china s economic and military rise dominates discussions of the world s most populous country resilient authoritarian government is credited with great successes but this book expands the discourse to include governance by village heads who often ignored central politicians chinese reforms for prosperity started circa 1970 under rural and suburban leaders they could act autonomously then because of unexpected political and technological opportunities their localization of power eroded socialist controls since 1990 central leaders have tried to reverse reforms made by resilient local bosses new findings especially from the yangzi delta around shanghai challenge the top down approach to thinking about governance as deng xiaoping admitted the nation s spurt of prosperity began in local communities rather than beijing reforms for triple cropping and rural industrialization started long before mao s death not in 1978 the date most writers cite country factories competed with state industries for materials and markets shortages by the 1980s led to inflation government deficits unofficial credit

unenforceable planning illegal migrations then international exports and severe political tensions after 1990 party leaders sought policies to build a leninist regime that is mostly post socialist these reactionary changes have lasted into the era of xi Jinping china's reforms and subsequent changes can be understood as results of unintended situations not just ideas and local not just central politics this book will interest students and scholars of Chinese as well as any readers who wonder about comparative development

china has become deeply integrated into the world economy yet gradual marketization has facilitated the country s rise

without leading to its wholesale assimilation to global neoliberalism this book uncovers the fierce contest about economic reforms that shaped china s path in the first post mao decade china s reformers were sharply divided they agreed that china had to reform its economic system and move toward more marketization but struggled over how to go about it should china destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators with hindsight the historical record proves the high stakes behind the question china embarked on an economic expansion commonly described as unprecedented in scope and pace whereas russia s economy collapsed under shock therapy based on extensive research including interviews with key chinese and international participants and world bank officials as well as insights gleaned from unpublished documents the book charts the debate that ultimately enabled china to follow a path to gradual reindustrialization beyond shedding light on the crossroads of the 1980s it reveals the intellectual foundations of state market relations in reform era china through a longue durée lens overall the book delivers an original perspective on china s economic model and its continuing contestations from within and from without

in the 1990s china embarked on a series of political reforms intended to increase however modestly political participation to reduce the abuse of power by local officials although there was initial progress these reforms have largely stalled and in many cases gone backward if there were sufficient incentives to inaugurate reform why wasn t there enough momentum to continue and deepen them this book approaches this question by looking at a number of promising reforms understanding the incentives of officials at different levels and the way the chinese communist party operates at the local level the short answer is that the sort of reforms necessary to make local officials more responsible to the citizens they govern cut too deeply into the organizational structure of the party

in 1840 alexander maconochie a privileged retired naval captain became at his own request superintendent of two thousand twice convicted prisoners on norfolk island a thousand miles off the coast of australia in four years maconochie transformed what was one of the most brutal convict settlements in history into a controlled stable and productive environment that

achieved such success that upon release his prisoners came to be called maconochie s gentlemen here norval morris one of our most renowned criminologists offers a highly inventive and engaging account of this early pioneer in penal reform enhancing maconochie s life story with a trenchant policy twist maconochie s life and efforts on norfolk island morris shows provide a model with profound relevance to the running of correctional institutions today using a unique combination of fictionalized history and critical commentary morris gives this work a powerful policy impact lacking in most standard academic accounts in an era of mass incarceration that rivals that of the settlement of australia morris injects the question of humane treatment back into the debate over prison reform maconochie and his marks system played an influential role in the development of prisons but for the last thirty years prison reform has been dominated by punitive and retributive sentiments the conventional wisdom holding that we need supermax prisons to control the worst of the worst in solitary and harsh conditions norval morris argues to the contrary holding up the example of alexander maconochie as a clear cut alternative to the living hell of prison systems today
