## **Hearing Health Care for Adults 2022-03-14**

the loss of hearing be it gradual or acute mild or severe present since birth or acquired in  
older age can have significant effects on one s communication abilities quality of life social  
participation and health despite this many people with hearing loss do not seek or receive  
hearing health care the reasons are numerous complex and often interconnected for some hearing  
health care is not affordable for others the appropriate services are difficult to access or  
individuals do not know how or where to access them others may not want to deal with the  
stigma that they and society may associate with needing hearing health care and obtaining that  
care still others do not recognize they need hearing health care as hearing loss is an  
invisible health condition that often worsens gradually over time in the united states an  
estimated 30 million individuals 12 7 percent of americans ages 12 years or older have hearing  
loss globally hearing loss has been identified as the fifth leading cause of years lived with  
disability successful hearing health care enables individuals with hearing loss to have the  
freedom to communicate in their environments in ways that are culturally appropriate and that  
preserve their dignity and function hearing health care for adults focuses on improving the  
accessibility and affordability of hearing health care for adults of all ages this study  
examines the hearing health care system with a focus on non surgical technologies and services  
and offers recommendations for improving access to the affordability of and the quality of  
hearing health care for adults of all ages
