## **Oxford Textbook of Critical Care**

2020-01-10

now in paperback the second edition of the oxford textbook of critical care is a comprehensive multi disciplinary text covering all aspects of adult intensive care management uniquely this text takes a problem orientated approach providing a key resource for daily clinical issues in the intensive care unit the text is organized into short topics allowing readers to rapidly access authoritative information on specific clinical problems each topic refers to basic physiological principles and provides up to date treatment advice supported by references to the most vital literature where international differences exist in clinical practice authors cover alternative views key messages summarise each topic in order to aid quick review and decision making edited and written by an international group of recognized experts from many disciplines the second edition of the oxford textbook of critical care provides an up to date reference that is relevant for intensive care units and emergency departments globally this volume is the definitive text for all health care providers including physicians nurses respiratory therapists and other allied health professionals who take care of critically ill patients

## **Management of Acute Upper and Lower Gastrointestinal Bleeding**

2008

this guideline provides recommendations based on current evidence for best practice in the management of acute upper and lower gi bleeding upper gi bleeding is that originating proximal to the ligament of treitz in practice from the oesophagus stomach and duodenum lower gi bleeding is that originating from the small bowel and colon this guideline focuses upon upper gi and colonic bleeding since acute small bowel bleeding is uncommon the guideline includes the assessment and management of variceal non variceal and colonic bleeding in adults the guideline deals with the management of bleeding that is of sufficient severity to lead to emergency admission to hospital bleeding of lesser severity is subject to elective investigation and is not considered the management of patients under the age of 14 is not covered by this guideline

## **Interventional and Therapeutic Gastrointestinal Endoscopy**

2010

the aim of this book is to present a concise yet instructive overview of the most common interventional and therapeutic gastrointestinal endoscopic procedures although there exists a large amount of literature dealing with therapeutic endoscopy this publication stands out for several reasons to begin with it has been written by a highly selected group of international experts who contribute their own tried and tested tips and tricks the various techniques are described in a homogeneous fashion making it easy for the endoscopist to single out the important aspects for his or her own practice moreover the data presented follows evidence based guidelines but does not inundate the reader with confusing facts and numbers finally the book is illustrated like an atlas featuring real life pictures enhanced by explanatory drawings and algorithms this textbook is directed at residents fellows gastroenterologists and surgeons interested in therapeutic endoscopy as the majority of the procedures described are classics that have stood the test of time it will be a useful companion for many years to come

## **Gastrointestinal Bleeding**

2010-01-22

this book covers all aspects of bleeding in a systemic approach organized by the site of bleeding it offers a step by step approach through appropriate diagnosis and management strategies including surgical endoscopic medical and angiographic techniques

## **Gastrointestinal Bleeding**

2012-02-06

there have been many advances in the management of this condition since the first edition of gastrointestinal bleeding this new edition thoroughly revised and restructured includes the latest updates on all areas of the field of gi bleeding systematically covering all the areas of the gi tract from upper gi to lower gi through to small bowel bleeding it fully covers the different types of bleeding that can occur from peptic ulcer through to variceal bleeding and looks at new developments and pioneering techniques in the field including endoscopy and balloon enteroscopy a methodology section describes the latest design of clinical trials in gi bleeding and this edition now highlights the new guidelines on uigib upper gastrointestinal bleeding this new edition of gastrointestinal bleeding is an invaluable purchase for all gastroenterologists both in training and fully qualified

## **Acute Gastrointestinal Bleeding**

2003-01-03

leading experts in the fields of gastroenterology surgery and radiology comprehensively review the pathophysiology diagnosis management and treatment of acute bleeding disorders of the gi tract the authors break down acute bleeding into upper and lower gi tract sources and provide a differential diagnosis for each disease evidence based algorithms for clinical practice treatment modalities for its management and standards of care the authors outline the many dilemmas faced by physicians in their approach to their patients such as localization of the bleeding source upper vs lower the need and timing for emergency endoscopy and the timing for radiologic intervention and or surgery

## **Surgical Treatment**

2001

the latest edition of this text provides a practical reference for physicians and other health care providers caring for patients with gastrointestinal bleeding similar to the previous edition this volume addresses common problems associated with gastrointestinal bleeding and discusses in a logical and step wise fashion appropriate options for patient care the text is structured based on the location of bleeding with common rare and unknown sources being addressed it also includes updated and new chapters focusing on the newest advances in imaging and interventional modalities in the care of patients with gi bleeding as well as highly practical presentations of typical patients seen in clinical practice written by world renowned experts in gastrointestinal diseases gastrointestinal bleeding a practical approach to diagnosis and management second edition is a valuable resource in the management of gastrointestinal bleeding

both for those currently in training and for those already in clinical practice

## **Gastrointestinal Bleeding**

preceded by clinical clerkship in inpatient medicine sanjay saint 3rd ed c2010

## ***The Saint-Chopra Guide to Inpatient Medicine***

2018

the book is an on the spot reference for residents and medical students seeking diagnostic radiology fast facts its question and answer format makes it a perfect quick reference for personal review and studying for board examinations and re certification readers can read the text from cover to cover to gain a general foundation of knowledge that can be built upon through practice or can use choice chapters to review a specific subspecialty before starting a new rotation or joining a new service with hundreds of high yield questions and answer items this resource addresses both general and subspecialty topics and provides accurate on the spot answers sections are organized by subspecialty and body area including chest abdomen and trauma and chapters cover the anatomy pathophysiology differential diagnosis hallmark signs and image features of major diseases and conditions key example images and illustrations enhance the text throughout and provide an ideal pocket sized resource for residents and medical students

## **Essential Radiology Review**

2019-12-18

gastrointestinal gi bleeding is one of frequent emergencies that clinicians frequently manage in clinical practice this book contains several chapters dedicated to the diagnosis and management of gastrointestinal bleeding this book includes current updates on all areas of gi bleeding including upper gi lower gi and small bowel bleeding it fully covers the different symptoms and signs of gastrointestinal bleeding that can occur in different conditions the outline of the many dilemmas faced by clinicians in their approach to their patients like diagnostic predictors of clinical outcome and risk stratification in lower gi bleeding and for upper gi bleeding there is a dedicated chapter for the diagnosis and management of dieulafoy lesions dls which are uncommon yet they are often an under recognised cause of life threatening gi bleeding occurring in both the adult and paediatric population this book also gives a comprehensive overview of the various imaging modalities used for the diagnosis of gi bleeding with emphasis on the role of mdct in the care of patients with gi haemorrhage the initial management of significant gi bleeding with focuses on early identification hemodynamic stabilisation close monitoring in the proper setting and timely workup and intervention is described a dedicated chapter discusses the wide range of endoscopic therapies that are now available to treat gi bleeding with emphasis on the new advances in endoscopic therapy there is detailed discussion on the role of transcatheter arterial embolisation which remains an important available treatment modality in the armamentarium for management of non variceal gi bleeding

## **Gastrointestinal Bleeding**

2014

in the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients this is a useful book that deserves to do well i hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field nejm book review

## **Principles and Practice of Geriatric Surgery**

2011-07-12

a guide to the techniques and analysis of clinical data each of the seventeen sections begins with a drawing and biographical sketch of a seminal contributor to the discipline after an introduction and historical survey of clinical methods the next fifteen sections are organized by body system each contains clinical data items from the history physical examination and laboratory investigations that are generally included in a comprehensive patient evaluation annotation copyrighted by book news inc portland or

## **Clinical Methods**

1990

dr gralnek is considered an authority on gi bleeding and he has invited experts in their respective fields to contribute to this issue the content is divided up between acute non variceal upper gi hemorrhage and acute lower gastrointestinal hemorrhage articles are devoted to the follow topics initial assessment risk stratification and early management endotherapy of peptic ulcer bleeding endoscopic hemostasis of non variceal non ulcer ugi emerging endoscopic treatments for nvugih the cutting edge doppler ultrasound in guiding endoscopic hemostasis the role of interventional radiology in nvugih managing antithrombotic agents in the setting of acute gi bleeding patient presentation risk stratification and initial management colonoscopy diagnosis timing and bowel preparation the role of endoscopic hemostasis therapy and prevention of recurrent lower gi hemorrhage readers will come away with the most current clinical information on how to manage and prevent gi bleeding

## **Endoscopic Management of Gastrointestinal Bleeding, An Issue of Gastrointestinal Endoscopy Clinics, E-Book**

2018-06-23

as aging trends in the united states and europe in particular are strongly suggestive of increasingly older society it would be prudent for health care providers to better prepare for such changes by including physiology disease nutrition pharmacology pathology radiology and other relevant associated topics geriatric gastroenterology fills the void in the literature for a volume devoted specifically to

gastrointestinal illness in the elderly this unique volume includes provision of training for current and future generations of physicians to deal with the health problems of older adults it will also serve as a comprehensive guide to practicing physicians for ease of reference relevant to the geriatric age group the volume covers epidemiology physiology of aging gastrointestinal physiology pharmacology radiology pathology motility disorders luminal disorders hepato biliary disease systemic manifestations neoplastic disorders gastrointestinal bleeding cancer and medication related interactions and adverse events all extremely common in older adults these are often hard to evaluate and judge especially considering the complex aging physiology all have become important components of modern medicine special emphasis is be given to nutrition and related disorders capsule endoscopy and its utility in the geriatric population is also covered presented in simple easy to read style the volume includes numerous tables figures and key points enabling ease of understanding chapters on imaging and pathology are profusely illustrated all chapters are written by specialists and include up to date scientific information geriatric gastroenterology is of great utility to residents in internal medicine fellows in gastroenterology and geriatric medicine as well as gastroenterologists geriatricians and practicing physicians including primary care physicians caring for older adults

## **Geriatric Gastroenterology**

2012-07-26

fully updated edition of this award winning textbook arranged by presenting complaints with full color images throughout for students residents and emergency physicians

## **Gastrointestinal Bleeding**

1992

the critical care unit manages patients with a vast range of disease and injuries affecting every organ system the unit can initially be a daunting environment with complex monitoring equipment producing large volumes of clinical data core topics in critical care medicine is a practical comprehensive introductory level text for any clinician in their first few months in the critical care unit it guides clinicians in both the initial assessment and the clinical management of all ccu patients demystifying the critical care unit and providing key knowledge in a concise and accessible manner the full spectrum of disorders likely to be encountered in critical care are discussed with additional chapters on transfer and admission imaging in the ccu structure and organisation of the unit and ethical and legal issues written by critical care experts core topics in critical care medicine provides comprehensive concise and easily accessible information for all trainees

## **An Introduction to Clinical Emergency Medicine**

2012-04-10

the second edition of this highly successful book includes up to date notes on the step wise management of clinical emergencies encountered in everyday intensive care units icu each thoroughly revised chapter provides concise information for point of care treatment making it a practical guide clinicians can refer to on a daily basis at work or while traveling or just to expand their knowledge volume 1 of icu protocols covers topics in pulmonology cardiology neurology gastroenterology nephrology and infectious diseases

the endocrine and metabolic systems oncology trauma toxicology envenomation and thermoregulation obstetrics and perioperative care are covered in the second volume of icu protocols this two volume book is a must read for intensivists critical care specialists junior trainees and residents working in icus it is also relevant as course material for workshops on critical care and essential for all hospital based libraries this book provides junior trainees with an introduction to the management of problems common to the critical care unit david j dries doody s book reviews march 2013 for the first edition of icu protocols

## ***Core Topics in Critical Care Medicine***

2010-04-22

in this issue of gastrointestinal endoscopy clinics of north america guest editor dr patrick pfau brings his considerable expertise to the topic of gastrointestinal bleeding top experts in the field cover a broad range of topics on the diagnosis and treatment of both upper and lower gastrointestinal bleeding with a concentration on endoscopic intervention this issue discusses the preparation of the patient with a gi bleed even before endoscopy is performed and provides extensive coverage of the latest data and technology for variceal and non variceal upper gi tract bleeding small bowel occult and lower gi and colonic bleeding contains 12 relevant practice oriented topics including endoscopic diagnosis grading and treatment of bleeding peptic ulcer disease variceal and non variceal upper gastrointestinal bleeding refractory to endoscopic management indications and role of interventional radiology diagnosis of occult and obscure gastrointestinal bleeding endoscopic treatment of small bowel bleeding endoscopic diagnosis and treatment of colonic diverticular bleeding and more provides in depth clinical reviews on gastrointestinal bleeding offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

## ***ICU Protocols***

2019-12-31

this book is aimed at surgeons faced with the immediate management of acute surgical problems in a variety of resource settings the topics covered are common in both developed and developing countries as well as in tropical and non tropical settings the book offers an introduction to trauma which includes primary secondary and tertiary surveys trauma resuscitation and multidisciplinary care followed by a short section on acute burns management and a discussion of a range of specific surgical topics including various of acute abdomen upper and lower gastrointestinal bleeding perianal conditions oncological issues that require acute intervention abdominal wall problems urological emergencies and neck swellings it also addresses the rational use of antibiotics and medications and the role of high dependency units each chapter includes a flow chart algorithm with multiple endpoints that relate to the resource situations available to the surgeon the book is of interest to clinicians dealing with changes in acute surgery and the increasing disparity between developed and developing countries
