2018-05-08

this book addresses an important yet under researched domain in interpreting education how theoretical training models should be responsive to context to do so it applies the linguistic concept of context to interpreting studies by investigating practices in representative conference interpreting training programmes in europe and china after presenting an overview of interpreter training programmes the author describes the need to reassess the applicability of the well established and widely accepted model of interpreting from the paris school esit aiic model to the chinese interpreting training scene building on the theoretical study of context in foreign language classrooms suggested by linguists like halliday and hasan 1993 kramsch 1993 and others the author subsequently constructs a new curriculum comprising a four step approach to consecutive interpreting courses in the chinese context the rationale for such an approach is justified in accordance with the overall design of context taking into account the four dimensions in a teaching learning environment this book is intended for scholars and graduate students who are interested in translation and interpreting applied linguistics as well as foreign language education it also serves as a practical guide for developing university level translation and interpreting programmes

Digital Mapping Techniques '03, Workshop Proceedings

2003

step by step guidance on creating internal controls to manage risk internal control is a process for assuring achievement of an organization s objectives in operational effectiveness and efficiency reliable financial reporting and compliance with laws regulations and policies this is a toolkit approach that addresses a practical need for a series of standards of internal controls that can be used to mitigate risk within any size organization inadequate internal controls can

cause a myriad of problems that adversely affect its ability to provide reliable timely and useful financial and managerial data needed to support operating budgeting and policy decisions reliable data is necessary to make sound business decisions toolkit approach with detailed controls and risks outlined for key business processes foundational for sox 404 initiatives key material to improve internal control efforts guidance during m a projects poor controls over data quality can cause financial data to be unreliable incomplete and inaccurate this book helps you control that quality and manage risk

Interpreter Training in Context

2020-10-07

the message i have for salespeople is based on the knowledge and experience i have acquired from over 45 years of real world selling sales management sales training and management of customer service support centers the knowledge and insights i want to pass along with my book have not been learned in sales training classes and seminars i have attended or books i have read the finer selling and human relation techniques i have developed and presented in my book have been learned in the real world of selling this book is intended to make salespeople aware of the advanced techniques of how to become a successful professional salesperson these techniques will enable salespeople to attain a higher level of professionalism confidence enthusiasm and success when selling they will be able to separate themselves as true professionals from the crowded field of other capable sales people in their lines of business my objective is to pass along the knowledge and insights that i have acquired throughout my years of real world selling this book identifies common selling mistakes and how to avoid them this book will also reveal to you the many proven successful selling techniques that i have learned and developed over the years by learning understanding and applying these finer techniques of selling you will be able to further develop your existing selling talents abilities and skills into your own personalized art form of selling another purpose of this book is to present guidelines on how to develop practice and implement techniques for successful professional selling based on common sense and ethics using a common sense approach towards selling will build upon the fact that becoming a successful salesperson involves maintaining a positive frame of mind it has to do with how you think it has to do with how you approach selling in your mind and place trust in your intuition a successful salesperson s two most valuable assets are their mind and their time ethics is presented as a key approach ethics is such an important topic that i felt the need to instruct salespeople on how to professionally develop and earn their customer s confidence and trust based on ethical business practices this book will present information and examples on how to develop professional selling skills based on ethical standards these standards will relate directly to your moral character the

strength of your character will be based on your ability to develop and adhere to high moral standards and principles that will help to set you apart from other salespeople. This book is divided into two sections: the first section examines selling essentials, and the second section focuses on the secrets of selling. Where I reveal my 120 fundamental secrets of professional salespeople, the information, suggestions, techniques, strategies, and insights in this book are candid, straightforward, realistic, and in focus. They are presented in a condensed form so that they can be easily remembered, referred to, and applied on a daily basis. The chapters are designed to be easily read, digested, and implemented by the reader. The brevity of some chapters is intended to appeal to people seeking real-world practical, no-nonsense answers to making themselves better salespeople and therefore making their sales team more effective.

Instructional Techniques for Company Officers

1983

This book provides a one-volume overview of psychology's globalization and will serve as a handbook for psychology professors around the globe wanting to internationalize and diversify their courses and curricula and seeking innovative ideas to enrich their teaching. Topics covered include practical tips to diversify specific courses such as abnormal psychology, lifespan development, and psychotherapy, and innovative methods of assessment of student learning. Additionally, a number of chapters focus on describing the training of psychologists and the history and future of psychology education in various nations and regions. Co-edited by six distinguished international academics, the thirty-three chapters represent each major geographic region around the world, with authors based in nations in Africa, Asia, Australia, Europe, Latin America, and North America. Instructors of cross-cultural, cultural, and international psychology and of multicultural education will be especially interested in the book, as will program evaluators, policy makers, and university administrators.
