a concise and accessible introduction to natural law ethics this book introduces readers to the mainstream tradition of western moral philosophy building on philosophers from plato through aquinas to john finnis alfonso gómez lobo links morality to the protection of basic human goods life family friendship work and play

the experience of beauty knowledge and integrity elements essential to a flourishing happy human life gómez lobo begins with a discussion of plato s crito as an introduction to the practice of moral philosophy showing that it requires that its participants treat each other as equals and offer rational arguments to persuade each other he then puts forth a general principle for practical rationality one should pursue what is good and avoid what is bad the human goods form the basis for moral norms that provide a standard by which actions can be evaluated do they support or harm the human goods he argues that moral norms should be understood as a system of rules whose rationale is the protection and enhancement of human goods a moral norm that does not enjoin the preservation or enhancement of a specific good is unjustifiable shifting to a case study approach gómez lobo applies these principles to a discussion of abortion and euthanasia the book ends with a brief treatment of rival positions including utilitarianism and libertarianism and of conscience as our ultimate moral guide written as an introductory text for students of ethics and natural law morality and the human goods makes arguments consistent with catholic teaching but is not based on theological considerations the work falls squarely within the field of philosophical ethics and will be of interest to readers of any background

since the first edition of this established text was published in 1988 action research has gained ground as a popular method amongst educational researchers and in particular for practising teachers doing higher level courses in this new edition jean mcNiff provides updates on methodological discussions and includes new sections of case study material and information on supporting action research the book raises issues about how action research is theorised whether it is seen as a spectator discipline or as a real life practice and how practitioners position themselves within the debate it discusses the importance for educators of understanding their own work and showing how their educative influence can lead to the development of

good orders in formal and informal learning settings and in the wider community this second edition comes at a time when after years of debate over what counts as action research it is now considered an acceptable and useful part of mainstream research practice

there are many ways of writing about the moral life moral obligations follows the way of what philosophers call meta ethics the analysis not of particular moral problems but of how the concepts used in formulating and solving them concepts like right and obligatory have significance and power over us the meta ethical part of this book is preceded by a discussion of action in which wren lays the foundations for the argument that moral obligation is a part of the formal structure of human agency wren s argument is practical and social psychological it is to help all starting with those who are already committed to some version of the ethic of individual dignity to promote interagency fellowship and peace as a result of seeing a certain truth namely the truth that the urgency of their feelings of moral obligation derives from a unspoken intention to belong to a community of agents moral obligations begins with the philosophy of action and then it reviews the historical debate about the nature of obligation and its social context this is followed by a section about action in general it establishes the standpoint of the agent and makes an inventory of several species of action later chapters summarize the foregoing themes with emphasis on the unspoken side of intention and develop them in conjunction with an analysis of the hypothetical imperative the work closes with a discussion of the dilemma of membership in competing moral communities
