electrical wiring installation of cabling and related devices
such as sockets distribution boards and switches in a
structure safety standards are required for wiring the wire
sizes and cables types are determined by the circuit
operating voltage and electricity capabilities there are
further restrictions regarding the environment such as
temperature humidity exposure to sunlight chemicals and
environmental conditions the voltage current and functional
specifications of all associated circuit protection control
and distribution devices in a building s wiring systems are
important the wiring safety codes are different for each
region country and locality although the international
electrotechnical commission is working to harmonize wiring
standards across member countries there are still significant
differences in design and installation requirements the
process of electrical wiring is the connecting of cables and
wires to relate devices like fuses switches sockets lights

supply excerpt from wiring diagrams of electrical apparatus
and installations this volume contains a collection of
circuit diagrams representing more or less completely all
branches of electrical engineering with the exception of tele
phony and telegraphy the diagrams have been taken from actual
practice although some are not new it has been thought best
to include them either because they illustrate impor tant
principles or because the apparatus shown is still in
extensive use a book of diagrams limited strictly to the
latest apparatus would be of little use to the oper ator or
to the repair man the diagrams show much more than simple
wiring connections by their use it is possible to lay out a
modern switchboard to connect the apparatus and to understand
the principles of operation of the various electrical
machines the reader will obtain information from them in
proportion to his training and experience armature winding is
omitted as its proper treatment would require more space than
is here available the circuit connections are so drawn as to
be self explanatory thus reducing the necessary text to a
