusions he gives an excellent survey crisp and critical the lines opened up will engage the attention of a new and more positive chapter in the form critical argument london quarterly and holborn review frederick h borsch is the retired bishop of the episcopal diocese of los angeles and professor of new testament and chair of anglican studies at the lutheran theological seminary at philadelphia he is also the former dean of the chapel at princeton university his other books include the spirit searches everything keeping life s questions the bible s authority in today s church introducing the lessons of the church year a guide for lay readers and congregations and the christian and gnostic son of man
